The VA Illiana Health Care System, 1900 East Main St., Danville, Illinois intends to negotiate with Motorola Solutions, Inc/Starcom 21 Network to provide XTS5000 Model II and XTL5000 radio's as well as the software and additional equipment to go along with the Radio's. The Government intends to solicit and negotiate with only one (1) source under the authority of FAR 6.302-1(a)(2). The Government believes that only one (1) responsible source can provide the supplies/services based on the type of equipment needed along with the ability of the equipment

to utilize the same cellular signal and frequency currently in the medical center that allows the VA Police to communicate with each other.

This notice is not a request for competitive quotes, but responses received on or before August 28, 2011 will be evaluated. A determination by the Contracting Officer not to compete this proposed action based on responses to this notice is only within the discretion of the Contracting Officer. Information received will be considered solely for purposes of determining whether to conduct a competitive procurement.

Responses must be submitted in writing to the Richard L. Roudebush VA Medical Center, Attention: David Garrison, Contracting Officer (90CSC), 1481 W. 10th Street, Indianapolis, IN 46202, email at David.Garrison@... or fax at 317-988-1809. Responses must be received no later than 12:00pm, Sunday, August 28, 2011. No telephone inquiries will be accepted.

4433. Ilinois Department of Corrections Selects Icom Gear for Narrowbanding (4/6/12)

Yahoo group: StarCom21
Date: 2012-04-11 23:15:39 UTC
From: starcom21@RadioReference.com
Topic: 4433 Message: 4433

*/*Assuming no SC21 migration any time in the future.*/

llinois Department of Corrections Selects Icom Gear for Narrowbanding (4/6/12)*
Icom America secured a contract with the Illinois Department of Corrections (IDOC) to help the agency comply with the FCC's VHF and UHF narrowbanding deadline. RF Marketing, the manufacturer's representative in Illinois and Wisconsin, will deliver a total of 1,734 portable radios and 50 base stations throughout 2012.

"Agencies that do not comply with the narrowbanding mandate face suspension of communication capabilities, heavy fines or difficulty in obtaining new FCC licenses," says RF Marketing Regional Sales Manager George Farmer. "By starting the narrowbanding process with Icom radios, the Illinois Department of Corrections will avoid the legal repercussions of operating aging, noncompliant radios."

The Department of Corrections' existing system consists of devices from various manufacturers and some radios in use for more than 15 years. In response to a statewide bid opportunity to narrowband the IDOC's system, RF Marketing submitted technical qualifications. The IDOC and Illinois Central Management Services, the state's department responsible for procurement, approved the proposal for its technical merit and competitive pricing.

"Radios used in correctional facilities need to be rugged and reliable; they are subjected to heavy indoor use and the outdoor elements of a prison yard," said Illinois Department of Corrections Director Salvador "Tony" Godinez. "Since officers equip their utility belts with a substantial amount of gear --- keys, handcuffs and more --- radios should also be light enough to wear comfortably for extended periods of time."

IDOC currently operates 27 prisons throughout Illinois in addition to work camps, boot camps and adult transition centers.

FWIW, I know that there are (or were) licenses for 800 MHz trunked
systems at many IDOC facilities. Maybe 453.xxx is still alive and well
at some of them.

Here in Joliet the "Stateville" prison primarily uses the 800mgz analog trunk system and still the 37mgz low band in transit....The IYC which the governor wants to relocate uses UHF....ron in joliet

a lifetime ago i did a 3-year stretch at stateville, 8-hrs at a time (i was a guard). for several months a partner and i did court writs taking cons to and picking them up from county jails all over the state. in those days (mid 70's) the transport vehicles were equipped with two-way radios on the 30-mhz low band but they were AM radios, not FM. once we were a mile of two from the prison the radios were useless.

'73,
rich, n9dko
Best comment heard so far at spring training after an ump at second base blew a call..."Hey, ump!...Lenscrafters can get you new lenses in about an hour!"

Here in Joliet the "Stateville" prison primarily uses the 800mgz analog trunk system and still the 37mgz low band in transit....The IYC which the governor wants to relocate uses UHF....ron in joliet

COLLINSVILLE . Metro East law enforcement officials say they are
opposed to a budget proposal that would eliminate an Illinois State
Police communications center in Collinsville.

About two dozen law enforcement officials appeared at a news conference
held Thursday afternoon to announce opposition to the proposed
consolidation.

Local law-enforcement officials denounce ISP dispatcher consolidations

BY BRIAN BRUEGGEMANN - News-Democrat
BY BRIAN BRUEGGEMANN Belleville News-Democrat

Law-enforcement officials from the metro-east held a news conference
Thursday afternoon to speak against Gov. Pat Quinn's proposal to
consolidate the Illinois State Police dispatch center in Collinsville
with an ISP communications center in Springfield.

Chiefs and other top commanders from about 20 police departments joined
Madison County State's Attorney Tom Gibbons and St. Clair County State's
Attorney Brendan Kelly for the press conference.

monique_bond@...

ILLINOIS STATE POLICE OFFICIALS RESPOND TO PROPOSED
COMMUNICATIONS CONSOLIDATION PLAN
Officials Commit to Improved Technology and Enhanced Officer & Public Safety
Springfield -- Illinois State Police (ISP) Officials responded today to
public concerns
regarding the proposed ISP communications consolidation plans.
ISP currently houses 20 communications centers, and the improved plan will
consolidate to four. The selected centers, Chicago, Springfield, DuQuoin
and Sterling,
are newer centers and have been selected as sites capable of handling
ISP traffic from
neighboring districts across the state.
Phase one of the plan includes consolidating Effingham (12), Carmi (19),
and Ullin (22)
into DuQuoin Center (13), but does not include Collinsville (11), or
Litchfield (18).
ISP Officials have maintained that no pubic safety will be compromised
and citizens will
continue to receive the same level of public safety service. The plan
also enhances
public safety for officers with newer technology and greater
flexibility. "More than ever,
law enforcement agencies across the country are being challenged to do
more with less
and must also consider the safety of their officers and the citizens
they serve," said ISP
Director Hiram Grau. "This plan will add greater technology and
efficiency to our
overall public safety mission by providing real time information to
dispatch operations,"
he stressed.
Officials also distinguished ISP communications centers from local 911
emergency
operations centers. ISP Communications Centers are separate from local
police
agencies and there will be no impact to local agencies' 911 emergency
operations.
ISP will be able to locate its sworn officers in real time when pending
calls for service
are dispatched. Dispatching and communications capability will be
greatly improved
with GPS technology that can pinpoint the location of an officer.
Citizens will continue
to receive the same level of public safety service.
-moreAdd
One/
ISP Consolidations
In addition to ISP's STARCOM 21 radio network, communications capability
will be
greatly improved with GPS technology. Citizens will continue to receive

the same level
of public safety service.
Response times will be improved even further with the "closest car
concept." ISP
telecommunicators will be able to pinpoint an officer's location through
GPS, directing
the officer who is closest to the call.
Regardless of their location, telecommunicators will continue to have
the same access
to investigative information, including parolee information, via the Law
Enforcement
Agencies Data System (LEADS). Officials stress that there is no
correlation to the
location of a communications center and crime and are committed to
working with area
police chiefs and public safety officials to address their concerns.
"The challenges of crime that we face together with ISP in the Metro
East are unique,
and so are the state's budget problems," stated St. Clair County State's
Attorney
Brendan Kelly. "I'm confident we can work with the state to address the
concerns that
have been raised in a smart way that improves public safety," he added.
A sampling of total daily calls for service from the area consolidation
centers includes:
Collinsville 349 (average of 14 calls per hour)
Effingham 107 (average of 4 calls per hour)
DuQuoin 179 (average of 7 calls per hour)
Litchfield 13 (less than 1 call per hour)
The Illinois State Police is committed to providing quality service to
the citizens of Illinois
and the proposed consolidation plan illustrates our everyday commitment
to fighting
crime, and making communities safer.

4438. Wrong talkgroup transmissions on Starcom 21

Yahoo group: StarCom21
Date: 2012-04-20 19:39:45 UTC
From: mark_hoeny
Topic: 4438 Message: 4438

I've noticed a number of wrong talkgroup transmissions on SC21 IESMA TG 30328. This is happening to a wide variety of users - ranging from security guards at Chicago-area Secretary of State facilities to jail guards to local police units. Most of the transmissions have not sounded to be of an emergency nature, but at least one I heard was an officer calling out a traffic stop. I'm fearing the first report of an SC21 user in harm's way and unable to contact anyone for assistance - all because their radio was on the wrong talkgroup.

I'm guessing that this can be attributed to users not selecting the proper talkgroup or inadvertently bumping the radio's zone selector and placing their radio on the first talkgroup of the radio's first interop zone.

Mark

I've heard it a few times in the past, but just last week a 6-JOHN unit was continually (15 minutes) trying to contact CAPCOM with no success on IESMA or another one of those TGs. 6-JOHN units work at the Capitol Complex in Springfield.

Terry,
I have each of the Dist 11 towers programmed separately into my GRE 600 which is mounted in my vehicle

I even have Godfrey, Belleville and Caseyville loaded

This afternoon while in Creve Coeur/University City/Delmar Loop and then even into some whils downtown I getting traffic on what I have programmed as Godfrey.
Programming is 45 to 60 days old
Here's what I have in PSREdit500

I have not determine that they all are on the air, although at times
hearing simulcast distortion in the Edwardsville area.
I am now located (home) right between the Edwardsville and Maryville
sites in Glen Carbon

License Application is still pending:
0005109586
<http://wireless2.fcc.gov/UlsApp/ApplicationSearch/applMain.jsp?applID=6672559>
MADISON COUNTY SHERIFF 0002792729 New YE 03/08/2012 Pending

Already seeing the current 5 channels of voice, full with activity --
now sure how this is affecting users.

There are 1 or 2 other licensed frequencies, but not showing up.

The Edwardsville simulcast site is the same location as T325.
3 (3) 025 (19) Edwardsville/SIUE [OFF AIR] Madison 851.25000
851.83750 852.11250c 852.77500a 853.66250a 853.98750 854.01250

858.33750 860.33750

The Godfrey simulcast site is the same location as T355.
3 (3) 055 (37) Godfrey/Alton [OFF AIR] Madison 851.35000a
851.87500c 852.40000a 852.66250 853.08750 858.21250

These are both Failed, Current at this time and assume they will go away.

Caseyville has been off line for a long time now.
3 (3) 053 (35) Caseyville (OFF AIR) St. Clair 774.05625
774.28125c 774.59375a 774.81875a

As this was a duplicated site location for St Clair County Simulcast

3 (3) 999 (3E7) Mascoutah [OFF AIR) - was 3-001] St. Clair
774.78125 775.34375c 775.55625a 775.80625a 855.16250 859.33750

Has also been off air, duplicated SCC Site
3 (3) 005 (5) Belleville (OFF AIR) St. Clair 851.33750 851.86250c
852.38750a 852.91250a

Has also been off air, duplicated SCC Site

Moreover, they will need more voice channels, since District 18 and
Ameren have heavy traffic on the former T355 Godfrey.
With Madison County Sheriff/Rural, Granite City Police, Maryville
Police/Fire/EMS, Glen Carbon Police/Fire/EMS, Troy Police, Bethalto
Police/Fire, Collinsville Fire/EMS along with D18 and D11 users, IDOT,
Ameren, etc... they are going to need some more voice frequencies.

Oddly enough we have a tower in the north zone, Tower 101 Dupage County that also displays the call letters as "Change Me" but it also reports another call sign of "WPTZ798" does anyone know what is to become of the sites that are labeled "Change Me"? Just wondering if anyone has any info about this?

Thanks,

Bob

"Change Me" would just be some sort of default data that is there to remind programmers to insert the proper callsign in the codeplug. Seems they missed a couple radios...

Anyone know if the information reguarding the Sterling area sites are still the same, its been over a year since i've been down there and abel to listen to starcom. If this mega dispatch change happens will this mean better coverage on starcom since Rockford will be dispatched out of Sterling.

Topic: 4449 Message: 4449

Is there someone in the group that can give some advice to a new listener to StarCom21?

I have a BCD396T have starcom programmed in and can hear a few things but very digitized, is there a specific band plan that is needed or P25 adjustment? I have loaded Dupage, Kane and both North and South Cook simulcasts programmed in?

We can talk off list of needed.

Thanks

John

In Glen Carbon, between the Maryville and Edwardsville towers....
picking up Glen Carbon and Maryville/Troy Fire just fine.

851.875 is loud and clear here.

Where do you live?

I live in Troy. But I have discovered the problem. When downloading TG from RR I just let it automaticly put them into scanlists. However, when I looked at the scanlists on my Arc500 pro software some TG had no scanlists. I went in added scanlists and I can hear everything again. Thanks for the report on your reception. Kevin

4453. SC21 NATO Traffic

Yahoo group: StarCom21
Date: 2012-05-19 17:02:52 UTC
From: Mike Curtis
Topic: 4453 Message: 4453

On the way from Utica to Grayslake this morning, StarCom was buzzing with NATO-related traffic on the following (but not limited to) talkgroups -

ISP Chicago A
ISP Special Events 1A
ISP Special Events 1B
ISP Special Events 2A
ISP Special Events 2B
ISP Special Events 3A
ISP Special Events 3B
ISP Critical Incidents 1A
ISP Critical Incidents 1B
BNSF PD Dispatch
ID 2400 (Attorney General)

I also caught heavy NATO-related traffic on the Metro 2 and Metro 4 UHF channels.

From: Richard Bauer
Topic: 4458 Message: 4458

Uniden BCD396T digital handheld scanner. Excellent operating and cosmetic condition. No scratches on the display window. Comes with the following accessories:

- Leather carry case
- Belt clip
- Stock antenna and RadioShack 800-Mhz antenna (both SMA)
- SMA/BNC adapter
- Wall charger/power supply
- Serial/USB Programming Cable
- Registered copy of ARC396 Pro software with software key

$300 firm. Cash or paypal only. Pickup in Wheaton IL or buyer pays actual shipping/insurance charges to US addresses only.

Please contact Rich via e-mail at mailto:rk911@...

4459. StarCom TG 1001 Patched to Will County 04-083

Yahoo group: StarCom21
Date: 2012-06-07 18:58:24 UTC
From: Mike Curtis
Topic: 4459 Message: 4459

I've passed through Will County a couple times in the past week and have noticed that Plainfield PD 1 (TG 1001 on StarCom) has been patched to TG 04-083 (Elwood PD Car-to-Car) on the Will County EDACS system. Is this something permanent or is one agency or the other looking at switching systems (or is WesCom doing dispatching duties on both systems?)

4460. TG 4985 - Bloomington PD SWAT? (Or Bloomington PD Training?)

Yahoo group: StarCom21
Date: 2012-06-07 19:01:54 UTC
From: Mike Curtis
Topic: 4460 Message: 4460

Yesterday Bloomington PD was doing SWAT training on TG 4985. I believe they were at the Marseilles Training Center (or someplace else close) because there were 15 or so Bloomington PD radios affiliated with T134 (Ottawa) and a bunch on T126 (Morris). Everything was in the clear so *shrug* :)

4464. Fwd: (CARMA) ISP Radio Consolidations

Yahoo group: StarCom21
Date: 2012-06-11 23:20:57 UTC
From: SC21
Topic: 4464 Message: 4464

I have it on reliable information that the ISP is *NOT* planning to go forward with the proposed consolidation of their District Radio stations. As you may recall, the state was exploring the consolidation of all the ISP Radios into 4 regional centers.

I received information today indicating that Director Hiram Grau advised ISP personnel that the ISP will retain 15 radio centers (down from the 21 currently operating)... and that those Telecommunicators who have been laid off down south will be offered other positions created by the state, but not necessarily in the same capacity. Also, new Telecommunicators will be hired to fill vacancies. The cost to implement this is estimated at $2 Million, whereas the consolidation was estimated to cost almost $13 million.

Of course, this is all subject to change --- again.

Mark - N9WYS

4467. FT R7000 & R71 for R8500

Yahoo group: StarCom21
Date: 2012-06-30 01:02:51 UTC
From: Rich Carlson
Topic: 4467 Message: 4467

I have 1 each Icom R7000 and R71A. Both are in good physical and
excellent operational condition and I have the boxes.
The R71A has a remote (it can be swapped to the R7000 if you want).
The R7000 has a discriminator tap.

I am interested in an R8500 in return but could also consider
something like an IC746 or 756

From: Brian Bochenek
Topic: 4468 Message: 4471

I had the PSR500 first.... When I purchased the Pro106 I realized that the 106 was far better even when both units were set up exactly the same. I sold my PSR500....there wasn't a thing wrong with it, I just felt the 106 held a control channel better and distant signals were much better (analog) Starcom 21 comes in perfectly with this gem...I own a 396XT and that performs well too.

Subject: [StarCom21] GRE PSR-500 or Pro-106, are these good choices for STARCOM21 ?

I've been running bearcat scanners for decades, but my local area is transitioning to starcom-21. I even have some old crystal controlled scanners. :)

Dumb newbie questions....

Are these decent choices for a starcom21 scanner ?

Do I need programming software ?

Radio shack is on sale for $349

GRE is about the same

were is the best place to buy these from (cheapest) ?

Thanks in advance
73
Derek

Chris,
I was thinking about ordering this one for $339

http://www.universal-radio.com/catalog/scanners/4956.html

Looks like it comes with a programming cable
http://www.universal-radio.com/catalog/scanners/4956accs.jpg

Not sure if the radio shack version comes with a cable or not.?

How difficult are these to program ?
I work in the Belleville area and this is what I want to receive.

Thanks
Derek

I think you're fine going either way, but the radio shack version does not
come with the programming cable
Fortunately I already had one from when I bought my GRE PSR600

Derek, the PRO series are easier to program, I think. If you buy a PRO series from RS and need help with programming, give me a call. 618-334-5449. I have helped many folks from St. Clair co. No need for a cable, I have one.

July 2012 Issue 5

Message from CEO Header

*Dear Terry, *

In recent months, many public safety agencies have been investigating broadband LTE and trying to determine its impact on traditional Land Mobile Radio (LMR). This discussion will become even more widespread as development progresses on the First Responder Network (FirstNet), the first nationwide public safety broadband network. After having thorough discussions with our clients and other industry leaders about the capabilities that are absolutely necessary to fulfill their missions, I believe that LMR and broadband technologies are complementary, but broadband cannot yet stand on its own as a substitute for LMR.

Recently, a report from the U.S. Government Accountability Office (GAO) confirmed my opinion. The report states that LMR remains necessary because it is the only technology that will support the mission-critical voice capabilities that meet high standards for reliability, redundancy, capacity and flexibility. Industry experts say that it will be at least a decade before broadband is able to provide users with these same mission-critical voice capabilities.

LMR also benefits from the ability to work on or off network, which is critical when responders are working outside of the network range. In addition, LMR systems can support a large number of users during an emergency, and LMR's infrastructures are durable enough to withstand most disasters.

Despite the benefits of LMR, there is something to be said for broadband's ability to greatly enhance incident response though high-speed video and data transmissions. After all, the ability for a crew of firefighters to pull up the blueprints of a burning building or

for a police officer to transmit the video of a recent arrest can significantly impact the outcome of an incident. However, additional infrastructure may be required for users to access the broadband network when inside large buildings or underground, and broadband may have a limited capacity for users during an emergency. These issues are not insurmountable, but they must be considered when looking at the benefits and challenges of each system.

Some may argue that broadband devices are preferable because they are substantially less expensive. While this has been true in the past, there are now a number of ways to reduce the cost of LMR devices. The government has several grants available for the purchase of this equipment. In addition, the Department of Homeland Security recently agreed to help its partners identify joint procurement opportunities so that agencies can reduce costs by purchasing devices in larger quantities. As Project 25 standards become more integrated, interoperability will also reduce the higher cost of LMR since agencies will be able to cut ties with a single vendor's proprietary equipment and use an open bidding process to secure the most competitive price.

Without a doubt, broadband will provide users with unprecedented high-speed access to a wide range of information, and I am excited to watch the progression of this technology. But, for now, broadband systems can only complement LMR devices; broadband cannot entirely substitute for LMR. As a result, LMR remains a good investment.

As your one-stop resource for public-safety P25 solutions, EFJohnson is committed to evolving our architecture, products and solutions to deliver the highest-quality, cost-effective, mission-critical communications solutions for LMR and broadband systems. This includes the expansion of our ATLAS 8000-based interoperability and interworking gateway solutions, as well as the adaptation of our subscriber portfolio to maximize interoperability with LTE devices and applications through future P25-LTE interfaces and gateways.

I look forward to speaking with each of you about how EFJohnson's devices can meet your mission-critical voice communications needs.

Sincerely,

Andy Adams, CEO

EFJohnson Technologies

EFJohnson achieved a significant milestone this spring with the full deployment of the Wisconsin Interoperable System for Communications (WISCOM), a statewide system that allows emergency responders to seamlessly communicate across jurisdictions. The launch of WISCOM was celebrated during a commissioning ceremony hosted by the Wisconsin Office of Justice Assistance on April 30, 2012 at the Fond de Lac Police Department. Speakers included David Spenner, Statewide Interoperability Communications Manager for the Office of Justice Assistance; Matt Joski,

Sheriff of KewauneeCounty and Chairman of the Statewide System Management Group; and Andy Adams, CEO of EFJohnson.Additional participants included representatives from the Wisconsin Department of Transportation, the State Interoperability Council and the Wisconsin Statewide System Management Group, a committee tasked with managing Wisconsin's statewide communications system.

WISCOM is Live!
<http://r20.rs6.net/tn.jsp?e=001oGys5mE4a721ym7gnFwPI-aHxjefXXyUMgLg0HpeQw-sNneA-0t4gU02Y7z2GYGqTeltyTbWQDWNCdDUtfHuWY8ZNvNlqKt1Vg_RTxBttMB4Ao6NTkAsZGjsF_DwmrelGoH-XM9uaWhbK8ikDyvthzPy9XX2lX_wKvd2W4mcBkCh84IJ9fVI4mYEpWtk_1_GN4Q7gVyxcQX2PLy98DBS0F4LEKbmK0BMvUFoQjqcD0tatmJRU97R11vWr-2dLUMXud2lqVKF_js=>

WISCOM is Live!

WISCOM is an integrated, interoperable network that is shared by statewide law enforcement, fire services, EMS and emergency management agencies. It provides mobile coverage to 95 percent of the state. The flexible, robust system is P25-compliant and uses EFJohnson's unique, patented distributed architecture for maximum flexibility and scalability in network design and deployment. This allows users to plug and play new site additions as coverage needs change or as local agencies replace their legacy systems and join WISCOM. In addition, use of a switchless network instead of a centralized core network increases reliability and eliminates single points of failure.

Final acceptance of the system was awarded in March to EFJohnson by the Wisconsin Statewide System Management Group after comprehensive regional and statewide testing by the State Patrol Bureau and L.R. Kimball, the architecture, engineering and communications firm that developed the initial WISCOM concept. This acceptance cleared the way for full deployment.

With the WISCOM backbone now in place, several Wisconsin counties and public safety agencies are already working with EFJohnson to build out systems that leverage the state network. These counties and agencies are receiving unprecedented long-term cost savings by sharing the infrastructure and avoiding equipment duplication.

In partnership with Two-Way Communications and Pointon Communications, EFJohnson is working with Iowa County, Sawyer County, Taylor County, Kewaunee County, the City of Fond du Lac and the Wisconsin State Patrol to build new P25-compliant systems that leverage the WISCOM backbone. Deployments will begin by the end of 2012.

The U.S. Department of Homeland Security (DHS) has named EFJohnson as part of an elite group of suppliers eligible to provide DHS agencies and certain non-DHS agencies with mission critical communications equipment through a $3 billion Tactical Communications (TacCom) contract. The company was identified as one of only three qualified small business track suppliers for subscriber and infrastructure equipment, which includes Project 25-compliant, digital two-way portable and mobile radios, base stations and software. The company was also identified as

an approved vendor of equipment complementing the communications system infrastructure, such as dispatch consoles and mobile radio control stations.

TacCom is a multiple award, Indefinite-Delivery, Indefinite-Quantity contract established in 2012 to help DHS purchase a wide array of tactical communications products, infrastructure and services for mission critical, public safety communications. The total funds spent on equipment through the contract may not exceed $3 billion, inclusive of options.

EFJohnson will be a TacCom supplier for two years, from 2012 - 2014, with options for additional extensions that could extend the contract through 2017.

Agencies purchasing equipment through the TacCom contract include the U.S. Coast Guard, the Transportation Security Administration, the Federal Emergency Management Agency and U.S. Customs and Border Protection. Non-DHS agencies, such as the U.S. Department of Justice, Department of State and the White House Communications Agency, may also procure tactical communications equipment from selected vendors through the TacCom contract.

If you're attending the APCO International Conference and Expo in Minneapolis, MN, be sure to join EFJohnson for a special presentation on August 20, 2012 at 1:30 p.m. in the APCO Presentation Theater. Participants will learn how smarter system design and engineering can decrease costs while enhancing reliability, functionality and durability.

During the presentation, we will provide more details about our ATLAS P25 Systems Solution, the most reliable, cost-efficient system currently available in the communications marketplace. Participants will also be introduced to the new Viking VP600 portable radio, which was designed based on feedback from end users. The Viking VP600 features P25 Phase 2 capabilities, superior audio quality and advanced visual features.

Be sure to stop by Booth #1713 to see our latest public safety communications solutions.

*Land Mobile Radio Devices vs. Broadband Networks *

**

As plans progress to develop the First Responder Network (FirstNet), a nationwide public safety network, many agencies are trying to understand broadband systems and how they relate to traditional Land Mobile Radio (LMR).
According to a report recently released by the U.S. Government Accountability Office (GAO), LMR devices will remain a good investment for at least the next decade or longer. This is primarily because LMR networks are a vital source of mission critical voice communications - the voice capabilities that meet a high standard for reliability, redundancy, capacity and flexibility. In addition, its durable, reliable infrastructure can withstand most environmental extremes. Long Term Evolution (LTE) systems, the technical standard for the nationwide broadband system, cannot currently provide the mission critical voice communications that are necessary for emergency responders to perform their duties (push-to-talk instantaneous call set up, group talk one-to-many and direct talk around with no infrastructure). LTE may also have issues during emergencies. Emergencies tend to be localized, forcing many first responders to a small area. With all the users demanding large data transmissions, it may overwhelm the local LTE tower, resulting in denial of service.

From: kf9wy@sbcglobal.net
Topic: 4468 Message: 4482

Got home from work tonight late.

Installed the BUTEL software and USB drivers.

Joined Radio reference.

uploaded.

BINGO !
this was super easy.

Thanks to all for your help

That is great. He has very good technical support. I have emailed him before and always gotten a response. Happy Scanning.

Re: GRE PSR-500 or Pro-106, are these good choices for STARCOM21 ?

To those who have both the Uniden BCD396T and/or the GRE PSR-500 or Pro-106, how do they compare for Starcom 21 reception?

We have six BCD396T in our newsroom and they all seem to have different scanning capabilities, even though they are programmed identically with similar squelch settings. For instance, we can pick up the start of a District 6 transmission on one, but not even hear the tail end of the conversation on any of the other five scanners. The same holds true for transmissions in other bands. They all have to seem their own minds. Does this happen with the GRE PSR-500 or Pro-106?

4485. Your Pro-106

Yahoo group: StarCom21
Date: 2012-07-12 16:55:28 UTC
From: Michael Leoni
Topic: 4468 Message: 4485

Good morning Rob,

Your offer to unload your PRO106 is accelerating my research and acquistion of a receiver since I don't have system keys to program into my two-way radios. There's also a new law on the books that you've no doubt heard about. Anyway, if you think it might be worth while to get on the phone to talk about your PRO106 receiver let me know a date and time you'd like to talk.

I figured I was going to have to wait and save until December to buy a decent receiver for Starcom21. Is your's already set up for that or some other state's system(s)?

Best regards,
Michael

I've been running bearcat scanners for decades, but my local area is transitioning to starcom-21. I even have some old crystal controlled scanners. :)

Dumb newbie questions....

Are these decent choices for a starcom21 scanner ?

Do I need programming software ?

Radio shack is on sale for $349

GRE is about the same

were is the best place to buy these from (cheapest) ?

Thanks in advance
73
Derek

While I'm not a `newbie' to the radio scene, I've been away from it for +10 years, and was wondering what's considered a decent choice, for an all around scanner/receiver, which is compatible with the current / existing formats, as well as a unit that's open to new formats. Mobile/Base preferred.

After going through my current receivers, it's pretty clear that none of them are compatible with any of the digital formats, or trunking systems out there, not to mention the narrowband mandate. I've got a couple of PRO-2006's, an AOR AR3000A & SDU5000 Spectrum Display, a WiNRADiO 1000i, etc

I'd like to get a receiver / scanner on par, with what the position the PRO-2006 & AOR AR3000A once held. Well designed quality receivers, with room for growth. In today's market, that's probably a receiver with a flexible enough design to support software upgrades, while still allowing for compatibility to the old legacy systems (conventional, non-trunked, analog, etc).

Any thoughts

I use a GRE Psr600 and works very well easy to program using radio reference and software.

I guess that all depends...

I've been in the amateur radio hobby since 1991, but I've been an avid radio buff for many years before. SWL, Scanners, & even the Chicken Band (C.B.) at one time.

I've worked in the Food Service & Retail Sales Market, as well as in the Telecommunications Industry. Originally from Northern Illinois, I currently reside in beautiful Central Illinois.

What makes you think, that you know me? My witty sense of humor? ;)

4494. Re: Joliet/Will County - PACE Bus (Will/Cook) - P25 700 Mhz Trunking FCC Applications

Yahoo group: StarCom21
Date: 2012-07-29 20:18:29 UTC
From: dataman60435
Topic: 4492 Message: 4494

Thank You very much for posting this info , looks like Joliet may be going to share a Starcom 700mgz trunk system with "Pace Bus'??....Ron in joliet....PS: Not sure how the additional two freqy licenses are involved....

4495. Re: [StarCom21] Re: Joliet/Will County - PACE Bus (Will/Cook) - P25 700 Mhz Trunking FCC Applications

Yahoo group: StarCom21
Date: 2012-07-29 20:29:29 UTC
From: SC21
Topic: 4492 Message: 4495

Assuming the PACE licenses will be used on the Cook County - South Site

On 7/29/2012 3:18 PM, dataman60435 wrote:

4496. Re: Joliet/Will County - PACE Bus (Will/Cook) - P25 700 Mhz Trunking FCC Applications

Yahoo group: StarCom21
Date: 2012-07-29 22:11:27 UTC
From: dataman60435
Topic: 4492 Message: 4496

It seems that the two "single freqy's 772.64375, 774.23125 trunked also belong strictly to "pace", why are they not associated with the original 5 freqy trunk system?.....Joliet is also suppose to use there now in use 6-800mgz freqys along with these towers, this could prove to be very interesting.....Ron in Joliet

4497. ISP Frequencies *update* ??

Yahoo group: StarCom21
Date: 2012-08-09 01:50:38 UTC
From: starcom21@RadioReference.com
Topic: 4497 Message: 4497

From a RadioReference.com contributor:

Hello:

The correct PL for The Illinois State Police on 155.475 and 155.460 Mhz (Illinois State Police Emergency Radio Network) ans (HF-4) is 110.9, as verified by the ISP FOIA officer with the below list. You have 156.7, so scanners programmed from your database (like my Uniden Home Patrol) do not open up as they are expecting a 156.7 PL, which is not used by the Illinois State Police.

Here is the list of ALL frequencies used by the ISP, state wide and by region, as provided by the Illinois State Police frequency coordinator:

The attached document contains the 150 MHz & 700/800 MHz.
Highband frequencies Statewide usage:
155.475
155.460

NOTE: All Highband District frequencies have 110.9 PL for mobile encode

Region I & II Highband District Frequencies
154.680
154.695
154.920
154.845
154.935
155.520

4498. RE: [StarCom21] ISP Frequencies *update* ??

Yahoo group: StarCom21
Date: 2012-08-09 02:02:02 UTC
From: Cris Hanna
Topic: 4497 Message: 4498

Not sure where the contributor is getting their info from

I hear D11 on ISPERN 155.475 with PL 67.0 and RR reflects the same info

155.46 in every listing I see on RR shows as CSQ

Now there is a listing on RR for ISPERN with a DPL of 156 for narrowbanding

I haven't put that in a scanner to see if they're using it yet.

Cris Hanna

4499. RE: [StarCom21] ISP Frequencies *update* ??

Yahoo group: StarCom21
Date: 2012-08-09 02:12:10 UTC
From: Jeffry Rehm
Topic: 4497 Message: 4499

I only hear ISPERN 155.475 with 67.0 PL from the St Louis area. Never heard of the others.

Not sure where the contributor is getting their info from

I hear D11 on ISPERN 155.475 with PL 67.0 and RR reflects the same info
155.46 in every listing I see on RR shows as CSQ

Now there is a listing on RR for ISPERN with a DPL of 156 for narrowbanding
I haven't put that in a scanner to see if they're using it yet.

Subject: [StarCom21] ISP Frequencies *update* ??

From a RadioReference.com contributor:

Hello:

The correct PL for The Illinois State Police on 155.475 and 155.460 Mhz
(Illinois State Police Emergency Radio Network) ans (HF-4) is 110.9, as
verified by the ISP FOIA officer with the below list. You have 156.7, so
scanners programmed from your database (like my Uniden Home Patrol) do
not open up as they are expecting a 156.7 PL, which is not used by the
Illinois State Police.

Here is the list of ALL frequencies used by the ISP, state wide and by
region, as provided by the Illinois State Police frequency coordinator:

The attached document contains the 150 MHz & 700/800 MHz.
Highband frequencies Statewide usage:
155.475
155.460

NOTE: All Highband District frequencies have 110.9 PL for mobile encode

From: Dave Springer
Topic: 4497 Message: 4501

According to a friend of mine in ISP communications VHF ISPERN, IREACH, & ESMARN will all be gone by the end of the year. IFERN 1 & 2 will remain as narrowbanded channels. Another source in EMS tells me that EMA allegedly will maintain the old low band VHF FM frequencies in narrow band mode in case good old reliable Starcom fails yet again.

4502. RE: [StarCom21] ISP Frequencies *update* ??

Yahoo group: StarCom21
Date: 2012-08-09 03:39:08 UTC
From: Cris Hanna
Topic: 4497 Message: 4502

Dave

If you navigate the ILEAS website that Mike Curtis included a link for, you'll see considerable information on the VHF Channel updates

Now this will cost the state a considerable amount of money to make these modifications (narrow banding and DCS)

Given how strapped the state is for money, it's not likely that would spend that kind of money for something that would be gone in 4 months.

Not sure where the contributor is getting their info from

I hear D11 on ISPERN 155.475 with PL 67.0 and RR reflects the same info

155.46 in every listing I see on RR shows as CSQ

Now there is a listing on RR for ISPERN with a DPL of 156 for narrowbanding

I haven't put that in a scanner to see if they're using it yet.

From: kf9wy@sbcglobal.net
Topic: 4497 Message: 4503

I hear ISPERN 155.475
D11 Collinsville
D13 DuQuoin
D18 Litchfield

Sometimes others.
I program 155.475 into all my VHF ham rigs, with a decent vertical antenna, I hear them much clearer than on the STARCOM21 800mhz freq's.

According to the documents on the ILEAS website, they're adding the DPL to the frequencies in hopes of significantly reducing the issues they're having with the Starcom patchs

VHF ISPERN and IREACH will remain in ISP, at least on the base stations. Thru ILEAS they were able to dig up the money to replace the base stations with narrowband equipment. Once installed they will use D156, at least on receive. AFAIK this does not include mobiles for ISP squads, so they will likely be pulled from most of the fleet by the end of the year.

Until the new narrowband bases are received and installed ISP VHF bases will usually transmit a PL of 67.0 (All or most VHF channels) while mobile transmit a PL of 110.9 on the old VHF backup channels. Mobiles may not transmit PL on ISPERN and IREACH, if they do it is just a programming error.

As for the rest of the VHF network, 155.46 should remain but most or all the rest is going away.

I would program each of these channels as CSQ until all the new base station equipment is installed and we know whether the new bases are transmitting tones and what they are. It wouldn't surprise me if the bases continue to use 67.0 so they don't activate patches to StarCom21.

4506. SC21 TG 4492

Yahoo group: StarCom21
Date: 2012-08-09 22:26:45 UTC
From: scanfan1
Topic: 4506 Message: 4506

Does anyone know who uses SC21 TG 4492? I was listening to Site 101 (DuPage County) today and heard a handful of units (large trucks?) on this TG with UIDs in the 64009x-range taking a trip up either I-55 or I-57 (reference made to a rest area). One unit met another in the Lake Bluff (Lake County) area. Users were fairly laid back. All five users heard on this TG had southern accents (noticeable when you live up north). One unit was still in Southern IL near I-64 and mentioned "the shop" and making the trip on Friday. One unit used an on-air ID of "45".

Per the RR SC21 Wiki, other UIDs in the 640xxx range include the IDOT helicopters. The RR SC21 database page shows TG 4492 as a possible IEMA Zone 3 Ops TG used by 'Nora' units. It also indicates that this is possible link to IDOT and notes use for 'large load escorts'. FWIW, this is one of only a very few times I've noted activity on this TG (via Site 101) since I started using my Home Patrol in Trunked Discovery mode in March of this year.

Thanks...

I've heard a lot of use around Madison County area, usually (as noted) escorting large loaded trucks through areas in Illinois.

The last few days, they have been working around IL-140 and IL-141 (I believe) which is probably in the Alton area, around a construction site.

Unsure still, what it really is.

Don't make fun of our "accents". We's all normal down yonder here, folks.

:)

From: Mike Curtis
Topic: 4506 Message: 4508

The 64xxxx definitely includes IDoT units in the "middle" of the state with possible 640xxx being a statewide designation. The IDoT helicopters (typically heard on the IEMA 1 talkgroup) that I've logged are H-1 (640006), H-2 (640002/640007), and H-9 (640005). I've logged "Mary" units with IDs in the 6400xx range, M-45 being 640095.
644xxx seem to be IDoT District 4 units, 645xxx IDoT District 5, and 646xxx IDoT District 6.
Within the last month or so I picked up one conversation (and only one) between "Traffic 6" (644111) and "Peoria" (649904) talking about a downed stop sign on IDoT District 4A (4478)

I'm guessing that the 640xxx UID range would be all IDOT with no IEMA units thrown in. IEMA has their own UID ranges. Again, just a guess.

I believe that 640095 is one of the unit I noted in use yesterday - this could have been the "45" unit that someone called.

An OLD (1985) IDOT document listing radio call numbers for Springfield IDOT mobile units shows the 'Mary' prefix used by 'Maintenance' personnel and lo-boy trucks. Wonder if that's who we're hearing now.

4510. Need Lots of updates in Illinois

Yahoo group: StarCom21
Date: 2012-08-18 00:54:01 UTC
From: starcom21@RadioReference.com
Topic: 4510 Message: 4510

Howdy Folks...

Many people have known me over the years. I have literally devoted "MOST" of my free-time to the betterment of scanning society for over 15 years, relying on the scanning society in general to help me keep things updated.

I am now 39 years old and been listening to the scanner since around the age of 5 or 6, when we got our first 8 channel Bearcat IV Crystal scanner, listening to a small town area in ISP District 18, Carlinville, Macoupin County.

I work daily with the FCC Website (Applications/Modifications) to provide new information to users. (and update it to the RR DB/Wiki)

Besides CARMA Chicago, I feel I have been one of the most active in keeping things going in the state of Illinois, St Louis Region and Missouri.
I also, along side with Rich/CARMA, helped bring the STRACOM21 information online to scanning community.

/*RadioReference.com Forums*/
Illinois - http://forums.radioreference.com/illinois-radio-discussion-forum/
Metro Chicago -
http://forums.radioreference.com/chicago-metro-area-discussion/

/*Websites*/
It all began in the late 1990s on http://www.ScanIllinois.com
(eventually also http://www.ScanIL.com)
Later I brought in http://www.Starcom21.com (and eventually
http://www.DigitalScanning.US)
(Also w9vey.net, I-warn.com, I-warn.net and many others)

Lately because of (no) funding on web hosting, I have turned off web hosting on all my websites.
Only Facebook pages and Yahoo!Groups now exist. I would like to at least have hosting for my legacy pages and a few I still update regularly

/*Yahoogroups:*/
ScanIllinois - Founded: Jul 9, 2000
STARCOM21 - Founded: Sep 30, 2003
ScanMetroStLouis - Founded: Apr 10, 2006
ScanMissouri - Founded: Jul 4, 2004
MOSWIN - Founded: Jul 7, 2011

/*Facebook:*/
Scan Illinois - https://www.facebook.com/ScanIllinois

STARCOM21 - https://www.facebook.com/groups/Starcom21/
Scan Madison County - https://www.facebook.com/ScanGlenCarbon
Scan Macoupin County - https://www.facebook.com/scanmacoupincounty
Scan MetroStLouis - https://www.facebook.com/groups/ScanMetroStLouis/

I joined RadioReference.com as an admin:
Member Since 2004-03-30 00:00:00

and started converting all my website information there.

I also acknowledge CARMA Chicago for much of my information, as well as
continually updating them with known/updated info.
We WORK TOGTHER. Please don't deny the rest of the scanning community
updates and information by not submitting updates to RadioReference.com
http://carmachicago.com/

STARCOM21, rebanding and narrowbanding have brought a lot of changes to
IL in the last 10 years. Please help!

Thanks very much for your support and continual help
Terry Weatherford, Jr.

Terry, being located in St. Clair County, which is fairly close to your home, not sure what if any help I can be, but I'm happy to provide what I can

I also work in St. Louis County during the week so I get some scanning in there. I also volunteer for the St Louis Chapter of the ARC.

Do you feel like you need responses for St Clair County or is your reception there sufficient to answer your own questions.

Let me know how I can help fill in the holes.

Cris Hanna

Subject: [StarCom21] Need Lots of updates in Illinois

Howdy Folks...

Many people have known me over the years. I have literally devoted "MOST" of my free-time to the betterment of scanning society for over 15 years, relying on the scanning society in general to help me keep things updated.

I am now 39 years old and been listening to the scanner since around the age of 5 or 6, when we got our first 8 channel Bearcat IV Crystal scanner, listening to a small town area in ISP District 18, Carlinville, Macoupin County.

I work daily with the FCC Website (Applications/Modifications) to provide new information to users. (and update it to the RR DB/Wiki)

Besides CARMA Chicago, I feel I have been one of the most active in keeping things going in the state of Illinois, St Louis Region and Missouri.
I also, along side with Rich/CARMA, helped bring the STRACOM21 information online to scanning community.

RadioReference.com Forums
Illinois - http://forums.radioreference.com/illinois-radio-discussion-forum/
Metro Chicago - http://forums.radioreference.com/chicago-metro-area-discussion/

Websites
It all began in the late 1990s on http://www.ScanIllinois.com (eventually also http://www.ScanIL.com)
Later I brought in http://www.Starcom21.com (and eventually http://www.DigitalScanning.US)
(Also w9vey.net, I-warn.com, I-warn.net and many others)

Lately because of (no) funding on web hosting, I have turned off web hosting on all my websites.
Only Facebook pages and Yahoo!Groups now exist. I would like to at least have hosting for my legacy pages and a few I still update regularly

The "Azz" buzz noise is the P25 data sound.

You will need a digital scanner to pick up the frequency, as long as its not encrypted.

Think of it as like the noise you would here on a fax machine or old dial-up modem for your computer.

GRE PSR-900
GRE PSR-900
http://www.universal-radio.com/catalog/scanners/4900.html

The*GRE PSR-900*will offer amazing capability/along with/easy of use.
The expected frequency coverage is: 25-54, 108-136.99, 137-174,
216-512, 764-781.99, 791-798.99, 806-960 (excluding cellular bands) and
1240-1300 MHz. This radio comes with a 2GB SD card preloaded with US and
Canadian public service frequencies. You automatically program your
scanner by merely entering your zip code or city. It handles analog and
digitals systems including APCO 25.

One extremely interesting features of this radio is that theremoteable
head <http://www.universal-radio.com/catalog/scanners/4900pre.jpg>. And
it magnetically fastens the the head bracket! This facilitates vehicle
installation and use. Other feature of this radio include:
Simple menu driven user interface.
Preloaded MicroSD card included.
Easy updating via Internet
APCO P25 Digital
Multi-system analog trunking (Motorola, EDACS and LTR)
CTCSS and DCS subaudible decoder
SAME Weather Alerts
Service search
User upgradable CPU firmware

Spectrum Sweeper

I stopped @ the Huntly Ham fest In Alabama on sunday.
Yeasu Is comming out with a new Digital h/h.
NOT D' star. A product from motorola compadible digital.

More As I find out more.
I also got to play with the new PSR-900.
Very nice scanner, Compatable with the next phase of starcom 21.
S/D card with all of R/R on it, Full recording on any frequency.
More as I get info.
Regards
Bryan

4519. new talk group on tower 101

Yahoo group: StarCom21
Date: 2012-08-23 10:16:43 UTC
From: Robert Klamp Jr.
Topic: 4519 Message: 4519

I am seeing a new talk group, talk group 3242 is affiliated to tower 101 right now. TG 3242 has a radio ID of 250001 at the same time Romeoville Police are affiliated to the same tower using radio ID 250002. Has anybody heard any voice traffic on this TG or any knowledge of what it will be used for? I assume it is being used by Romeoville but I am not sure any insight is very much appreciated.

Thanks for answers,

Bob

4521. Re: PACE SC21 Trunked Apps (new)

Yahoo group: StarCom21
Date: 2012-08-25 13:23:23 UTC
From: dataman60435
Topic: 4520 Message: 4521

Still waiting for the "call letters' for these new systems....

4523. DeKalb

Yahoo group: StarCom21
Date: 2012-08-27 17:57:30 UTC
From: scanfan1
Topic: 4523 Message: 4523

Last week my Home Patrol caught activity on SC21 TG 1907 via Site 101. Although this TG isn't listed in either the CARMA SC21 profile or on Radio Reference, it is just above TGs 1901-1904 TGs listed for DeKalb PD. Active UIDs were in the 72xxx range which are reported to be either DeKalb PD or Sheriff. One of the units (UID 72015) ID'd as "C4" and was requesting a warrants check from his dispatcher (UID 72994). Another unit (UID 72043) made reference to a call at 'the airport'. The only airport I came across in DeKalb County - the DeKalb Taylor Airport - appears to be owned and operated by the City of DeKalb.

Can anyone on the list shed any more light on TG 1907 or SC21 usage by agencies in DeKalb County in general?

Thanks in advance...

4524. SC21 TG 1907 DeKalb PD TG "Special 1"

Yahoo group: StarCom21
Date: 2012-08-28 18:23:44 UTC
From: Kevin O'Rourke
Topic: 4524 Message: 4524

Starcom21 TG1907 was used by DeKalb PD at the city's annual "Corn Fest" this past weekend. The TG was IDd as "Special 1".

Anyone have IDs for DeKalb TGs other than 1901 (PD dispatch, possibly called "Main") and 1904 (reported PD secondary TG w/encryption)? For a city that has been using SC21 for a while now we have very little information on TGs and UIDs in use.

4525. Streamwood Tower

Yahoo group: StarCom21
Date: 2012-08-29 01:01:08 UTC
From: Kenneth
Topic: 4525 Message: 4525

I spun my yagi around to the North today and it sounds like the Streamwood site is up. I don't know if they are just testing but I can hear the site 101 towns just fine now. Living in West Chicago, I think I was on the fringe area of the other towers and was having trouble receiving the Dupage Starcom towns.

4528. Statewide STARCOM21 Drill Tuesday 9/4

Yahoo group: StarCom21
Date: 2012-08-29 18:38:48 UTC
From: mark_hoeny
Topic: 4528 Message: 4528

There will be a statewide STARCOM21 radio drill originating from Springfield starting at 10:30am on Tuesday, September 4th. Unknown which talkgroup will be used but it will likely be a statewide ITTF, etc. talkgroup.

Mark

4529. Re: [StarCom21] Statewide STARCOM21 Drill Tuesday 9/4

Yahoo group: StarCom21

Topic: 4528 Message: 4529

Mark,

I believe that is a regular radio drill/net, 1st Tuesday of each Month.
Believe it is located on the each IEMA region's "B" Channel.

Mike

From: SC21
Topic: 4530 Message: 4530

Reminder, there is a STAGED trunked system in the RRDB. You may not be able to see it.

I know these are current system licenses, usually at power plants, not sure if they are converting to their own system, being linked with SC21 or being linked with the AmerenMissouri P25 system

AmerenMO - http://www.radioreference.com/apps/db/?sid=6851
AmerenIL - http://www.radioreference.com/apps/db/?sid=7116

If anyone has information or connections with anyone at Ameren, can you see what you can find out?

AmerenIL (P25)

System Name: AmerenIL (P25)
Location: Statewide, MO IL
County: Statewide
System Type: Project 25 Phase I (FDMA)
System Voice: APCO-25 Common Air Interface Exclusive
Last Updated: August 29, 2012, 6:37 pm (Changed Site # 103 (Joppa (*need loc)) to 103 (Joppa)

4531. ISP communication consolidation

Yahoo group: StarCom21
Date: 2012-08-30 02:22:10 UTC
From: jburgess1974
Topic: 4531 Message: 4531

I am seeing on radio reference that D10, D14, and D20 should be communicating from D9 now. The districts are still using the same talk groups. I understand that even if all these districts are now dispatched from Springfield that D10 still may not hear D14 or D20 and vice versa unless a district car is hitting a tower in that particular district. My question is though shouldn't all these districts should be hitting towers in Springfield and be able to be monitored on tower 217 and/or 230? I had programmed all talk group A's and B's and ISPERN's from all these districts and was only hearing D9. I may have only been monitoring about an hour but only hearing D9.

No, just because these other districts will be dispatched from a console at D9 does not mean they will be heard on towers in D9. Cars will continue to affiliate with the tower closest to them in their district. The signals will be back-hauled from those towers to the console at D9 instead of being routed to their district console. It's a process of switching and wiring that is probably not normally "monitorable" in the field.

That's my understanding, anyway. Michigan operates that way. They back haul signals from towers all over the state to only about 4 dispatch centers. It doesn't change what the cars (or the scannists) can hear.

To properly understand a networked system like StarCom21 and its use by ISP one needs to separate Talkgroups from the towers that carry them.

Talkgroup activity on a given tower is governed by location of the mobile or portable radio (called the Subscriber) and not the dispatch point. If a radio is active in an area that that tower will carry the communications pointed to it, regardless of the location of the dispatch center.

State Police dispatch centers are connected by microwave, phone lines or fiber to a central controller for StarCom21 and activate whatever talkgroup they need, but the towers the controller (which is a computer) chooses are based upon the subscriber's location(s). If the dispatcher in Springfield is talking to a car in DuQuoin the tower(s) that carry that transmission are located near DuQuoin. If there is also a car in Springfield that is on the same talkgroup then a Springfield area tower will hear it.

Scanners do not possess the capability of causing towers to activate talkgroups, so one may never hear a conversation unless a system radio is in the area. Subscriber radios "affiliate" with StarCom21 towers and that causes the system to know the proper towers to direct communications to.

http://www.thetelegraph.com/news/local/article_1366ea56-f2d3-11e1-85ed-0019bb30f31a.html

EDWARDSVILLE - Police were questioning two people Thursday afternoon after taking them into custody, at gunpoint, in connection with a pair of bank robberies earlier in the day in Edwardsville and Collinsville.

Collinsville police followed and stopped a white Lincoln Town Car with a white female driver and a white male passenger about 3:35 p.m., according to Illinois State Police broadcasts. The location was Troy Road at Meyer Road, just north of Interstate 55, in Maryville. Broadcasts said the couple was wanted in connection with the robberies.

Police began the search about 1:33 p.m. Thursday after a man robbed the U.S. Bank location inside the Schnucks store in Edwardsville. Within an hour, a second, similar heist took place at the U.S. Bank at the Schnucks in Collinsville.

In the first of the incidents, a man with Band-Aids on his fingers robbed the U.S. Bank at 2222 Troy Road and left on foot from the north exit of the store.

The second robbery was reported less than an hour later at 501 Beltline Road, Collinsville. The robber left by way of the store's floral department.

The description of the suspect was very similar in both cases.

Police alerts described the man as white, wearing a burgundy Salukis cap, dark-colored sunglasses, a long-sleeved denim or blue shirt and blue jeans. He was said to be 5 feet 10 inches tall and weighed about 235 pounds.

Rich is totally accurate, when D12 comms went to D13, we didnt start receiving D22 which also went to 13. Nothing is gained by the consolidations as a listener anyways, with the exception of new voices, and dispatcher confusion as to location.

From: Jeffry Rehm
Topic: 4531 Message: 4538

Speaking of dispatcher confusion, I also am concerned that there will be mishaps with dispatchers that are not familiar with locations in districts they are not used to dispatching.

I understand that Dist 11 has not (yet?) switched but about two weeks ago early one morning there were what sounded like two new dispatchers at Dist 11 trying to relay info on a homicide out of Cahokia. They sounded very aprehensive and at times confused about what/where they were talking about.

In no way am I saying it was bad dispatching, I am saying you could obviously tell it was a new voice. Whether it was a new dispatcher or one that was transfered to a new dist, I'm not sure.

I too am of the opinion that a dist that is as busy as dist 11 should be left alone similar to dist Chicago. Just way to busy. My opinion of course.

4539. Frequency problems

Yahoo group: StarCom21
Date: 2012-08-31 04:50:16 UTC
From: Rock
Topic: 4539 Message: 4539

Dixon, Il City Police changed their frequency to 151.2125 with the input being 156.06 that's P25. First, how does that frequency work if it's P25? Secondly I was also told that I needed a scanner that has NAC decoding to even hear the frequency. Is this true as well? I've had many different answers and can't seem to get the correct answer. Can somebody help me?????

No, you do not need a scanner with NAC decoding, just one that does digitial. Uniden 396XT, 996XT, HomePatrol-1, etc or the GRE digital units, or even units like an AOR with a P25 board in it will work :)

Mike is correct, u only need a digital scanner, set the freqy to P25 if its a GRE/RS scanner and it will "search the NAC just like a PL or DCS....Uniden has a menu just about the same as u program in the 151.2125 like a normal freqy and set it to "Digital Only".....

From: Fred Fred
Topic: 4543 Message: 4543

I finally bit the bullet and bought a pro-106 on sale today and got a surprise.. My old scanner (pro2096) quit picking up ISP some time ago when they went to 700MHZ. Well I put the 700 Mhz freqs from radioreference into the new 106 and haven't heard a peep. Did a "search" on the new 106 and heard p25 control signals on 851.9125 and 852.350. Put those into the new 106 and hearing all kinds of ISP. So I decide to put those freqs into the old 2096 and hearing things fine on it now. Starting to wonder if i spent $300 for nothing? Can anyone shed light on this - do you think it is temporary? Thanks a lot
Ed

There are both 700 and 800 MHz. sites on StarCom as well as some sites with both. Some sites will change one way or the other as the system matures further.

You did the right thing by upgrading.

4546. live audio feeds on RadioReference.com to a new entity called Broadcastify.com.

Yahoo group: StarCom21
Date: 2012-09-10 21:55:13 UTC
From: starcom21@RadioReference.com
Topic: 4546 Message: 4546
Attachments: 1 described; binary payloads are missing from this source WARC

If you want to reply, see pics or view the forum post:
http://forums.radioreference.com/community-announcements-news/248711-coming-soon-broadcastify-com.html

---

I'm pleased to announce that on October 15th, 2012, we will be spinning off the live audio feeds on RadioReference.com to a new entity called Broadcastify.com. This will allow us to better focus RadioReference.com on it's core service, to be a reference source. Broadcastify will provide a stand alone entity to focus on the live audio feeds. You can see what the site will look like via the attached screenshot.

Again, the launch of this new site is scheduled for October 15th, 2012.

In addition to spinning off the live audio platform to a stand alone entity, we will be releasing new features and functionality to the broadcastify live audio platform. The below bullet points outline some of those updates and changes from what we have existing on RadioReference.com:

* 180 days of archives for all regular feeds
* 365 days of archives for official feeds
* Official feeds will have access to audio trimming capabilities
* Notable incidents section for storage of interesting audio archives
* Revamped feed alert system

Premium Features ($6.95/month)

* Access to feed archives
* customized player page for managing favorite feeds
* Email and SMS alerting for listener counts, feed alerts, and other user defined criteria
* No advertisements
* Unlimited listening times on the Web players

== Transition ==

Existing premium subscribers on RadioReference.com will have their subscriptions extended to Broadcastify for the term that they paid for on RadioReference.com. Meaning, if you paid for 180 days of a premium subscription on RadioReference.com and you have 120 days left, you will be automatically granted a 120 subscription on Broadcastify. New premium subscribers and renewals will be billed at a monthly rate of $6.95/month. Feed providers will ALWAYS receive a free premium

subscription on Broadcastify.com, however they will no longer receive a free premium subscription on RadioReference.com. We will provide a complimentary 90 day RadioReference.com subscription to every active feed provider after the transition is complete on 10/15.

Also note that we will not have a "premium feed broadcaster" offering, rather we will incorporate most of those previously announced features into the regular broadcasting platform on broadcastify for all providers, free of charge.

When the transition occurs, broadcasters will not have to change anything on their end - everything will automatically transition over to the new Broadcastify servers. Mobile apps, remote Web players, relays, etc will also not have to be immediately changed and will continue to function normally when the changeover is complete.

Exciting times are ahead for Broadcastify and Radioreference and I'm thrilled to be making these announcements to the community today!

Warm regards,

Lindsay

4549. Fwd: Announcing Broadcastify.com - Launches 10/15/2012

Yahoo group: StarCom21
Date: 2012-09-26 16:28:50 UTC
From: starcom21@RadioReference.com
Topic: 4549 Message: 4549

Dear Feed Broadcasters,

I'm pleased to announce that on October 15th, 2012, we will be spinning offthe live audio feeds on RadioReference.com to a new entity called Broadcastify.com. This will allow us to better focus on RadioReference.com and it's core service, to be a reference source. Broadcastify will allow us to have a stand alone entity to focus on the live audio feeds. You can see what the site will look like via the screenshot at the link below.

http://www.radioreference.com/bcfy.jpg

In addition to spinning off the live audio platform to a stand alone entity, we will be releasing new features and functionality to the broadcastify live audio platform. The below bullet points outline those updates and changes from what we have existing on RadioReference.com:

* Broadcasting and listening will continue to and always be free
* 180 days of archives for all regular feeds
* 365 days of archives for official feeds
* Official feeds will have access to audio trimming capabilities
* Notable incidents section for storage of audio archives
* Revamped feed alert system

Premium Subscriber Features ($6.95/month)

* Access to feed archives
* customized player page for managing favorite feeds
* Email and SMS alerting for listener counts, feed alerts, and other user defined criteria
* No advertisements
* Unlimited listening times on the Web players

We have a question and answer thread in the live audio forums that answers a number of existing questions we have received since the announcement:

http://forums.radioreference.com/live-audio-feed-administration/248932-broadcastify-questions-answers.html

== Transition ==

When the transition occurs, broadcasters will not have to change anything on their end - everything will automatically transition over to the new Broadcastify servers. Mobile apps, remote Web players, relays, etc will continue to function normally when the changeover is complete. We plan to have redirects in place on RadioReference.com for a good amount of time after thetransition on 10/15/2012.

Also note that we will not have a "premium feed broadcaster" offering, rather we will incorporate most of those previously announced features into theregular broadcasting platform on broadcastify for all providers, free of charge.

Feed providers will ALWAYS receive a free premium subscription on Broadcastify.com, however they will no longer receive a free premium subscription onRadioReference.com. We will provide a complimentary 90 day RadioReference.com subscription to every active feed provider after the transition is complete on 10/15.

Existing premium subscribers on RadioReference.com will have their subscriptions extended to Broadcastify for the term that they paid for on RadioReference.com. Meaning, if you paid for 180 days of a premium subscription on RadioReference.com and you have 120 days left, you will be automatically granted a 120 subscription on Broadcastify. New premium subscribers and renewals will be billed at a monthly rate of $6.95/month.

Exciting times are ahead for Broadcastify and Radioreference and I'm looking forward to the launch on 10/15.

Warm regards,

Lindsay

4550. TG 5247 On StarCom

Yahoo group: StarCom21
Date: 2012-09-27 16:47:16 UTC
From: Mike Curtis
Topic: 4550 Message: 4550

Yesterday I saw an affiliation on T231 (Congerville) for TG 5247 by radio ID 440305. I have no clue on either of these except the radio ID of 440xxx is just past 439xxx (another unknown group to me) who had a bunch of radios affiliate with ILEAS in October of last year. It could be another state agency or someone else in central IL is moving to StarCom.

4551. Statewide Starcom21 Net This Morning

Yahoo group: StarCom21
Date: 2012-10-02 14:28:00 UTC
From: Kevin O'Rourke
Topic: 4551 Message: 4551

There will be a statewide Starcom21 open net conducted by Illinois RACES this morning between 1000 and 1200. Although the exact talkgroup name was never mentioned during the DuPage County directed net this morning, this usually takes place on a statewide talkgroup (possibly on the IESMA S/W TG30328?).

Drill is happening now on TG30302. Under the old interop template this
was the ITTF "ZONE 3" talkgroup - under the new interop template it is
ITTF "SOUTH A" talkgroup. I'm counting on this old template/new
template issue causing confusion.

Both the Region 3 Test and the State RACES tests heard today in Madison County, I believe there was another one going on at the same time as the ITTF R3 Test.

Great nets today.

Picked up tons of SC21 Radio ID's (and Identified them)

And it was fun hearing the "northerners" from Winnebago County almost sound like they were from Wisconsin.

:)

Hi,

Sorry if this is a newbie question ... to be able to pick this up, do I need a digital trunking scanner?

I have been trying to use two ultra-cheap SDR dongles, SDR♯, UniTrunker, etc with limited success just to play around with this but ultimately it ties up too many resources to be practical.

I am located in Lincoln, which is between Springfield and Peoria, would I be able to pick some of this stuff up with the correct scanner and an outdoor antenna?

I believe that the first Tuesday morning of the month is the regular time for many (if not all) of the ITTF regional directed nets. Illinois RACES Springfield (the net control station for the statewide net) said this a biannual net, so I'm guessing that the next one will be conducted on the first Tuesday morning of next April.

As far as Winnebago County goes, they're just south of the "cheddar curtain" for cripes sake (don't 'cha know).

Dave,
Yes, you need a digital scanner; and, yes, if you had one you would be able to monitor the statewide test even with the simple rubber ducky antenna.

ISP District 18 ISPERN Patch on SC21 has been stuck (off and on) on something.

Most of the time, it is just noise, but one time heard paging tone-outs and then a dispatcher announcing a call for Lincoln County Fire/Rescue.

Did not hear this on D11 ISPERN Patch

In most cases you will see a significant improvement on 700 and 800 MHz digital and analog systems with this base station beam antenna. The antenna is especially useful for improving reception when monitoring simulcast or multicast systems where strong signals from two or more sites are causing interference with one another. By aiming this antenna at one site you can often negate the effects other simulcast sites.

<http://www.policescanners.net/mmccatalog/274-j55-43768-78933/>*Indoor

700/800 MHz Yagi Directional Antenna with Desk Stand*
<http://www.policescanners.net/mmccatalog/274-j55-43768-78933/>
Reg. $89.95 /*- Sale $69.95*/

For those who are able to mount the antenna outdoors that's usually the best way to go; however, if you are in an apartment or condo or just can't mount an outdoor antenna on your home, with the included simple stand system that we have created you can easily place the antenna on a desk or shelf and aim the antenna in different directions until the signal improves and interference decreases. The stand is made of wood and PVC and will not affect or deflect the signals in any way.

With 15 elements and 13db of gain this antenna most importantly has a 30 degree beam width making it perfect for aiming at one transmitter while helping to negate the affects of a transmitter located out of the beam. This TerraWave antenna is designed for transmitting between 824 and 960 MHz but for receive purposes it works well done to 740 MHz. The antenna weighs only 3 lbs. and includes a 12 inch pigtail with an N-connector. Included in the special stand package is an N to BNC adapter and a 6' jumper cable for extra length to bring the signal to your scanner.

4563. DeKalb PD - ITTF Reg 3B

Yahoo group: StarCom21
Date: 2012-10-13 02:36:17 UTC
From: Jarrod Cook
Topic: 4563 Message: 4563

Hearing what sounds like DeKalb PD using ITTF RGN 3B for dispatching tonight, on T237 (Peoria). Not sure if it's being patched over or direct. Anyone know why?

Hearing this again tonight for some reason. Also hearing traffic on RGN 2B. It's law enforcement, but they're talking to a "command post" on occasion.

It appears to be related to NIU's homecoming weekend. There are several
outside agencies coordinating communications and responses...

4569. Illinois System Type?

Yahoo group: StarCom21
Date: 2012-10-16 12:46:57 UTC
From: Joe Albergo
Topic: 4569 Message: 4569

Good morning everyone, I would like to day thank you to the moderator for allowing make to join. I also look forward to eating the digest.

I have a question, when I program the Starcom21 into my BDC396T do I set it up as a P25 SYSTEM?

I am getting encrypted traffic only and can't seem to catch anything else on the air?

Any comments would be appreciated...

Thank you,

Joe Albergo

Are you trying to do this on the manually (on the face of the scanner)?

Or are you using software and importing from Radio Reference?

Topic: 4569 Message: 4574

Joe,

Several of your replies have come directly to me by email

I don't reply to direct messages

Your messages today, on the yahoo group board, had to be approved before they could show up.a Moderator is not always available to do that quickly.

To answer your original question, the system must be programmed as a P25 system.

The easiest method is to do this via imports from Radio Reference, in to any of the scanner programming software.

This is the third time I've tried to respond to you.

For some reason even though it shows I make a post - it doesn't show up.

My answer is that "No, not doing this manually, I am programming it using the BCD396T USAD software.

I'm not familiar with the USAD and sold my 396 XT about a year ago

Are you manually entering the data into the software, or are you importing
from Radio Reference?

4578. IDoT District 5 On StarCom

Yahoo group: StarCom21
Date: 2012-10-23 17:22:21 UTC
From: Mike Curtis
Topic: 4578 Message: 4578

While running out of the office this morning, I caught traffic on IDoT Dist 5A (TG 4480) between an IDoT dump truck and several other IDoT units after it was rear-ended by a pickup. I've read previously where IDoT was planning on staying on VHF-Lo so are you guys picking up other IDoT districts on StarCom? Will everybody in IDoT eventually move to StarCom? I haven't heard a peep from Dist 3 units up by me other than the odd supervisor-type using it.
Thanks!

Had a chance to run Pro96Com against T113 (Will), T125 (Grundy), and T134 (Ottawa) today and none of them are showing any new neighbors. I'll be out and about tomorrow headed towards Chicago so I'll let you know what I find.

Looking back in my logs, T150 is showing up for T102 at least as early as October 6th,

Sycamore PD's 155.640 repeater is patched to SC21 ITTF Region 3B TG30306 (patch using UID 410277) for the Sycamore Pumpkin Run 10,000 meter road race this morning. I've yet to observe any SC21 radios using the patch to work the Sycamore PD units. Anyone know who uses UID 410277?

Mark

4585. CARMA Meeting Saturday, November 3

Yahoo group: StarCom21
Date: 2012-10-31 11:31:43 UTC
From: Rich Carlson
Topic: 4585 Message: 4585

Please join us this Saturday, November 3, 2012 at Phillies Pizza, 63rd & Kingery Hwy in Willowbrook. Doors open at 11:00 AM, and the meeting starts at 1:00 PM.

Please park on the west side of the building.

All are welcome, just please buy lunch. If you want to buy someone else's lunch too that is even better!

I will also be accepting donations to our Christmas gift for Marion at the meeting. Please be as generous as she has always been!

4586. 2013 CARMA Event Schedule

Yahoo group: StarCom21
Date: 2012-11-05 12:23:48 UTC
From: Rich Carlson
Topic: 4586 Message: 4586

Here is the official 2013 CARMA Event Schedule. Dates can change, we will announce any changes on the website (www.carmachicago.com), thru the email list and on the Illinois Forum on RadioReference (http://forums.radioreference.com/illinois-radio-discussion-forum/)

Regular Meetings (Saturdays at 1:00 PM, doors open at 11:00 AM at Phillies Pizza in Willowbrook)

January 5, 2013
March 2, 2013
May 11, 2013 (Note date change to accommodate the venue)
July 13, 2013
September 7, 2013
November 2, 2013

Friday Nighters are usually held at the Irving Park Oasis above the Tri-State Tollway at about 7:00 PM. Totally informal and non-structured, it is a way to hob-nob with the guys and talk radios. If we change locales or have a program we will let you know on the same forums.

December 7 2012
February 1, 2013
April 5, 2013
June 7, 2013
August 9, 2013
October 4, 2013
December 6, 2013

The Chicagoland Emergency Vehicle Show is the first weekend in August, watch for more announcements.

The occasional CARMA Picnic is to be announced...

4596. 2013 WCRA Hamfest

Yahoo group: StarCom21
Date: 2012-11-25 00:32:16 UTC
From: Richard Bauer
Topic: 4596 Message: 4596

The 2013 WCRA Mid-Winter Hamfest will be held at the Kane County Fairgrounds Exposition Center in St. Charles, Illinois on Sunday, January 20, 2013. This is the same location as last year! Please note that this is one-week earlier than usual.

We're planning a great hamfest that will include the usual flea market and commercial vendors but also several interesting and informative breakout sessions, on-site VE Testing, hourly prizes and more! Hamfest hours are 8am to 1pm and there will be plenty of FREE parking.

Anticipated forums are:

. Jim O'Connell, W9WU - Amateur Radio & The Law
. Dale Kwarta, NJ9E - Go Kit Radio in a Box
. Mark Thompson, WB9QZB - D-Star Update

Flea market tables may be reserved in advance and are $25, $35 with electricity. Day-Of tables, if available, will be $30, $40 with electricity. Everyone at your table must have a hamfest admission ticket. Advance admission tickets are a bargain at $8 each and include four prize stubs! Day-Of tickets will be $10 and have only one prize stub. Children under 12-years of age are admitted free. Advance tickets can be purchased by mail. Send a self-addressed, stamped envelope plus your check or money order made out to WCRA Hamfest to:

WCRA Hamfest
PO Box QSL
Wheaton, IL 60187-1055

Your order must reach us no later than January 7, 2013 to ensure timely delivery.

General questions about the hamfest? Call us at (630) 604-0157 or via e-mail at info@... . Ticket questions should be directed to me. N9DKO@... .

Thanks and we hope to see you at the hamfest!

'73,
Rich, N9DKO

4597. SC21 TG 1857 - Freeport Memorial?

Yahoo group: StarCom21
Date: 2012-11-28 22:43:40 UTC
From: Mike Curtis
Topic: 4597 Message: 4597

Last week while in Rockford, I caught traffic on T111 on TG 1857 between "Switchboard" (RID 70206) and "Security" (RID 70200) with Security being needed in the ER immediately. Based on the talkgroup and radio IDs and my limited knowledge of Stephenson County, I'm guessing this is Freeport Memorial in Freeport :)

4598. Trooper Kyle Deatherage - "10-42" ISPERN Broadcast ("Video")

TROY -- Hundreds of law enforcement officers and other mourners paid
tribute Saturday to an Illinois trooper who was struck and killed by a
passing tractor-trailer during a traffic stop this week. Kyle
Deatherage, of St. Jacob in southwestern Illinois, was honored at a
funeral service in a high school gymnasium decora
ted with dozens of floral arrangements and photo boards. Paying tribute
to the trooper, the Rev. Larry Chute said, "Thank you doesn't cut it."
Deatherage, 32, was killed Monday morning on Interstate 55 near
Litchfield. He had been a member of the Illinois State Police since May
2009, and leaves behind a wife and two young children, the Belleville
News-Democrat reported. His family released a statement thanking the
community for their support and urging people to watch for emergency
safety workers when driving. "Our lives will be forever changed as we
remember the great husband, father, brother, son, and friend that Kyle
was," the family said. "However we would like everyone to recognize the
vital and dangerous role that officers play in keeping us safe. We ask
that as we use our roadways, please practice safe driving and be aware
of our emergency safety workers." His older brother, Kenneth, drew
laughter at the funeral as he shared memories. He recalled an unusual
fascination Deatherage had since childhood with the bright, flashing
construction lights his father collected and brought home from his work
on the railroad. The young Deatherage decorated his room with them and
let them flash all night. Kenneth Deatherage also told about a Halloween
night when his brother was a Madison County deputy. Kyle Deatherage

parked at the end of his brother's driveway in his squad car and flashed the lights and sirens at teenagers who were going to cover his brother's trees with toilet paper. "It was awesome!" Kenneth Deatherage said. "Sorry, Sheriff!"

From: Kevin O'Rourke
Topic: 4598 Message: 4599

A very fitting and touching tribute by both the Illinois State Police and yourself, Terry. What a shame that it takes an incident like this for the rest of us to stop and appreciate those public safety workers who walk out the door each day not knowing if they'll return safely to their homes and families at the end of their shifts.

Trooper Deatherage paid the ultimate sacrifice while trying to keep the roads safe for the rest of us.

Thanks for sharing the link.

4600. WCRA 2013 Mid-Winter Hamfest

Yahoo group: StarCom21
Date: 2012-12-10 15:50:31 UTC
From: Richard Bauer
Topic: 4600 Message: 4600

The 2013 WCRA Mid-Winter Hamfest will be held at the Kane County Fairgrounds Exposition Center in St. Charles, Illinois on Sunday, January 20, 2013. This is the same location as last year! Please note that this is one-week earlier than usual.

We're planning a great hamfest that will include the usual flea market and commercial vendors but also several interesting and informative breakout sessions, on-site VE Testing, hourly prizes and more! Hamfest hours are 8am to 1pm and there will be plenty of FREE parking.

Anticipated forums are:

. Jim O'Connell, W9WU - Amateur Radio & The Law
. Dale Kwarta, NJ9E - Go Kit Radio in a Box
. Mark Thompson, WB9QZB - D-Star Update

Flea market tables may be reserved in advance and are $25, $35 with electricity. Day-Of tables, if available, will be $30, $40 with electricity. Everyone at your table must have a hamfest admission ticket. Advance admission tickets are a bargain at $8 each and include four prize stubs! Day-Of tickets will be $10 and have only one prize stub. Children under 12-years of age are admitted free. Advance tickets can be purchased by mail. Send a self-addressed, stamped envelope plus your check or money order made out to WCRA Hamfest to:

WCRA Hamfest
PO Box QSL
Wheaton, IL 60187-1055

You can download the hamfest flyer/ticket order form here:
<http://wheatonhamfest.org/flyer.pdf>

Your order must reach us no later than January 7, 2013 to ensure timely delivery.

General questions about the hamfest? Call us at (630) 604-0157 or via e-mail at info@... . Ticket questions should be directed to me. N9DKO@... .

Thanks and we hope to see you at the hamfest!

From: fcvpi99
Topic: 4601 Message: 4601

hello all been out of the scanner hobby for a few years .. getting my Pro 96 back up and running now a few questions on rebanding

this is my scanner
bank
0 site 111 Starcom Rockford City
1 Site 111 Starcom Winnebago County (hear more from VHF then starcom)
2 Site 148 Boone County and City
3 CommEd 900 MHZ system
4 NWCD analog
5 Elgin CUSTOM RE-BAND TABLE
6 Ducom VHF/UHF system (old)
7 Ducom Starcom 700Mhz (New)
8 NWCD Schumburg
9 Starcon System - Sites have CC and 2 Alt CC each with a empty channel inbetween them (used for ISP)
(site 101, 108, 111, 115, 120, 126, 146, and 148

does Starcom need custom tables?? i programed the sites with the current CARMA profile freqs from October 2012
and if i do have to do custom table how will that work with my bank9 that has mutipule starcom sites

also what is the custom table i should use the 3600CC has a rebanded 800 selection the 9600CC doesnt

4602. New IDOT snowplow talkgroups

Yahoo group: StarCom21

From: citrus801
Topic: 4602 Message: 4602

With the storm passing through yesterday, what new talkgroups being used by snowplows?

These were new for this year (heard from the Normal site):
4480 Bloomington and Towanda Yards, Leroy also...Paris dispatch can also communicate with them
4488 Clinton

4603. Re: [StarCom21] New IDOT snowplow talkgroups

4607. CARMA Meeting January 5

Yahoo group: StarCom21
Date: 2013-01-02 13:00:16 UTC
From: Rich Carlson
Topic: 4607 Message: 4607

Please join us for the next CARMA Meeting on Saturday, January 5, 2013 at the usual Phillies Pizza, IL-83 (Kingery Hwy) and 63rd Street in Willowbrook, IL.

Doors open at 1100 and the meeting starts at 1300. Please remember that you must buy lunch and you are welcome to buy someone else lunch if you please. The food and service is great and the companionship is acceptable.

Please park west of the restaurant, not in front. They get a lot of in-out traffic on Saturdays and we tend to stay longer than the regular lunch crowd.

145.770 (PL 151.4) is talk-in for those so licensed.

See ya there!

--
Rich Carlson, N9JIG

4610. Wooden L-Shaped Radio Desk (Free)

Yahoo group: StarCom21
Date: 2013-01-06 23:12:14 UTC
From: Richard Bauer
Topic: 4610 Message: 4610

offered as a freebie is a nice, wooden L-shaped office desk. the main desk is 66" wide x 30" deep x 29.5" tall. the return (left side) measures 46" long x 17" deep x 25" high. the main desk as two drawers on the right side; the return has a single storage area with a shelf. the desk is in overall OK condition. there are some scratches and blemishes on the surface. the drawers on the main desk have a lock but there is no key. this would make a very nice radio desk. I'm using a very similar desk for just that purpose.

the desk is in three pieces, is heavy and you'll need your own nuts and bolts to put it together. the finish is a darker walnut. bring a van or a pickup and an extra pair of hands.

if interested please reply via e-mail. we're in wheaton by the fairgrounds.

4616. Illinois FCC Applications / Modifications 2/2 - 2/16

Yahoo group: StarCom21
Date: 2013-02-16 17:08:13 UTC
From: starcom21@RadioReference.com
Topic: 4616 Message: 4616

Hello All..

I've been doing a new job for the last 4+ months, where I am gone from home during the week, traveling in central/north central Illinois.

I have been documenting a lot of notes scanning along the way.. investigating and updating RadioReference.com

I have been getting behind on FCC Applications at time (Sending out and added notes to RadioReference.)

I have finally got my (Thunderbird) email set up properly on my laptop and will be sending out more emails to yahoo groups and updated facebook groups a little more often, hopefully.

Enjoy and thanks for the support!
Terry Weatherford, WX9SAR (formerly N9MAE)
RadioReference.com Admin for MO, IL, MI

5 other agencies get upgrades to current equipment

4618. Re: [StarCom21] Illinois FCC Applications / Modifications 2/2 - 2/16

Yahoo group: StarCom21
Date: 2013-02-18 09:51:00 UTC
From: Michael Dickerson
Topic: 4616 Message: 4618

So do I read the Richland County, Illinois modification request correctly their application to go to P25 was dismissed? Because they are already operating P25!

4619. CARMA Meeting Saturday

Yahoo group: StarCom21
Date: 2013-02-27 17:14:43 UTC
From: Rich Carlson
Topic: 2962 Message: 4619

It is that time of the month again!

The regular CARMA Meeting is this Saturday, March 2 at Phillies Pizza, 63rd & Kingery Highway in beautiful downtown Willowbrook.

Please remember to park on the west side of the building, not the front.

Doors open at 11:00 for food, fellowship and frivolity. The meeting starts at 1:00. Remember that you have to buy lunch.

Feel free to bring handouts and sale or giveaway items!

See ya then!

--
Rich Carlson, N9JIG

4620. Bunch of New SC21 TGs - 5491 - 5504

Yahoo group: StarCom21
Date: 2013-03-05 13:27:22 UTC
From: Mike Curtis
Topic: 4620 Message: 4620

During the last couple of snow events, on T231 (Congerville) and T229 (Normal), I've been hearing snow plow operations on TG 5492. No unit numbers were mentioned, just first names. They have mentioned areas like "Oak Dale" and "Prarie Land" as well as making sure the bus lots and the front of "the school" were cleaned.

Today, on T229 I saw a bunch of affiliations on 5492, 5493, 5495, 5497, 5498, and 5504 with radio IDs in the 451xxx range.
Any ideas on who these could be?

4621. 4635 encrypted

Yahoo group: StarCom21

From: N2DUP@...
Topic: 4621 Message: 4621

Any idea why they would be encrypting this talkgroup today?

4635 121b E EMS Region 2 EMS Region 2 [EMS R2] Hospital Illinois
Department of Public Health (IDPH)

I recognize the need for possible encryption because of HIPAA, but isn't
this just a hospital to hospital link on STARCOM?

It's active now.

This is referred to as Clear Talk, as the message goes to the intended, as time goes on due to a lot of agency's using the NIMS methods you will hear more doing this. DOT as I have heard don't have certain drivers assigned to just one truck.

Would guess the Hospitals are sending patient info via the system. Some a cutting cost by doing this instead of via a network system, just my guess

Actually, it sounded more like a net ... there was a lot of activity, not sporadic. I don't see a reason for encrypting for a typical STARCOM21 net.

4625. ISP District 14

Yahoo group: StarCom21
Date: 2013-03-06 14:07:32 UTC
From: N2DUP@...
Topic: 4625 Message: 4625

Since ISP District 14 Macomb has been dispatched by Springfield, I often hear District 14 cars on both the District 14 and District 20 talkgroups. Are they simulcast? Do they switch back and forth? I haven't been able to figure out why.

It sounds like it might be Unit 5 Schools in Normal. Oakdale and Prairie Land are schools here.

Tim

They have mentioned areas like "Oak Dale" and "Prarie Land" as well as making sure the bus lots and the front of "the school" were cleaned.

4627. RE: [StarCom21] 4635 encrypted

Yahoo group: StarCom21
Date: 2013-03-06 15:54:12 UTC
From: Scott W. Lowry
Topic: 4621 Message: 4627

According to the information I have, all of the IDPH EMS Regional Talkgroups (Regions 1 - 11, TG's 4634 - 4644) are programmed for full-time encryption. All other IDPH talkgroups have user-selectable encryption.

Subject: Re: [StarCom21] 4635 encrypted

Actually, it sounded more like a net ... there was a lot of activity, not sporadic. I don't see a reason for encrypting for a typical STARCOM21 net.

Would guess the Hospitals are sending patient info via the system. Some a cutting cost by doing this instead of via a network system, just my guess

That would make sense. The whole school district was supposed to get StarCom radios. See this post: http://forums.radioreference.com/illinois-radio-discussion-forum/258054-bloomington-normal-schools-starcom21.html

McHenry County is in IDOT District 1. SC21 TGs 1401-1406 are IDOT District 1A-1F. TGs 1411 & 1412 are IDOT Detail 1A & 1B.

With that said, however, I am aware of no plan for District 1 to switch their daily operations to SC21. In fact, they plan to move to conventional P25 repeaters. The plan, as I understand it, is as follows:

453.1500 - Emergency Traffic Patrol (ETP/"Minutemen") Primary
453.1875 - South Primary
453.2000 - Northeast Primary
453.2375 - Central Primary
453.3000 - Expressways Primary
453.4000 - Kane County Primary
453.4875 - McHenry County Primary
453.7000 - Admin Primary

NAC code has been reported as 151 and testing has been noted. No word on a timeline for changeover to P25 so far.

Hope this helps,
Mark

4634. Metra Police Starcom21 Talkgroups

Yahoo group: StarCom21
Date: 2013-04-08 18:53:05 UTC
From: mark_hoeny
Topic: 4634 Message: 4634

Just before 10 this morning I heard "Charlie 2" (UID 92002) calling "Control" for a radio test on SC21 TG 2992. Around noon I again heard "Charlie 2" testing multiple radios with "Control" on SC21 TG 2991. UIDs were in the 92xxx range with "Control" being UID 92150. After these tests, I heard "Control" call "967" (no reply heard). I then listened to 160.605(146.2) and heard Metra Police "Control" call "967" and (I think) "Charlie 2".

My guess is that 2991, 2992 and 2993 are the three new Metra Police talkgroups that have been discussed recently on the CARMA Yahoo Group. This traffic was heard on Site 101 (DuPage County).

You will find your local IDOT COMM's on the channel listed below, but remember IDOT only services/clears state roads. And unfortunately McHenry County went the way of cook county and Joliet encrypting everything government related up to and including street sweepers so your local road maintenance and construction channels used by the county will probably not be able to be monitored.

That should be the freq you'll hear IDOT units in your area on once they make the switch to P25. In the mean time, give 151.100 a listen (until it goes silent).

Yep Mc Henry co is handled by the Woodstock yard unit # 270 -299 are on 151.100. A new tower is being built there to support 453.4875 (as well as a new starcom site also) so it is not on the air yet. 453.4875 will be primary for them and starcom will be a backup for all IDOT D1 453 freqs

4639. Pontiac Correctional Center now on Starcom21

Yahoo group: StarCom21
Date: 2013-04-21 02:17:47 UTC
From: citrus801
Topic: 4639 Message: 4639

The old 623C system is no longer on-the-air. All frequencies are now in use on Starcom21 Site 207. Starcom21 TG's in the 5260s appear to be used at Pontiac Correctional Center however all those TG's are encrypted.

The encrypted talkgroups I heard on Site 207 today were:
5251
5260
5264
5265
5266
5267

If anybody can run Pro96com on that site, it'd be interesting to know all the frequencies now used on that site. I confirmed that all 4 of the frequencies from the old prison system are now used on Starcom21 Site 207.

4640. RE: [StarCom21] Pontiac Correctional Center now on Starcom21

Yahoo group: StarCom21

4641. Washington(?) County testing on Starcom TG 13106

Yahoo group: StarCom21
Date: 2013-04-26 01:27:48 UTC
From: mark_hoeny
Topic: 4641 Message: 4641

I've been hearing a dispatcher (RID 1) and "95-x" units (80600x RIDs) performing coverage testing on TG 13106 for a good part of the day. Locations mentioned include the towns of Ashley and Richview, both in Washington County. It appears that Washington County is the 95th out of 102 counties (possibly explaining the use of "95" in their on-air unit identifiers) - this all seems to point toward Washington County Sheriff's(?) units "test driving" SC21 for coverage in their county.

Until now, TG 13106 has been tagged "ISP Air Ops 2" in the RR database. I have my doubts about it actually being an "Air Ops" TG. In 2007, I was told by a very reliable source that this TG was present in (at least) ISP district 5, 6, 8, 16, 17 and 21 SC21 radios, where it fills what would be otherwise empty channel slots between the districts' last "Detail" TGs and channel 16 (the 700 MHz conventional analog vehicular repeater channel in districts that use them). I'm guessing that filling these "empty" channels with something allows troopers to quickly find their vehicular repeater channel (without looking at the radio) by turning their channel selection knob fully clockwise. Perhaps it isn't possible to program a 16th "channel" in these radios' zones without having the first 15 slots programmed.

Maybe TG13106 should be relabeled as a "filler channel"?

I don't think Washington County is even considering switching to Starcom. They've just installed a bunch of new VHF equipment which is P25 capable but haven't even turned that on yet because of cost to local police departments.Maybe ISP is doing some testing,but I really doubt that the county is doing anything with it.

I was just listening to TG 13106 recordings from 4/24 and confirmed unit 95-3 calling "Washington County". These transmissions were more coverage testing than anything but there was some patrol activity heard as well. The RID of 1 used by Washington County dispatch has been used by Moto techs in the past. FWIW.....

From: RADIOMAN
Topic: 4646 Message: 4646

Hello Everyone

I'm thinking of putting a computer clean up and training session together for a Saturday.
This would have
Malware removal
Privacy Sweep
Registry Fix
Registry Defrag
Security Defense
Disk scan
Windows Update
Plus other things not listed.
This will be open to all person who register before I start the class, Kids and adults.
I can also do a BYOD (bring your own bottle) Build Your Own Computer. The same day.
Or on another day.
If you are interested please let me know . This will be a free class
Please reply by email to Bryan.Stacey@...
If I get enough people I will let you know when I have set things up

Regards
Bryan

4649. CARMA Meeting Saturday

Yahoo group: StarCom21
Date: 2013-05-10 00:05:13 UTC
From: Rich Carlson
Topic: 2962 Message: 4649

Come One, Come All! The next CARMA Meeting is this Saturday, May 11 at Phillies Pizza, 63rd & Kingery Hwy (IL-83) in beautiful downtown Willowbrook. Doors open at 11:00 AM, and the meeting starts at 1:00 PM.

Remember the rules:

1) Park on the west side of the restaurant so the front spaces are available for transient parking. Violators will be ticketed, towed and crushed. We have contracted with Lincoln Park Towing to enforce this.

2) Pay for your lunch. If you skip out on your bill you will be hunted down and hung by your toes.

3) Over-tipping is encouraged by the wait-staff.

4) Over-indulging in food is permitted, in alcohol it is not.

5) Do not steal my red pen.

6) Attendance is mandatory if you come.

7) No photography is allowed in the multi-story secure parking structure at ORD.

8) The white zone is for immediate loading and unloading only.

9) Offer void in Vermont and where regulated, taxed or prohibited.

10) Taxes are the responsibility of the winner.

11) Do not fold, spindle or mutilate this notice.

12) No short jokes about Fred or fat jokes about me are allowed, except by Fred and me.

4651. SC21 TG 4469 - IDoT Construction TG of Some Kind?

Yahoo group: StarCom21
Date: 2013-06-10 15:27:05 UTC
From: Mike Curtis
Topic: 4651 Message: 4651

Picked up a little traffic on TG 4469 today on T131 (LaSalle). The units identified themselves with a "B-" prefix and were talking about hauling steel for a project on an unknown roadway heading northbound. Some of the IDs are consistent with IDoT units so I'm guessing it's used for

construction projects? If I hear more I'll let y'all know .

The radios IDs were -

B-15 - 6400200

B-19 - 6400204

B-20 - 749510 (New radio ID scheme for me)

B-25 - 6400207

4652. LaSalle County Sheriff

Yahoo group: StarCom21

From: SC21
Topic: 4652 Message: 4652

*6/11/13 - Reported that the LaSalle County Sheriff's Department will be testing STARCOM21 in the future, looking at coverage (especially around the lake). Other possibilities include Cleartalk TRBO, VHF, 800 MHz Conventional. A vehicular repeater would be added if staying on Cleartalk. Sheriff's current mobile radios are upgradeable to SC21.

From: Mike Curtis
Topic: 4652 Message: 4653

LaSalle County has looked at StarCom before . The last time they did, they ended up giving/donating/selling a couple 800 MHz channels they had to ClearTalk in exchange for a tower located near the Serena FD firehouse, which in theory gives them better coverage around Lake Holiday. StarCom coverage in that area isn't going to be much better in my opinion. There's an area in northern LaSalle, southern DeKalb, southern Kane, southwestern Kendall that has very little to no StarCom coverage.

VHF or StarCom (if they can get another tower built out there) seems to be their best option. VHF with some extra voting receivers would be my pick given that everyone else in the county is on VHF, save ISP and maybe Senece when they move. TRBO would mean replacing every radio in the department and I don't think seizures along I-80 have been all that high for the SO with all of the local departments plus ISP competing for them :)

They already have vehicle repeaters (851.0750 156.7), so I'm not sure what that means

From: mark_hoeny
Topic: 4654 Message: 4654

I was reviewing recordings from earlier this month when I heard the Lombard Police Department repeatedly attempt to acknowledge DuPage County Office of Homeland Security and Emergency Management (OHSEM) during their monthly DCERN net on 37.94 MHz without success. Only problem was that she grabbed the wrong mic and was transmitting on Starcom21 TG13106!

In the past, TG13106 has been listed as ISP AIR OPS 2 in various SC21 talkgroup lists. A few years ago, a reliable source indicated that TG13106 was programmed as what appears to be a filler TG in some ISP radios. It is now obvious to me that it is also programmed into ITTF radios as well.

I have serious doubts about TG13106 being an ISP AIR OPS talkgroup.

Per info that is accurate, IDOT will be shifting all trucks and other op's to Star Com, which would guess that there will be added channels as for sure that would load the IDOT now used freq's.
Also don't know about the entire state, but we where told that Lincoln WX will also stop using the low band and go to Star Com. More going on but not going to post until it is verified.

From: Kevin O'Rourke
Topic: 4660 Message: 4660

This morning I'm hearing comms between UIDs 360033 (previously IDd as HENRY 531) and 6400053 on SC21 TG 4498 (not previously listed in the Radio Reference SC21 database or in the CARMA SC21 profile). One location mentioned makes me believe that they are operating in the western Chicago suburbs. Discussions pertained to truck weights - likely portable scale operations.

Sounds about right.

I have 6400053 identified as H-524, another IDoT portable scale

Kevin,

The Addison PD were doing scale operations here in Addison along with State Police on Army Trail Road about a ½ mile west of Interstate 355 last week Thursday morning. They may still be doing it. I have not been down that way since last Thursday.

Rich

Mystery solved - reviewing SC21 recordings from last week and TG4498 was
IDd by a user as "SCALES C".

From: Mike Curtis
Topic: 4664 Message: 4664

It's someone in Northern Illinois I'm sure based on radio ID patterns, but I'm unsure on who it is. There have been quick radio tests on IESMA this morning from radio IDs 100500 - 100549 and 106000 - 100614 (so far).

4667. Big Rockford Event Coming Up?

Yahoo group: StarCom21
Date: 2013-07-16 17:11:13 UTC
From: mark_hoeny
Topic: 4667 Message: 4667

Hearing lots of activity on SC21 TG 30300 (ITTF North A) this morning that seems to be in preparation for an upcoming Rockford-area event.

ISP aircraft PAUL 5 was working IEMA 15 testing an RF video link from the aircraft to county building. Also, various Rockford PD, Winnebago County Sheriff, and ISP units are performing radio checks with "Rockford Command Post" from multiple checkpoints.

The last I heard, the Rockford air show had been cancelled. Anyone aware of another big event coming up that would call for all this testing and law enforcement presence?

Mark

Could this be a response to the increased amount of violence taking place
in Rockford over the last week or so ?

Mark,

It could be related to this - sounds like they were searching for some missing people on the Sugar River. Once you sent this email I turned on the District 1/16 ISP broadcastify feed and heard D16 dispatch contact Paul 8 saying "county has a visual on the subjects and has medical en route" and made it sound like he could clear. 1F-29 said something about the subjects were swimming in the Sugar River. Rockford Scanner facebook page also says "Water rescue Rt 75 & Harrison Rd. Searching for missing tubers in the river."

To add to this, I heard a couple of radio techs on Radio Techs 1A (9142) this morning discussing getting spare desk chargers from various ISP districts and "the cache" to take to Winnebago County for "the detail". No clue on what said detail is, but something is coming up soon there :)

On a side note, they also mentioned a new class of cadets that will be coming on the air soon.

There was also a discussion about new radio identifiers for ISP radio techs. Sometime soon their new radio callsigns will be T units. Right now they are O units. Previously they have R units.

Hearing lots of activity on SC21 TG 30300 (ITTF North A) this morning that seems to be in preparation for an upcoming Rockford-area event.

ISP aircraft PAUL 5 was working IEMA 15 testing an RF video link from the aircraft to county building. Also, various Rockford PD, Winnebago County Sheriff, and ISP units are performing radio checks with "Rockford Command Post" from multiple checkpoints.

The last I heard, the Rockford air show had been cancelled. Anyone aware of another big event coming up that would call for all this testing and law enforcement presence?

I believe I've figured out what they're preparing for. According to an article in the July 5th Rockford Register Star, the Hell's Angles are planning a little get-together from July 28th to August 5th. The motorcycle club's 2013 USA Run is expected to draw 500 to 1,000 bikers. The article says that the event will be at Lyran Park, a camp site along the Kishwaukee River south of Chicago Rockford International Airport. Many Hells Angels will camp overnight, but many have booked rooms at several hotels near East State Street and Interstate 90.

Hide the women and children (but be sure to have fresh batteries in the scanner),

The Effects of Non-P25 Digital Systems on Interoperability

While non-Project 25 (P25) digital radios work well, help resolve
frequency congestion and typically are sold for less cost than P25
radios, they could set back interoperability efforts. Here are five tips
to reverse the trend.... READ MORE

4674. Rockford Harley Ralley and a Few New Unknown TGs

Yahoo group: StarCom21
Date: 2013-07-29 01:16:41 UTC
From: Mike Curtis
Topic: 4674 Message: 4674

Had to drive to Rockford today and caught a few things off of T111 .

"Control" (Radio ID 281003) was active on ITTF North A (30300) working a number of different agencies for the upcoming Harley ralley in Rockford. I logged Rockford PD, ISP, what I assume were Winnebago SO units, and a couple unknown agencies on here. I can only assume the traffic will increase during the week.

I also logged a few new talkgroups, affiliations only - 3441, 3461, and 3464

And new radio ID schemes - 97xxx, 98xxx and 99xxx

I believe one of the 97xxx radios IDed as "3-X-<something>" on ITTF North A

4675. TG 5341 - OSF Life Flight

Yahoo group: StarCom21
Date: 2013-07-29 17:05:44 UTC
From: Mike Curtis
Topic: 4675 Message: 4675

Caught Life Flight 1 talking to FlightComm on 5341 today . Been noticing affiliations and open mic tests here and there for the past few days, so I think they've made the switch.

OSF used 159.5100 (88.5) to talk to their helicopters but with the fleet spreading out more, like the helicopter they recently stationed in Peru, StarCom makes more sense.

Radio IDs -

447002 - Life Flight 1

447004 - Flight Comm

4676. Re: (CARMA) TG 5341 - OSF Life Flight

Mike and all,

This Life Flight talkgroup and the Flight For Life talkgroup (2851) have
been added/moved to a new category called "Aeromedical - Areawide" on
the Radio Reference STARCOM21 database page. The location circle for
this new category covers the entire state.

Thanks to Mike for sharing his new find!

4677. StarCom TG 3421

Yahoo group: StarCom21
Date: 2013-07-31 06:16:11 UTC
From: Mike Curtis
Topic: 4677 Message: 4677

Was in Rockford again for a short time tonight and picked up traffic on a new talkgroup on T111 (Rockford) - 3421

It appeared to be some sort of school security/police with radio identifiers "C-1" and "S-1" talking to a dispatcher called "Radio". Radio IDs were 95xxx (with 95015 being "Radio"). There were mentions of a "football field" and "press box" as well as "walking the premises" and "doing a walkthrough".

My first guess would be Rockford College, but I would think they would be in the Winnebago County talkgroup range of 17xx, but who knows?

4678. Re: (CARMA) StarCom TG 3421

From: Kevin O'Rourke
Topic: 4677 Message: 4678

Mike and all,

TG 3421 has tenatively been IDd as Rock Valley College in Rockford.

This TG is in the same range as the three new TGs (3441, 3461, and 3464)
you reported seeing affiliations for the other day. The 95xxx RIDs
would also be close to the new 97xxx, 98xxx and 99xxx RIDs you noted
observing in the Rockford area the other day.

Hopefully someone in the Rockford area can provide updates as more info
on these new TGs and RIDs is gleaned.

4680. SC21 Site 115 Dead?

Yahoo group: StarCom21
Date: 2013-08-01 04:05:30 UTC
From: Kevin O'Rourke
Topic: 4680 Message: 4680

Last night I was listening to SC21 Site 115 when I a reliable source told me that he heard this site would be going away and would be replaced by Site 149 (the new NWCD site). Tonight I went to listen to Site 115 but found no active control channel. I used my 996XT to search through the 800 MHz band in control channel-only mode and found the active control channel (851.5375) for Site 149. However, instead of just carrying NWCD traffic, I'm also hearing normal SC21 traffic from ISP District Chicago, ISP District 15 and Wauconda PD. It would appear that rumor I heard just last night is indeed fact!

Could someone run PRO96COM or whatever on this control channel to get a list of freqs for the "new and improved" Site 149? It would be great if we could get the information into the Radio Reference SC21 database page in time for the next Home Patrol-1 update on Monday morning.

4681. Site 115 Is Dead - Long Live Site 149!

Yahoo group: StarCom21

From: scanfan1
Topic: 4681 Message: 4681

In a previous post I reported that it appears Site 115 is dead with its duties being picked up by Site 149 (the new NWCD site). So far, my HP-1 is reporting the following 15 freqs for the "expanded" Site 149:

851.5375 - CC
852.3125
852.8875 *
853.0750
853.7500
853.9125 *
854.6125
855.4625
855.7125
856.7125
857.2125
859.2625
859.7375
859.9625
860.2125

* = previously reported in use by Site 115

Keep in mind I'm writing this shortly before midnight. I imagine that more freqs might pop up when the system gets busier. More research is warranted here.....

4684. New Radio IDs Noted on SC21 TGs 4501 and 2915

Yahoo group: StarCom21
Date: 2013-08-15 22:55:27 UTC
From: mark_hoeny
Topic: 4684 Message: 4684

Yesterday I heard a few units with radio checks on STARCOM21 TGs 4501 (IL Dept. of Corrections) and 2915 (a new one on me). RIDs were in the 86xxx and 87xxx range (also new to me). They were referring to TG4501 as "IDOC Dispatch", and an 86xxx RID was also heard on TG 2915. Nothing before today for these RIDs in the Radio Reference SC21 Wiki RID list, and TG2915 isn't in the SC21 database either.

Anyone have previous notes on any of this?

Thanks,
Mark

I had heard several months ago, that the Southern IL consolidation was a mistake and they were considering reverting back. But given the state budget issues, it probably makes sense. It is a struggle for dispatchers to get tossed into an area they are not familiar with and to be able to determine which units are the closest. And it makes it sound terrible on the radio.

From: Jeffry Rehm
Topic: 4687 Message: 4687

I must first admit that because I live in St Louis and do not get a receivable signal from my home of the nearby StarCom sites just across the river I do not normally listen in and don't check the database much. I was a bit surprised to see that many is not all of the Madison and St Clair County sites have been renumbered or have been noted to be "off air". Could someone explain what is going on?

Note: About 2 weeks ago I was in the metro east for about an hour or so and I "thought" that my StarCom system was working. Maybe it wasn't.

Thanks for any explanation.

4692. P25 system Sites / Ameren EDACS

Yahoo group: StarCom21
Date: 2013-08-30 03:05:45 UTC
From: SC21
Topic: 4692 Message: 4692

OK, been noticing this for a while, but wasnt sure what it was until some research.
Will research more St Louis area local stuff when home tomorrow

Using "Universal Trunker" under APCO P25 "Channel Access"
*It usually says P1 or P2, which my thoughts appear to be correct

P1 is P25 phase 1 and P2 is phase 2

STARCOM21, In Jerseyville now:
3-056 Kritesville is P1
3-001 Madison County is P2 (and has been for a while, that I have noticed)
3-007 Beaver Dam is P1

Haven't checked St Clair County, but very well could be P2, unless it's actually just older (the original part of the SC21 system)

St Louis County
No Signal

Ameren
3-003 Godfrey is P1 but has "Group Voice" Group Affiliation, Individual voice, unit registration "Available"
6-006 Creve Couer is P1 with the above PLUS: PSTN to unit voice, group data, individual data, unit to PSTN Voice

Getting *Ameren EDACS *sites: (Still Active!)
856.3625 C01, S01 - traffic on TGs 4348, 1380
856.1625 C07, S01 - traffic on 857.1625, 858.1625

Sorry to say that I do not use any software or any fancy gadget stuff to do research. I wish I could help you there. Sounds like it could be a lot of fun. What I have noticed with Ameren that the cc names in the StL area could be mislabeled on RR.

From RR database I programmed in these three sites.
High Ridge 404
St Louis 202
Creve Coeur 606

HR and CC decode accurately on my 393xt. However SL decodes as 404 along with HR. I have just checked my freqs in my scanner they are correct per the RR database. That is why I think they are wrong.

I am picking up more and more radio traffic on Ameren's TRS. However I deleted my old EDACS system because what was once one of the busiest TRS's in my scanner was DOA. Literally.

Just a little info.

4696. Meeting Notification

Yahoo group: StarCom21
Date: 2013-09-04 17:37:14 UTC
From: Rich Carlson
Topic: 4696 Message: 4696

Remember the CARMA Meeting this Saturday, September 7, at Phillies Pizza in Willowbrook.

Please park on the west side of the building!

I have cleaned out my basement again and have a couple boxes of free stuff, including a decent printer and a flat-bed scanner. I will also have a bunch of surplus scanners for sale, weeding out the herd a bit!

The meeting starts at 1300, doors open at 1100 of fun, food and frivolity.

4697. 2014 CARMA Event Schedule

Yahoo group: StarCom21
Date: 2013-09-08 00:23:39 UTC
From: Rich Carlson
Topic: 4697 Message: 4697

Here is the 2014 CARMA Meeting Schedule. The Board has decided to try reducing the meetings and Friday Nighters to quarterly instead of bi-monthy for 2014, we will re-evaluate this afterwards and see how it works out.

Meetings are at Phillie's Pizza in Willowbrook at 1:00 PM doors open at 11:00 AM.

Friday Nighters are at the Irving Park Oasis on I-294 unless otherwise noted, most guys show up about 7:00 PM and we go until we leave...

Remaining 2013 Events:

Friday Nighter October 4, 2013

Meeting November 2, 2013

Friday Nighter December 6, 2013

2014 Meetings:

January 18, 2014

April 19, 2014

July 19, 2014

October 18, 2014

2014 Friday Nighters:

March 7, 2014

May 9, 2014

August 15, 2014

November 7, 2014

4698. Site 149 Problems

Yahoo group: StarCom21
Date: 2013-09-12 22:23:59 UTC
From: Rich Carlson
Topic: 4698 Message: 4698

I have been noticing issues receiving Site 149, the now combined NWCD & old Site 115 used for north Cook County.

When I monitor it usually takes a while to acquire the control channel and even when it does I usually only see the channel grants and rarely hear voice. I am concurrently monitoring it on Pro96Com and see plenty of FDMA channel grants that I should be hearing but usually they just don't even display on the 996, and when they do there is no audio.

I am not talking about TDMA (NWCD) activity, I know those won't work on the 996 at all.

Has anyone had success with a 996XT on 149 since it has been merged?

Funny that you mention that. I have been having issues with the GPS on my new 996 XT and I thought that might be causing problems with the new SC21 site. I will focus on fixing the GPS issues this weekend and be on the lookout for Site 149 to see what happens.

Topic: 4698 Message: 4702

Rich,

I drove my 996 XT to the O'Hare oasis West lot. I had fairly good decode - about like many of the StarCom sites were when they first started up some years ago.

After letting the error rate settle down, I held on the site and drove north. Although some signal strength bars still showed, I had no reception north of Route 22 Half Day Road. I guess you could say that is about 3 miles outside of this site's intended coverage area.

In Libertyville, using my attic mounted yagi antennas, I had relatively poor reception, much like you described.

I will play with the digital decode parameters on the radio, but I think we are too far north to make much use of this site in its present state of power and tuning.

Perhaps this makes some sense in that this site is composed of many towers - more than 115 had before - each one of which could have the power throttled down to minimize the multi-path problem (???). I don't know, but I agree with you: "it ain't good."

Perhaps a useful topic and experiment for the next CARMA Friday Nighter.

4703. STARCOM21 Unidentified Talkgroups

Yahoo group: StarCom21
Date: 2013-09-16 21:19:46 UTC
From: <kevin.orourke1@...>
Topic: 4703 Message: 4703

The user/usage information for most STARCOM21 talkgroups has been identified and documented, but there are a small number of talkgroups for which the user/usage information has yet to be confirmed. A list of these unidentified talkgroups has been created on the Radio Reference STARCOM21 database page http://tinyurl.com/kc598hh under the heading "Misc System Information" (just above the system frequencies section). If you have any SC21 talkgroups that are not already listed in the database, please share them via the "Submit" tab on the above page. Include any information that might help identify the user/usage (i.e. agency type or name, verbal unit identifiers, channel name mentioned by users, RID/UID numbers observed, site and date you heard the traffic on, etc). If there is enough information provided to identify the talkgroup(s), editors will add them to the database. If there is not yet enough information to confirm the user and usage, they will be added to the "unidentified" list.

Finally, if you have additional information that could help to confirm the user and usage of any of these "unidentified" talkgroups, please share it via the submission process above.

Thanks!

4704. GRE Rumored to have been purchased

Through the grapevine.... I have heard.... about the possibility of
"Whistler Scanners"

Word is out that Whistler (of Radar Detector fame) has purchased the
rights to GRE's scanner line and their intellectual property.

Rumor has it that these scanners will be available some time next year.

I HAVE NO ADDITIONAL INFORMATION YET, this is all I know.

Picture is only what some future product MAY look like.

Default *Whistler Group acquires GRE's assets to manufacture Radio Shack scanner product line*

Whistler, the makers behind numerous radar detectors and other electronic products, has acquired GRE's technical assets and plans to produce scanners for Radio Shack.

Whistler Group | High Performance Radar Detectors and Electronics
<http://www.whistlergroup.com/>

The following models will be manufactured for Radio Shack by Whistler:

* PRO-652 - identical to the previous PRO-197 model. Digital trunking full coverage base scanner
* PRO-651 - identical to the previous PRO-106 model. Digital trunking full coverage handheld scanner
* PRO-650 - identical to the previous PRO-405 model. Analog base scanner, 25-512 MHz only
* PRO-649 - identical to the previous PRO-404 model. Analog handheld scanner, 25-512 MHz only

No words yet on backwards compatibility with the previous models with regards to programming, software, etc.

Also, we've received no details on the status of the PSR-800/PSR-900 series radios that came pre-programmed with the RR database and support for Project 25 Phase II systems.

This is the perfect example of information that should not be posted, I bet if I go to radio reference there is a thread on it there too. If you catch a call like this what good does talking about it in a public forum do, except to give them a very good reason to encrypt their comm.□s. Anybody who knows me knows that I love my hobby but posts like this are what is killing it, especially the conversation that followed after the initial post. I guess Cook County, McHenry County, NWCD, and Joliet have yet to teach us anything though. They went encrypted over night, just like that they were gone. The next shift came in and went to roll call and rolled out fully encrypted killing a big chunk of comm.□s we use to be able to monitor in those areas. All because of social media and live streaming giving people who should not have the info like criminals or others who will misuse it informed. I know I can□t stop people from doing what they will, but I can speak my mind and hope I reach a few people.

From: Mike Curtis
Topic: 4713 Message: 4713

I passed through Joliet tonight so I had a chance to run Pro96Com for a little bit against this new tower. The tower is T151 and has no neighbors, but it explains the new radio IDs I've been seeing on T131. Unfortunately everything was encrypted, but it may be worth plugging in to see if anything's in the clear.

T151 – Stateville Prision (Joliet)

859.98750 (c)
856.96250 (a)
858.98750 (a)
852.48750 (v)
852.98750 (v)
853.36250 (v)
853.48750 (v)
853.86250 (v)
853.98750 (v)

Talkgroups I had hits on were 2901, 2902, 2905, 2906, 2908, 2912, 2915, 2925, 2926
Radio IDs were in the 86xxx range

On a side note, over the past few days I've been logging keyups on TG 4510 on T131 (LaSalle) from radios in the 867xx range and 87997

Subject: (CARMA) Stateville Prison

Stateville has turned off there analog trunk system...There now on a ENC system using the same freqys as before labeled as SID:0140h-T0151.....If anyone in this area can run PRO96Com and see if T151 is a neighbor of T113 or some kind of mobile tower....another system down the tube....Ron in Joliet

4714. Couple of StarCom Updates

Yahoo group: StarCom21
Date: 2013-09-26 05:18:33 UTC
From: Mike Curtis
Topic: 4714 Message: 4714

Today on T131 (LaSalle) I heard 13-K-1 (RID 95000) calling 13-S-3 (RID 95003) on TG 3421 (Rock Valley College PD) asking him to switch to "16" which was TG 3424.

I've also been able to re-identify TG 1279 as "DNR Region 1 Detail A" after hearing Utica FD and DNR discuss running an incident on it. It was previously tagged as DNR District 7 but since there is no DNR District 7, they must have repurposed it as Detail A so I would assume 1280 is now "DNR Region 1 Detail B". Utica used grant money to purchase 3 StarCom radios (RID 88000, 88001, 88002) for the large number of incidents they run at Starved Rock State Park

Based on a large number of radio tests I've been hearing on ILEAS in the past few days, I'm guessing a large number of radios have been reprogrammed in some manner or another. The radios have been in the 409xxx, 410xxx, 411xxx, 439xxx, and some IEMA IDs (660xxx).

According to the IDNR Law Enforcement Region 1 reports for August 2013 http://dnr.state.il.us/Law3/report/2013/Aug.html , there is a IDNR LE Region 7. In 2009, I found a map of the IDNR Office of Law Enforcement Districts on the IDNR website, but I can no longer find it there. FWIW, a copy of that map can be found on the Radio Reference website at http://tinyurl.com/lwfzz2e . No idea if that map is still current or not.

4716. Naperville, Aurora and DuPage County

Yahoo group: StarCom21
Date: 2013-09-30 01:04:06 UTC
From: Robert Klamp Jr.
Topic: 4716 Message: 4716

With out going into a lot of detail there has been some
interesting traffic on the DuPage County TRS in the areas of Naperville and
Aurora. Do they plan to stick with Open Sky or have they looked into coming
into the fold with the rest of DuPage on Tower 101. While I was listening it
was very apparent that they could not contact the Naperville PD or Aurora PD
by any other means than phone. With this system being built in the spirit of
interoperability I was just wondering if anyone has ever heard any use of
the patches set up for the towns or if they were going to come online with
the rest of DuPage county on the P25 system? I would love to get those two
towns back in the scanner but I am probably dreaming, I was just wondering
if anybody has any info about what the NPD and APD and FD□s have planned for
the future or if there are any plans for them to join the rest of DuPage on
tower 101? Also what is happening with the Jail and Court House the Sheriff
has moved to the TRS, are they planning on moving the Jail and Court Ops to
the TRS soon or are they going to stay on their respective conventional
channels for the foreseeable future?

Thanks for any answers,

Bob

I doubt any change will happen in Naperville or Aurora, given the amount of money invested in OpenSky hardware. I believe there is a talk group connecting their OpenSky system and STARCOM21.

Appears to be using SC21 now for communications.
Unsure whether lowband is still in use.

Up until now, it had only been Emergency Patrol Vehicles and Water Level Monitor workers.

RIDs on 86xx TGs have been noted and area in the same RID area as 7776-8 area.

4721. StarCom21 Site 149 on a 996XT

Yahoo group: StarCom21
Date: 2013-10-06 01:20:41 UTC
From: Rich Carlson
Topic: 4721 Message: 4721

Has anyone had consistent success listening to Site 149's FDMA activity on a BCD996XT since it was updated to accommodate TDMA traffic for NWCD??

I have tried it in several locations in and around the coverage area with mostly poor results. It takes an inordinate amount of time to acquire the control channel and when it does only a small fraction of the activity comes thru, often garbled. I see plenty of concurrent activity on Pro96Com but little voice is heard.

I need to make this work on a 996XT for a specific project...

4722. Re: (CARMA) StarCom21 Site 149 on a 996XT

Yahoo group: StarCom21
Date: 2013-10-07 00:51:57 UTC
From: William Edwards
Topic: 4721 Message: 4722

My experience on Site 149 with my mobile 996XT is this:

- As I travel further west and south in the site 149 coverage area, it sounds great. Perhaps not surprisingly, around the Motorola world headquarters it sounds brilliant. Districts 2, 5, 15, and Chicago, plus tollway maintenance, PACE buses, and various other talk groups come in clearly.

- However, as I move east and north the reception quality diminishes quickly. East of Milwaukee Avenue it is bad, east of the toll road is worse, and north of Half Day Road on I-94, the site is essentially useless.

This confirms what I reported previously (on 9/14).

I also tried from home in Libertyville (15+ miles from Site 149) with an 800 Mhz Yagi antenna pointed south. No joy, not even a control channel for that site.

Parameters in my radio are nothing special:
Band plan:
0: 851.00625 / 6.25
1: 762.00625 / 6 25
5: 450.00000 / 6. 25

P25 LP filter: off

Squelch was on "4".

My mobile antenna is a 16.5 inch cell phone look-alike "on-glass" with 17 foot RG 58 cable (ScannerMaster #15-540721). No pre-amp, no Stridsberg in the mobile setup.

Bottom line: I think the performance of the site is highly localized, and for those of us in Lake County or east of the toll road it just is not good.

Would be interesting to learn what others west and south have to say.

4723. STARCOM21 Talkgroups 2961 & 2962

Yahoo group: StarCom21
Date: 2013-10-10 17:10:32 UTC
From: Kevin O'Rourke
Topic: 4723 Message: 4723

While reviewing some SC21 recordings I made earlier this year, I came across a couple of transmissions by Will County EOC on talkgroup 2961. In both transmissions, the radio operator IDd this talkgroup as the "MABAS Incident Command channel". I don't ever recall hearing any other transmissions on this talkgroup, and it's not currently listed anywhere on the Radio Reference SC21 database page. Can anyone confirm this as it was IDd by Will County EOC?

Also, talkgroup 2962 is included in the list of unknown talkgroups at the top of the RR SC21 database page. There appears to be a dedicated "secure" (encrypted) talkgroup for every MABAS talkgroup, I'm wondering if 2962 might be the MABAS Incident Command secure channel.

Thanks...

4724. McHenry PD on STARCOM21 Talkgroup 3451?

Yahoo group: StarCom21
Date: 2013-10-15 14:57:46 UTC
From: Kevin O'Rourke
Topic: 4724 Message: 4724

Hearing what sounds like McHenry PD dispatch operations on SC21 TG 3451.
Electronic radio IDs (RIDs) appear to be in the 98xxx range so far,
with 98100 being the dispatcher ("McHenry"). RIDs in the 98xxx and
107xxx range have previously been heard testing this TG in the past.

4725. Re: (CARMA) McHenry PD on STARCOM21 Talkgroup 3451?

Yahoo group: StarCom21

From: Mike Lynn
Topic: 4725 Message: 4725

This is confirmed McHenry, Johnsburg and McCullom Lake have switched to
Starcom. I do not have details on TG's or encryption.

Mike

I will give a listen a report back.

From: <alanjolly@...>
Topic: 4719 Message: 4726

Today, I heard the following on 8614. "Salem 2 from Salem yard". Sounds like the migration for IDOT to SC21 is spreading.

---In StarCom21@yahoogroups.com, <starcom21@yahoogroups.com> wrote:

Appears to be using SC21 now for communications.
Unsure whether lowband is still in use.

Up until now, it had only been Emergency Patrol Vehicles and Water Level Monitor workers.

RIDs on 86xx TGs have been noted and area in the same RID area as 7776-8 area.

Heard 4482 in use NE of Springfield, unknown actual location.

If anyone call tell if individual talkgroups appear to be assigned to certain yards, please submit to database.

Thanks!
Terry

Whoops... I meant to check, but then say the number was inline with the
others and just inserted.

Will work on it.

OK.... according to the main IDOT page on RR, Marion county (city of Salem) should be district 8.

So, anyone out there listening to IDOT Low Band and/or VHF-Low...

Please, let us know what VHF-Low frequencies are still in use.... Talkgroups and if they have any particular use: Coverage area, certain yards, etc.

Need to update the conventional page with information directing users to what TG on SC21 is being used.

4731. FCC Databases back up

Yahoo group: StarCom21
Date: 2013-10-17 04:28:48 UTC
From: SC21
Topic: 4731 Message: 4731

With the government shutdown over, the FCC Databases are back up for business.

http://wireless2.fcc.gov/UlsApp/ApplicationSearch/searchAdvanced.jsp
http://wireless2.fcc.gov/UlsApp/UlsSearch/searchAdvanced.jsp
http://www.fcc.gov/data/search-gallery

Some parts of the FCC website appear to still be on the "shutdown" page.

ULS Online Systems
ASR Online Filing, ULS Online Filing (License Manager) are currently down. The remaining ULS/ASR applications are operating properly.

Federal Communications Commission

We regret the disruption, but during the Federal Government-wide shutdown, the FCC is limited to performing duties that are immediately necessary for the safety of life or the protection of property. FCC online systems will not be available until further notice.

SHUTDOWN UPDATE:

In light of the continuing lapse in appropriations and the resulting closure of the FCC, the Commission is unable to issue a Sunshine Notice today and hold an Open Meeting previously scheduled for October 22, 2013. As soon as the Commission resumes normal operations, we will promptly issue a Sunshine Notice and announce a new date for the October Meeting.

ADDITIONAL INFORMATION:

*

o FCC Shutdown Plan
<http://www.fcc.gov/Plan-for-Orderly-Shutdown-September-2013.pdf>
o Public Notice on Procedures for Filings
<http://www.fcc.gov/DOC-323568-Procedures-for-Filings.pdf>
o Notice Regarding Pending Section 214 Applications Due to the Lapse in Appropriations
<http://www.fcc.gov/DA-13-2020-Section-214-Apps.pdf>
o Auction 902 Short-Form Application Filing Window Suspended
<http://www.fcc.gov/DA-13-2014-Auction-902.pdf>
o Informal Transaction Shot Clocks Suspended During Lapse in Funding <http://www.fcc.gov/DOC-323563-Transaction-Shot-Clocks.pdf>
o Postponement of October 2, 2013 E911 Location Accuracy Workshop
<http://www.fcc.gov/DA-13-2019-E911-Workshop.pdf>

o Archived copies of the FCC's website can be found at This Link <http://web.archive.org/web/20130923213502/http://www.fcc.gov//> (this site is not affiliated with the FCC and access to its content is subject to the site's terms of use).The amount of material available through this site may be limited.
o Information Concerning Unemployment Compensation for Federal Employees <http://www.fcc.gov/Unemployment-Compensation-for-Federal-Employees.pdf>

If you need to contact the FCC to address an emergency situation, please call: (202) 418-1122 or email: FCCOPCenter@... <mailto:FCCOPCenter@...>.

Telecommunications companies must continue to use the Network Outage Reporting System (NORS) <https://www.fcc.gov/nors/outage/>, which will remain available during the shutdown, to file reports of telecommunication service disruptions pursuant to Part 4 of the FCC's rules. NORS allows companies to file Notifications, Initial Reports and Final Reports. The information on service disruptions is essential to maintain and improve the reliability and security of the telecommunications infrastructure.

Vacancy announcements for positions that were open for receipt of applications have been closed and will re-open when the Government is operational.

During this time, the FCC is not accepting any deliveries of supplies, or services that have not been identified as necessary for the safety of life or the protection of property.

I believe that these are incorrect. McHenry city was never on the McHenry County system. These look like the NSA (Non-Sheriff Agency) groups. All encrypted.

SUPPLEMENTAL INFORMATION
REGARDING
THE CITY OF ELGIN, IL.
REGION 54 FREQUENCY APPLICATION
Section 1 -- Service
The City of Elgin submits this application on behalf of its Police and
Fire Departments
which will use this system subject to the terms and conditions
of the Starcom21
Subscription Agreement. Use of this system will also be made available
to other City
Agencies.

Section 2 -- System Type
This new system will be an 8-site 700/800MHz ASTRO Project 25
Simulcast System
with a 9 link Point-to-Point (PTP) microwave backhaul network
on the
STARCOM21network. It will maintain the Grade of Service required
by the
STARCOM21 contract at each of its sites, with 16 dB in-building coverage
for the City of
Elgin Public Safety Agencies dispatched by its Main and Backup Dispatch
Centers. The
subscribers will use a combination of both mobile and portable radios.
The City of Elgin has requested to join STARCOM21 which will
combine State
frequencies with Elgin frequencies. Upon addition of these
frequencies to the
STARCOM21 system the City of Elgin will actively use the Starcom21
system for public
safety purposes. The State of Illinois STARCOM21 system is a statewide

public safety
radio system used and governed by public safety entities
throughout Illinois and is
managed by Motorola Solutions, Inc. Motorola Solutions, Inc.
maintains the radio
infrastructure of the system and assists with coordination of
frequencies into the
STARCOM21 system. Motorola Solutions, Inc. does not own licenses on the
system.
Elgin also has AutoAid and Mutual Aid partners that can come onto the
subsystem the
amount of radios which will be included are:
Kane County Office of Emergency Management - 4 Streamwood FD - 30
Streamwood
PD - 20 Hoffman Estates FD - 42 Hoffman Estates PD - 30
Bartlett Fire Protection
DIstrict - 38 South Elgin Fire Protection District - 9 Pingree Grove
Fire Protection District
- 3 Rutland Dundee Fire Protection District - 3 West Dundee FD - 2
East Dundee Fire
Protection District - 2
The future subscribers coming onto the system is projected to be about
125 additional
subscribers over the next 5 years.
The City of Elgin is requesting that the licenses be granted to enhance
the coverage
and interoperability with the State of Illinois. This interoperability
will provide enhanced
public safety operations within this region. Granting these frequency
requests will allow
the City of Elgin to join the statewide STARCOM21 system, and
allows Law
Enforcement, Fire, and EMS agencies to significantly improve
their public safety
communications capabilities. The system is owned by the vendor;
however, the
subscriber radios (mobiles and portables) and consoles are owned by the
City. The City
of Elgin will license these frequencies in its name for use on the
STARCOM21 system.
This system uses Motorola's ASTRO 25 digital platform, an FDMA
based technology
that uses the P25 IMBE vocoder. It supports integrated voice and data
applications.

Section 3 -- Intersystem Interoperability
The new City of Elgin radio system will have the ability to
interoperate with existing
public safety agencies using 800 MHz and UHF/ VHF/ low band frequencies.
The 800 MHz users will be able to communicate with City of Elgin

STARCOM21 system
users, such as the Illinois State Police, via the five NPSPAC
821 Mutual Aid
frequencies. The subscriber units will have the ability to o perate on
these channels with
analog operation.
Interoperability between the City and other agencies on UHF or VHF
frequencies can be
achieved by having the dispatch operator setup a crosspatch between a
talkgroup in the
network and the desired analog conventional channel.
Interoperability between the
existing ISPERN and IREACH frequencies will be accomplished in
accordance with the
guidelines outlined by each respective Governing Board. The
Illinois State Police &
Motorola have identified specific STARCOM21 ISPERN and IREACH
talkgroups that
will allow for interoperability with VHF ISPERN and IREACH users.
City of Elgin subscribers will utilize the STARCOM21 system
through talkgroups
dedicated to their specific agencies. Existing STARCOM21 users will be
encouraged to
enter into an intergovernmental agreement that will allow for
the sharing of specified
talkgroups to provide for interoperability with other county, state and
federal government
users.
Other non-City public safety & local government agencies that
subscribe to the
STARCOM21 system will be able to interoperate directly with City users.

Section 4 -- Channel Loading Factors
These frequencies will be used by 738 units initially. Of these, 409
will be distributed to
the Police Department and 329 to the Fire Department. Since
trunking technology
shares resources among all users, the radio and microwave
frequencies the City of
Elgin will add to the STARCOM21 network will also support radio traffic
of other network
subscribers. This includes 1306 State Police, 3492 DuPage County, 8785
Cook County,
1224 Tollway, and 1166 McHenry which include neighboring local
government Public
Safety Agencies.

Section 5 -- Coverage area
This application includes the necessary 40, 25, and 5 dBu contour maps
for the City of
Elgin sites and the current STARCOM21 sites located in Kane

County. The City is
requesting additional frequencies to support the microwave sites, which include: Plato,
Nessler, Illinois State Police District 2, Shales Water Tank, Elgin Toll, Randall/College
Green Water Tank, 120 S. State Street and both the Main and Backup Dispatch
Centers.
The additional frequencies are necessary to provide the backhaul network and to
maintain the Grade of Service for the public safety users of the STARCOM21 system.
The contour maps were run on a software program called Hydra. Hydra is an internal
use only software program designed and used by Motorola.
Section 6 -- Vacated Frequencies Returned

No frequencies are planned to be vacated at this time.

Section 7 - Implementation Schedule
The City of Elgin plans to roll out all subscribers, 738 users, by October of 2013 when
the system is fully implemented and on the air

4735. New Talkgroups

Yahoo group: StarCom21
Date: 2013-10-23 21:31:59 UTC
From: Mike Curtis
Topic: 4735 Message: 4735

In the last couple of days I've logged a couple of new talkgroups with IDoT units hitting two of them.

5651 - IDoT Unit 4242 (RID 644371) affiliated with it
5652 - RID 45069 affiliated with it
5661 - IDoT Dispatch in Peoria (RID 649904) keyed it up

There was probably a lot of outside area SC21 usage in Springfield this week as the largest statewide public safety communications conference just completed.

From: Mark
Topic: 4738 Message: 4739

Ed,

Are you referring to the StarCom tower site in Will County, or the Will County radio system itself?

If it is the radio system you are interested in, Will County is NOT on StarCom. And to my knowledge there hasn't been much of a change lately in their system operation. They ARE in the process of installing and transitioning to a P25 system, but that transition is its initial stages. There are a couple of talkgroups from the EDACS system that have been "patched" to the P25 system, but not many.

Mark - N9WYS

Hey Mark,

Thanks for the info. I should of been more specific. I am talking about the Will County freqs. for picking up the state police in that county. Like I said I have programmed the Grundy County Freqs. in my mobile and when I leave the area and go into Will County I have to change the tower site from Grundy to Will but now I hear nothing on the Will county tower. Maybe I need to reprogram the site again?

Ed,

Are you referring to the StarCom tower site in Will County, or the Will County radio system itself?

If it is the radio system you are interested in, Will County is NOT on StarCom. And to my knowledge there hasn't been much of a change lately in their system operation. They ARE in the process of installing and transitioning to a P25 system, but that transition is its initial stages. There are a couple of talkgroups from the EDACS system that have been "patched" to the P25 system, but not many.

Mark – N9WYS

From:StarCom21@yahoogroups.com On Behalf Of Ed Melant

Hey guys,

Can you tell me if Will County Starcom changed anything? I receive Grundy Starcom without a problem but cannot pick up Will?

Thanks

Ed,

The current info for the Will County StarCom21 site (AKA: ISP – District 5) is available at http://www.radioreference.com/apps/db/?aid=819.

I don't remember it off the top of my head, sorry…

73,

Mark – N9WYS

From: StarCom21@yahoogroups.com On Behalf Of Ed Melant

Hey Mark,

Thanks for the info. I should of been more specific. I am talking about the Will County freqs. for picking up the state police in that county. Like I said I have programmed the Grundy County Freqs. in my mobile and when I leave the area and go into Will County I have to change the tower site from Grundy to Will but now I hear nothing on the Will county tower. Maybe I need to reprogram the site again?

Topic: 4735 Message: 4743

Thanks for sharing your new talkgroup finds, Mike. I've added them to the list of unknown talkgroups toward the top of the Radio Reference STARCOM21 database page.

Does anyone have any additional information about these talkgroups? It appears that RID 45069 (affiliated with TG5652) could likely be a hospital, health department or Red Cross unit.

Finally, the web address for the RR STARCOM21 Wiki page has changed. This page can now be found at http://tinyurl.com/ks3y5qh .

4747. IDOT snow plow TGs different from last winter

Yahoo group: StarCom21
Date: 2013-11-15 13:27:00 UTC
From: <citrus801@...>
Topic: 4747 Message: 4747

This week I found the snow plows using different talkgroups than last year:
4480 Bloomington
5667 Tuscola
5668 Fithian
5670 Champaign
4481 Monticello
5654 El Paso
5665 Towanda

4748. Fwd: (CARMA) New Scanner Launch this Saturday

Yahoo group: StarCom21
Date: 2013-11-15 03:36:48 UTC
From: SC21
Topic: 4748 Message: 4748

FOR IMMEDIATE RELEASE:Uniden America
Irving, TX
Uniden America will be announcing their newest flagship scanners in an online event at noon Central Time on Saturday, November 16. The web site for the announcement is:
http://www.youtube.com/watch?v=zGPEEGw5NzE.
The presentation will last about 20 minutes. Additional details will follow the presentation.
Uniden America is the industry leader in public safety scanning.

Hey that’s why I have given up, it’s a losing battle. I am sure many others could care less what I have to say too, So now I don’t say a thing. I have learned my views will not win me any friends, and I will keep them to myself from now on. I am very Sorry if I offended anyone, I will no longer post my opinions on information that should or should not be posted. I just hope none of you have to experience the loss of this great hobby to encryption, about 50% or more of the stuff I used to listen to has disappeared over this last year due to agencies that have moved to encryption 24/7. I can’t hear anything from the cook county sheriffs when they are around anymore, I lost the ability to monitor all Police comm.’s from NWCD even dispatch. McHenry County even decided to throw the switch and our now 100% secure, I used to love to listen to the IDOC on low band but now that they are on StarCom that’s all ENC too. I was just trying to stop anyone else from losing local communications and things that that others listened to as well because I have learned firsthand how much it sucks when the channels you usually listen to go silent. Anyway I apologize to anyone I offended by posting what I did, sometimes things come out the wrong way and I apologize for that.

4752. SC21 TG 8326 - Effingham County SO?

Yahoo group: StarCom21
Date: 2013-11-22 15:38:31 UTC
From: Mike Curtis
Topic: 4752 Message: 4752

I am hearing some traffic this morning on TG 8326 on T131 (LaSalle). It's some sort of law enforcement agency. They just did a traffic stop at Lake Sara Dr. and North Shore Dr. I did a little Googling and came up with that intersection being near Lake Sara in Effingham County. The radio traffic was between "25-21" (RID 814048) and an unidentified dispatcher (RID 814053).

The unit numbering is consistent with the Effingham SO numbering system.

You're not alone. I have taken my broadcastify feeds offline and I now stream them privately for myself. I was surprised to see Uniden entering the streaming market (bcd536hp) and I'm sure there will be a way to capitalize on that interface and bring it to broadcastify too.

I don't believe streaming is all at fault. McHenry, yes, I believe that was due to streaming and paranoia that caused that. There was an incident, people started talking on some yahoo groups and within a few months - my radio started saying ENC on 1101. Now all of McHenry TGs are now encrypted, except the city of McHenry, I think.

Motorola is pushing ENC very hard for the revenue too. On starcom they will eventually be billed monthly for the usage, so the city's/counties/states will be paying for that cost soon. Some have agreements for 7 years and the air time is free during that time. But watch when they start paying for the air time. You may see some start going back to their old systems or something low key all together. And I know its been mentioned "Look, they can listen to your traffic online" I heard it with my own ears.

Why doesn't broadcastify delay their streams by 15-30 mins? I couldn't tell ya. I think departments would be less paranoid to a delayed stream.

I know this is a little off topic and I apologize for that. But my streaming of starcom and some talkgroups of the starcom system were related to the group.

Mike,

IL already pays a few per radio per month. I believe it is around 50$ which is very expensive already plus if the city/county/state would like ENC there is also an additional fee for that use. Giving current budget outlook for many agencies it wouldn't be worth it.

4755. STARCOM21 TG 3411

Yahoo group: StarCom21
Date: 2013-11-23 16:22:02 UTC
From: <wireless101@...>
Topic: 4755 Message: 4755

This past Thursday I heard test counts on SC21 TG 3411 between RID 409855 (Will County EMA?) and RID 94005 (Will County?). Traffic on TG 3412 from four days before that is shown on the 'unknown talkgroups' list on the Radio Reference SC21 database page.

There may have been a “temporary patch” setup between StarCom and the Will County system while responding to the tornado events in Will and Grundy counties… To my knowledge, ITECS-3 is not in operation, but there may have been a patch established elsewhere.

Mark – N9WYS

4759. STARCOM21 Talkgroups 3541-3544

Yahoo group: StarCom21
Date: 2013-12-05 19:30:48 UTC
From: <wireless101@...>
Topic: 4759 Message: 4759

On Tuesday and Wednesday I noted 1090xx RIDs ("Radio Shop") with key-ups and a few test counts on talkgroups 3541, 3542, 3543 and 3544 via Site 101. Seems to be a new RID range and new talkgroups, perhaps a new agency coming on line soon?

Mark

4760. IDOT District 8 updates

Yahoo group: StarCom21
Date: 2013-12-07 06:30:08 UTC
From: SC21
Topic: 4760 Message: 4760
Attachments: 1 described; binary payloads are missing from this source WARC

Very active the last few days with the winter weather event.

IDOT District 8 - Collinsville Talkgroups

*TG 7781 - heard Dispatching ops with units about 3:30pm, giving 10-42/off air "Nashville 1", "20x", "xxxx 3" (11/21/13)

4761. Re: IDOT District 8 updates

Yahoo group: StarCom21
Date: 2013-12-09 22:17:45 UTC
From: Jeffry
Topic: 4760 Message: 4761

I have an update to the IDOT Dist 8 TG's. I had a few other TG's in my 396 that are either old TG's or ones that were missed. I believe they came from the StarCom specific list of the CARMA Chicago group. These are the extras I had.

4485 Statewide
7785 Zonewide
7781 EVP Ops (? EVP)
7779 Ops 1
7780 Ops 2
7782 Ops 3
7783 Ops 4
7784 Ops 5

Again these may be old but they were probably valid at some point.

4764. New STARCOM21 Talkgroups and RID

Yahoo group: StarCom21
Date: 2014-01-07 17:15:28 UTC
From: <wireless101@...>
Topic: 4764 Message: 4764

I heard a radio tech (RID 230000) with test counts on talkgroups 3326 and 3329 yesterday (1/6) via Site 101. As far as I can tell these are talkgroups and an RID that haven't been previously reported.

Mark

4765. Wheaton College Public Safety Using STARCOM21

Yahoo group: StarCom21
Date: 2014-01-08 08:23:28 UTC
From: <wireless101@...>
Topic: 4765 Message: 4765

Wheaton College Public Safety units started using STARCOM21 talkgroup 2747 for dispatch operations shortly after 1pm yesterday (Tuesday). So far they've been noted using RIDs 277020-277024 on Site 101.

In December 2012, the DuPage Emergency Telephone System Board (ETSB) approved Wheaton College Public Safety's request for limited access to the Wheaton PD’s designated STARCOM21 talk groups. Wheaton College Public Safety previously had access to DU-COMM 3 West (471.1375) for interoperability with Wheaton PD. Time will tell if this use of talkgroup 2747 is a temporary thing or not. The RIDs being used were previously thought to possibly be part of a DuPage ETSB radio cache.

Subject: Request for Special Temporary Authority
STA, to operate four (4) 800 MHz State allocated pairs within the City of
Columbia, Monroe County Illinois.
Region 13 800 MHz RCRIC has received an application for an STA to operate
four (4) 800 MHz State allocated pairs within the City of Columbia, Monroe
County Illinois, 12.5 KHz channels as part of the Starcom simulcast cell.
1. 851.8375 MHz
2. 852.3625 MHz
3. 852.8875 MHz
4. 853.9875 MHz
The proposed use of these requested frequency pairs are to add to the
statewide
P25 trunked network known as StarCom 21. These channels are being added
to the
existing Cell presently being used within the City of Columbia, Monroe
County
Illinois to improve coverage for subscribers within that County Area.
Being a state
wide Network the service to all Starcom Subscribers within the county
will be
improved.
Region 13 supports the purposed STA Request from the Illinois State Police.
The Region reminds the applicant that the approval of the STA does not
constitute
approval for formal permanent licensing of the selected STA channels.
For formal
permanent licensing a formal request, which adheres to the Region Plan
Requirements must be submitted, for Region Review. Region approval must be
received by the applicant before a permanent license can be acquired.

4767. CARMA Meeting Saturday

Yahoo group: StarCom21
Date: 2014-01-15 02:19:03 UTC
From: Rich Carlson
Topic: 2962 Message: 4767

You are cordially invited to the next CARMA Meeting this Saturday, January 18 at Phillies Pizza, 63rd & Kingery Hwy (IL-83) in wonderfully wacky Willowbrook. Doors open at 11:00 AM, and the meeting starts at 1:00 PM.

Remember the rules:

1) Park on the west side of the restaurant so the front spaces are available for transient parking. Violators will be smitten.

2) Pay for your lunch. If you skip out on your bill you will be hunted down and shot. Survivors will be shot again til we get it right.

3) Over-tipping is encouraged by the waitress. She may be little but her family is large, help her out.

--
Rich Carlson, N9JIG

4768. Phase II talkgroups - Re: (CARMA) StarCom Site 501 TDMA

Yahoo group: StarCom21
Date: 2014-01-19 04:22:02 UTC
From: SC21
Topic: 4768 Message: 4768

Question I've been thinking about the last couple weeks.

Type II/TDMA Talkgroups -

How do these show up on "older" P25 scanners that can decode monitor
Phase 1 talkgroups?
(Or do they show up at all?)

Is there anything different that shows up on pro96com or trunker?

On 1/18/2014 12:07 PM, Tyler Buchinger wrote:

From: <jd@...>
Topic: 4771 Message: 4771

Hello all, first weekend with the new Uniden BCD436HP it seems to work very well. Using GPS and Zip Code location, It seems to load systems in a larger area when you may expect. No state to state feed back yet at this time. Sentinel software works well for programming favorites and works much the same as the BCD396XT. StarCom21 is sounds very clear even ISPERN. The ability to hold systems, sites and channels is very helpful and works well. Holding Sites seems to work more like holding what we would know as groups with the 396. overall wow looking forward to using GPS and traveling state to state, let you know how it works compared to the 396. later jd

4772. SC21 TG 3531 - Lanark PD?

Non-P25 Digital Technology Hurts Interoperability Efforts

February 19, 2014

By John Powell

A close examination shows that interoperability is broken into three areas as defined by the five lanes of the Safecom Interoperability Continuum: governance, standard operating procedures, training and exercises, usage and technology. Technology is last because for proper implementation, its selection must be carefully done only after governance is established and operational decisions, including interoperability, are made with regard to how that technology will be implemented and used. Technology's purpose is to support an operation, not drive it.

Who are these "responders?" Beyond the usual three first responders of fire/rescue, EMS and law enforcement, the answer becomes incident driven. How often do you see a Department of Transportation (DOT) vehicle at the scene of a traffic collision? The current ice storms sweeping the East and South quickly add public works, transportation and utilities because all other responders can't move until the roads are clear and safe for passage. Do the three first responders need to be able to communicate directly with these other supporting responders in these situations? The answer is a resounding yes.

From the governance perspective, local and state first responders in the U.S. include more than 70,000 fire/rescue agencies (the majority of them all-volunteer), 85,000 individual law enforcement agencies (often with overlapping jurisdictions), and EMS that includes a wide mix of paid, private (often under contract to governments) and volunteer organizations. Each of these generally budgets and operates independently.

These numbers presents a severe communications interoperability challenge, even under the best of conditions, with routine support from neighboring or overlapping jurisdictions being a daily occurrence. At the same time, the U.S. is rural in nature, having dense population centers, but with more than 50 percent of the actual landmass

(particularly west of the Mississippi) being rural to very rural. Throw into that mix the added technology challenge that the U.S. operates in five major radio bands ---VHF low, VHF high, UHF, 700 MHz and 800 MHz. Until the recent introduction of multiband radios (MBRs), users could communicate on at most two of those bands from a single radio with the great majority only having equipment operating in a single band. In spite of these challenges, billions of dollars in public investment generally directed toward improving interoperability has yielded significant improvements during the past 12 years. The fact that pubic safety is now allowing the introduction of incompatible digital technologies to the detriment of those gains has created significant concern among many.

Operationally, the U.S. almost always manages its incidents from the field, a basic tenet of the incident command system (ICS). This requires both wide-area communications for coordination of various responding agencies/units and involved dispatch centers, and on-scene unit-to-unit (off-infrastructure or direct-mode) communications, with responders rapidly switching between the two, preferably using only the channel selector switch on the top of a handset. This latter direct mode capability can present a real challenge in the digital environment, particularly for TDMA systems.

Operational requirements include not only interoperability between field units, but also the ability for those field units to interoperate on neighboring agencies' infrastructure. During emergencies, it is wonderful to have backfill come in to support neighborhoods where stations are empty, but if the guest radios can't operate on the host infrastructure, how can they be dispatched?

Project 25 (P25) technology was designed from the ground up to support the U.S. environment. While it works well in dense urban areas usually supported by large, trunked implementations, it also works well in rural environments for a small agency with its base (or standalone repeater) and 10 mobiles only needing a single 12.5- kilohertz channel for high-quality communications. For those not involved in spectrum management, even those single rural channels can be hard to find, especially in the overtaxed but most used VHF high band.

The widely fielded P25 Phase 1 is a single FDMA talk path per 12.5-kilohertz channel. More recently fielded P25 Phase 2 provides two TDMA talk paths per 12.5-kilohertz channel. Talk path in this discussion can be data or voice, or a combination of the two for TDMA. Importantly, P25 and TETRA equipment use highly tested and refined voice codecs (vocoder) specifically designed for the public-safety environment and not generally found in commercial-grade digital technologies. TDMA is excellent in congested areas, but not wide, rural expanses because of the significant hardened backhaul typically required between base station sites. TETRA and some other non-P25 digital technologies are regularly touted for inexpensive handsets, but handset savings have been found in studies to be quickly eaten up by the more intense

interconnected infrastructure required to support those often lower powered (as compared with P25) TDMA handsets, as well as the ongoing operational expenses for backhaul between base stations for wide-area operations.

Many public-safety agencies require multisite wide-area coverage. P25 supports simulcast where a number of sites simultaneously carry the same coordinated signal on a single frequency. Most other digital technologies can't support simulcast, instead using multicast where the same conversation must be carried on one of the two or four TDMA "slices" or a separate FDMA frequency across those multiple sites to cover the required footprint. Because those non-P25 digital technologies can't overlap the same frequencies at nearby sites, this implementation can actually require significantly more spectrum to carry the same number of required wide-area talk paths.

However, from an interoperability perspective, probably the most important feature is high-powered handset on-scene simplex (direct mode) communications that is well supported by P25, with analog mode serving as the fallback common denominator for incident command operations in the U.S. All P25 receivers are inherently dual-mode analog and P25 digital; P25 receivers will automatically present whichever on-channel mode is heard to the radio's speaker. High powered in this case refers to the typical U.S. 3- to 6-watt band-dependent handset that will reliably communicate in simplex mode around an incident scene, including in and out of buildings for applications such as fire ground operations.

Finally, those not intimately involved with the real world of emergency response want to add the "we can hook anything to anything" gateway solution to this mix of RF bands and incompatible technologies. From the seasoned communications unit leader's (COML) perspective, those black boxes are called communications interoperability ending devices (IEDs). First there is the time required to set them up and/or properly engage and manage them; the emergent part of an incident is often over by then. They are also spectrum wasteful with one talk path per band per disparate technology; usually don't pass all features and functions, such as unit ID and emergency trigger, between technologies; and importantly from an untrained user's perspective, only provide coverage where the footprints of all interconnected systems overlap. Thus, gateways can be an indispensable solution when there is no alternative, but are almost always considered by COMLs to be the solution of last resort.

Given all of these concerns, coupled with a number of study cases where the introduction of non-P25 digital systems have been installed with significant negative impact on interoperability, the National Public Safety Telecommunications Council's (NPSTC) Interoperability Committee is examining this issue in detail through its Emerging Digital Radio Technologies (EDRT) Working Group. The working group will release a white paper later this year, with the current findings being that the introduction of non-P25 digital technology almost always results in a significant reduction in interoperability. The solution is beginning to

focus on the need for all handsets and all infrastructure to include 12.5-kilohertz analog, in addition to any other technology mode, to properly support interoperability.

For the counterpoint opinion on why non-P25 digital technologies don't hurt interoperability efforts, click here <http://www.mccmag.com/onlyonline.cfm?OnlyOnlineID=431>

John Powell has 43 years of first-hand interoperability experience including 32 years as a law enforcement first responder, was vice-chair of the Public Safety Wireless Advisory Committee (PSWAC) Interoperability Committee, chair of the FCC's 700 MHz National Coordination Committee (NCC) Interoperability Subcommittee, principal subject matter expert author of the Safecom Interoperability Continuum, chair of the NPSTC Interoperability Committee, and is a life member and past president of the Association of Public-Safety Communications Officials (APCO) International.

Non-P25 Digital for Public Safety: Why Not?

February 19, 2014

By Bruce Marcus

Proponents of Project 25 (P25) cite interoperability as a primary advantage of the protocol. However, consider a very common scenario --- a particular community uses UHF P25, while the neighbor on one side uses VHF P25 and the neighbor on the other side uses 800 MHz P25. How does using the same digital protocol help any of these communities? It doesn't --- it only helps the vendor they purchased the system from.

When it comes to interoperability, analog remains the industry standard. Digital Mobile Radio (DMR) is an advanced and open standard that retains analog functionality for interoperability while offering many advantages over P25.

DMR offers two-slot TDMA technology, simulcast and cross-band communications at low cost, as well as high-level encryption from at least one vendor at no additional charge. P25 offers two slots per channel with Phase 2, but with a tight budget, this is an expensive proposition. Why wait for two-slot capabilities when increasing capacity requirements demand it now, and DMR is significantly more cost effective?

For example, take a congested area where a fire department uses one channel for paging and dispatch. If we installed two-slot DMR, the fire department doubles its capacity and retains analog paging. This new channel can be used to patch cross-band to any other band or protocol for interoperability, using IP gateways, audio bridges, back-to-back radios or dispatch consoles.

The DMR protocol allows for GPS, man-down, ambient listening, text messaging and Tier 3 trunking with or without simulcast. DMR IP67-rated radios with five-year warranties can be purchased for less than $650.

Several vendors are concentrating on production of sub-$1,000 P25/DMR dual-protocol radios. This is great news for public safety --- whichever technology you choose, the future promises increasing digital interoperability. The only question is how much money do you want to spend getting there?

If I had the choice and bandwidth, TETRA is the best protocol for public safety, having four slots per channel and robust data; unfortunately, narrowbanding put a stop to that, with some exceptions.

Any way you slice it, software-defined radio (SDR) is the way to go. May the best, lowest cost and most efficient protocol win. Open standard DMR is a European Telecommunications Standards Institute (ETSI) standard on Tiers 1, 2 and 3 and provides the best choice for competition and price.

For the counterpoint opinion on why non-P25 digital technologies hurt interoperability efforts, click here <http://www.mccmag.com/onlyonline.cfm?OnlyOnlineID=432>.

4774. OFFER: Large Wooden Desk (Wheaton)

Yahoo group: StarCom21
Date: 2014-03-04 17:29:36 UTC
From: Richard Bauer
Topic: 4774 Message: 4774

I am remodeling my home hobby room and reluctantly have to part with my large wooden desk. it measures 74.5" wide x 36" deep. included is a right-hand return that measures 52" wide x 20" deep. the main desk has a center drawer and two drawers on the left side once of which has built-in rails for legal size file folders. the return has a pair of drawers one of which also has built-in rails for legal sized file folders. also included is a glass top for the main desk. the desk is in two pieces plus the drawers and glass top.

I have no room for this piece so it has to go to someone who can use it or it'll end up on the curb.

Come one come all to the Friday Nighter this Friday, March 7 at the O'Hare oasis over I-294. Some of us meet for pizza at Barnaby's in Des Plaines about 5:00 then head over to the Oasis about 7:00.

We will see and review the new Uniden BCD436HP and BCD536HP scanners so if oyu haven't seen these now is the time!

From: John Klecyngier
Topic: 4777 Message: 4777

Thinking about selling my bcd396xt for a bcd436hp. Any thoughts or suggestions from anybody? Will I c a major difference?

4778. Re: [StarCom21] BCD396xt vs BCD436HP

Yahoo group: StarCom21
Date: 2014-03-11 06:19:24 UTC
From: Rich Carlson
Topic: 4777 Message: 4778

I have both and I have found that the 436HP receives P-25 simulcast sites much better than the XT series does. I haven't had a chance to compare on non-simulcast sites but the XT scanners worked fine on them so I imagine the 436HP does too.

4779. RE: [StarCom21] BCD396xt vs BCD436HP

Yahoo group: StarCom21
Date: 2014-03-11 06:44:08 UTC
From: J. D. Buller
Topic: 4777 Message: 4779

Using both radios for several weeks now, using GPS and software to program each.

The Uniden BCD496HP has much better P25 audio!!,

The BCD396XT has much better GPS control using ARC XT version 1.9 build 2 software from BuTel.

The BCD496HP is easy to program in very simple ways, for specific programming in complex ways it's more difficult using the included sentinel version 1.01 revision 07

The ARC536 software version 0.89 build 11 beta from BuTel is not mature yet, but is showing improving progress, and should end up the best way to program the BCD496HP.

For now Illinois Starcom and Indiana SAFE-T system is working great on the BCD496HP, GPS control could be better working on that with manual input on ARC536.

For now in IL, IN, IA, WI, MO & TN, monitoring county and city trunking and conventional using GPS still best on the BCD396XT, working on that too with manual input on ARC-XT

So with all that being said, the best is depending on how you use it.

Simple programming without software using avoid to cut out what you don't and great P25 Phase 1 & 2 reception go for the BCD496HP.

For all other than P25 trunking and conventional monitoring, with complex software programming and better GPS control go for the BCD396XT.

Another major factor the BCD496HP for mobile and portable use, the 496 does not charge the batteries when in use, like the BCD396/XT does.

It will maintain power on condition mobile with usb plugged in but go beyond the three to four hours and then go portable, you are done without extra batteries.

If mobile or base is your main use go for the BCD596HP. If portable (hand-held use) charge up or keep one or two sets of three extra AAs on hand for a 7.5 or 8 hr. day's use.

I asked AW to put an extra pouch on the 496 case, you only get about three to four hours on a full set of charged batteries.

I will post more information in everyone wants to know. Just ask,

Later jdbullerreps, thanks jd

Thinking about selling my bcd396xt for a bcd436hp. Any thoughts or suggestions from anybody? Will I c a major difference?

4780. Madison Co TG Question

Yahoo group: StarCom21
Date: 2014-03-26 15:58:33 UTC
From: Jeffry Rehm
Topic: 4780 Message: 4780

I have been updating my metro east TG's for StarCom (Madison - St. Clair - Monroe Co's) mostly because Madison Co has gone like St. Clair Co, on their own (sort of). I can't find an ISPERN or IREACH link or TG for the county. Does anyone have those TG's?

Also in Madison Co. The small town of Venice does not appear to have it's own TG. For Madison or St. Clair county. (It sits right on the border.) Are they dispatched by either of the county sheriff's? If so I am assuming they are on one of up to three different dispatch TG's for either county.

Which brings up another question. St. Clair County has at least three sheriff's TG's. The main one and at least two other for rural community dispatching. Does anyone have the listing for what town(s) are assigned to which TG? That might make it easier to follow what is going on within the county.

And last. Since the metro east area has eliminated quite a few "sites" the reception seems to be a bit better. Not as much garbling in P25 trunked mode. However the strength (if you will) of the signals has not improved. From the St. Louis side of the river (and living in a proven low spot) I still have huge troubles finding a signal even with a yagi. (minor improvement but not much) I am convinced that StarCom is a great system and works great.....if you live in Illinois. As soon as I get close to the river, or drive onto a high spot on the eastern part of St Louis, I can get a signal from StarCom that is mostly good. I am attributing it to the exclusive use of 700/800 MHz frequencies. (They don't seem to travel well) The Missouri MOSWIN system uses mostly VHF Hi freqs and their signals can be heard sometimes over two or three counties.

I have bothered everyone too much here. Just looking for a couple answers to my questions. Have a great rest of the week.

From: Cris Hanna
Topic: 4780 Message: 4783

Hey Jeff

Also keep in mind that St Louis City's 5 800 Mhz sites are part of MOSWIN. You can regularly hear cars and Weldon Springs TG's on the 800Mhz sites

So St Clair Co/StarCom21 sites have to be "adjusted" so as to insure there is no interference with the STL City sites.

Now that being said.there are spots throughout the County where I can pick up D11 units on Starcom in my car, but the elevation is pretty high

I doubt this will ever improve much

Ah ha! And I though that was a simulcast or "repeat" of the TG for them.

So, are there other cities that are not on StarCom? Thanks.

Thanks Cris. I regularly pick up the Jeff Co (Imperial site) from my home as well as the city sites. When I hear a ranger on a car stop down at Washington State or St Francois State Park's I doubt that he/she is hitting a city site.

There used to be a web site (N10J) or something like that that was really colorful and had the TG designation for each city or municipality for the local StarCom. Not sure if it is still around or even up to date.

If I put my scanner in the SEARCH mode for either Madison or St Clair my head would spin for days because there is sooo much traffic on them.

They just use the normal ISP Talkgroups for ISPERN/IREACH.... not sure why others actually have a link when it already exists on the system.

Venice, last I thought, was still on VHF 155.07, last I knew... if not, check MMaison Police uses TGs 7931, 7932 & 7933 (since 9/24/09)

Madison County doesn't do much rural dispatching, so that's not as big of an issue. Just a few in the NorthEast seem to be dispatched b y the county.
I gave up a long time ago trying to figure out who is even on there.

I get great reception in IL for SC21. But in north city/county and near the airport, I don't have any problems getting in tower 3-001 Madison County Simulcast and often 3-056 (or ? Calhoun County sites). They come in nearly full scale and can pick up talkgroups fine.
I'm assuming the St Clair County sites are NOT pointing towards St Louis at all, as I think we have all discussed before.

I can pick up 3-001 for many miles more compared to 3-059.

This is what the group is for..... not a problem.

Terry

So I guess I will put in the Dist 11 ISPERN and IREACH TG's into the Madison Co system I have. It should work.....I guess.

For St Clair Co do you know what TG's are assigned to which city/town?

Thanks again.

Old, not recently updated (in the wiki).... worked according to old VHF Channels, may be the same on the rural law tgs:
(some of these are on their own tgs)

* 154.74, 155.76, 155.415 & 154.815 are now simulcast (digital) on St. Clair Co TRS (STARCOM21)
* Ch. 2 is for intermediate sized agencies. Ch. 3 is for small police agencies. Local Repeaters with different inputs are used locally for rural mobiles to contact CENCOM dispatch in Belleville
* Law Rural 2 - Alorton, Belleville, Brooklyn, Centreville, Dupo, Fairmont City, Freeburg, Lebanon, Mascoutah, Marissa, Milldstadt, New Athens, Shiloh, Smithton, Hecker
* Law Rural 3 - Mascoutah, Shiloh, Cahokia, Dupo, East Carondelet, Fairmont City, Freeburg, Marissa, Mascoutah, Milldstadt, Shiloh, Summerville, Washington Park

I seen the TG 1179 come up on my Homepatrol-1 on 03/28/14, There was talk of tank level percents. Does anyone know who this TG is for?

4791. Talkgroup 1677

Yahoo group: StarCom21
Date: 2014-04-09 15:32:36 UTC
From: <wireless101@...>
Topic: 4791 Message: 4791

I'm seeing a fair amount of encrypted traffic on SC21 TG 1677 this morning. RIDs observed include 429005 (RED Center), 429029 (UCP 13 - Wauconda) and three that have not yet been documented in the Radio Reference SC21 Wiki - 429065, 429066 and 429068 (possibly part of a radio cache?). The 429xxx RIDs listed in the RR SC21 Wiki so far are all MABAS and/or Illinois Urban Search & Rescue Task Force 1.

The RR SC21 TG database shows 1677 as a Stephenson County talkgroup. Does anyone have information that might indicate otherwise?

Mark

4792. IDNR - Conservation / State Parks

Yahoo group: StarCom21
Date: 2014-04-12 04:49:32 UTC
From: SC21
Topic: 4792 Message: 4792

It appears the Conservation Police have been using SC21 for some time now, although today is the first time I've heard them on a TAC TG in a while.

Question for the beginning summer season...

Is your local State Park / Conservation area using VHF for local ops still? (Maintenance type related, not law enforcement)

Previous comms have been on Repeaters, when Law Enforcement was active on their for tac (Dispatch was on Low Band ISP frequencies)

4794. Freescan file for Cook County/Chicago area?

Yahoo group: StarCom21
Date: 2014-04-13 01:39:36 UTC
From: <n7ryy70@...>
Topic: 4794 Message: 4794

Hello,
I will be visiting the Schaumburg area next week with possible visit to Chicago as well and was hoping someone may have a Freescan file that I can load some of the local conventional and trunked systems in ahead of time? I looked through the files section but didnt really see anything.
Thank you

BLOOMINGTON --- A debate sparked last week between Mayor Tari Renner and Alderman Judy Stearns heightened this week, as Renner on Monday said Stearns' call to cut an emergency radio upgrade by one-third was surprising, irresponsible and uninformed.

"You cannot have two-thirds of a digital radio system. It's not the slightest exaggeration to say that this would have put our entire community at risk because one third of people couldn't talk to others," Renner said of the nearly $900,000 Starcom21 digital radio upgrades in the city's budget for fiscal year 2015 that begins May 1.

At Monday night's City Council meeting, Renner noted a 2008 incident at State Farm headquarters --- a false report of a man with a gun --- in which communication among law enforcement agencies was hampered because the city did not use Starcom. Bloomington police have since switched to

Starcom, but earlier used a radio patch, or repeated information from the Starcom system to Bloomington officers over their analog system.

Stearns pushed back, saying she spoke to high-level public safety workers, whom she did not name, who told her the city could reduce the amount budgeted for Starcom.

"I think this kind of discussion is a disgrace. This is disgraceful," Stearns said of Renner's pointed comments aimed at her. "I think we're going to solve this ... not with a rancorous public discussion, but with a contract and the actual data in front of us."

The city's budget, approved Monday night, includes two Starcom projects that total $860,580. One is an upgrade to the communications center console for an estimated $535,580. The other is the addition of Starcom to the fire department for about $325,000.

Darren Wolf, communications center manager, said the $535,580 upgrade is mandatory because the current version will be phased out in 2016. The fire department's Starcom project would improve interaction with the Normal Fire Department, he said.

Bloomington Fire Chief Mike Kimmerling said his department will continue to maintain its current VHF radio system, but it's not ideal for major, communitywide emergency situations, such as a tornado. He said VHF is fine for communicating among firefighters when they're in the same spot --- at the scene of a house fire, for instance --- but doesn't work well when communicating across greater distances.

"It's really about cooperation," Kimmerling said. "We have to pick a common platform for us to work on."

The Normal Fire Department has used Starcom for years, said Fire Chief Mick Humer. He said if both municipalities are on Starcom, it could reduce response times by eliminating the need to repeat call information.

4800. Will County Public Safety

Yahoo group: StarCom21
Date: 2014-06-01 01:42:51 UTC
From: SC21
Topic: 4800 Message: 4800

http://www.radioreference.com/apps/db/?sid=599

A submission to RadioReference says:

/*Will County Trunking ID seems to be incorrect for Will County ID 1998. Database shows it is Lincolnway "Fire/EMS" description, yet "Will County Sheriff" Lincolnway is being received. */

Can anyone confirm what the correct usage is?

Thanks
Terry

Lincolnway FD is not being "patched" on 1998 any more, there just on the VHF 151.1825....That is now LWAY PD dispatch (1998) for NewLenox,Mokena and Frankfort....Will Co keeps creating patches for LW PD and changing them on any given day....No patch at this time for FD.....I got tired of making the changes today and tomorrow its different....They also can be heard on 04-097 or 591.....

Ron,
Will co. TRS usually did not patch FD on a full time basis except for IFERN. THe system is pretty busy all ready and I am sure they do not want over tax it. Just a thought. Why the patch number change, good question. I wonder if the guy in charge of the system is running out of things to do, LOL
I read your CARMA post. Interesting, I forget about the Chicago TRS 800 system. It is not used much. By the way is not shit spelled S H I T and not &#@%

Speaking of Will Co, they temporarily removed there LCN freqys 7-8 from there EDACS system for the WCo Digital system but, now LCN8 -854.3375 is in the EDACS rotation again....There are reasons for this that I cannot discuss at this time.....So if your a Will Co listener LCN7-854.4875 and LCN8-854.3375 should be re-instated on the EDACS or you will miss parts of the transmissions.....

4804. ISP District 8, 10 21 communications consolidating at District 6

Yahoo group: StarCom21
Date: 2014-06-18 10:19:02 UTC
From: Rich Carlson
Topic: 4804 Message: 4804

According to the Peoria Journal-Star at

http://www.pjstar.com/article/20140615/NEWS/140619347

State Police communications for Districts 8 (Metamora/Peoria), 10 (Pesotum) and 21 (Ashkum) will relocate to Pontiac (District 6). DuQuoin (District 13) has previously merged communications with Springfield (District 9).

Illinois is moving to regional communications centers statewide, it is likely that eventually they will only have a handful of communications centers.

Rich,

D9, did not merge with D13 unless I missed something. D13 DuQuoin is the dispatch center for D12 Effingham, D22 Ullin,and D19 Carmi, and D13 of course.

Sorry I misread the article, it reported that consolidations were AT DuQuoin and Springfield. Here is my listing of the current consolidation progress:

Post Name Dispatched at

1 Sterling Not yet consolidated

2 Elgin Not yet consolidated

C Chicago Not yet consolidated

5 Joliet Not yet consolidated

6 Pontiac Pontiac

7 Rock Island Not yet consolidated

8 Peoria Pontiac

9 Springfield Springfield

10 Pesotum Pontiac

11 Collinsville Not yet consolidated

12 Effingham DuQuoin

13 DuQuoin DuQuoin

14 Macomb Springfield

15 Oak Brook Not yet consolidated

16 Pecotonica Not yet consolidated

17 LaSalle Not yet consolidated

18 Litchfield Not yet consolidated

19 Carmi DuQuoin

20 Pittsfield Springfield

21 Ashkum Pontiac

22 Ullin DuQuoin

Let me know if I missed any...

I am suprised at more consolidations although that was the real goal a few years ago when it was announced. The issues are evident in daily listening

but getting better. When the consolidation first took place the dispatchers did not know the areas they were dispatching or distances and the wrong cars got sent to calls when others were closer. There has been some additional unusual operations that I have heard from the monitoring on a few occassions. 1st was during the winter D12 hq had an alarm going off in the lobby. I guess one trooper had just left and had not got the alarm deactivated. He was en route home and operations would not authorize him overtime to return to check and they ended up sending Effingham PD to check. The 2nd strange thing is I heard one of the afternoon operation cars radio in he was en route to an accident in an area that a county was already handling and en route to. The ambulance had been dispatched and the trooper was not requested he just heard the call and responded. When he got on scene he took over the call for ISP, and had a trooper called,out early to handle it. To me that seems like waste. Why do you handle a call that they had not been requested to and that you had to pay overtime for, when the county could have handled and cost no overtime?

But when the number of troopers we have in D12 has went from nearly probably the 80's to the upper 30's now there is an issue of shortages. Why overwork the guys you are already relying on. D12 covers a good portion of Counties from the Indiana Line, West along US Hwy 50 and I-70 nearly 1/2 the distance across the state.

Dispatchers will have the option of moving to the new Comm's center, per ISP. They are not cutting Troopers.

You are right they are not cutting troopers, its just down sizing through attrition. The issue is one of officer safety that has yet to be addressed by any of the consolidations. When you throw and extra group of dispatchers into the the original mix and new districts, the dispatchers start working on other district radios and don't know the areas they dispatch in, thus don't know who to call for what.

4814. Peoria County P25 update

Yahoo group: StarCom21
Date: 2014-06-21 18:10:57 UTC
From: SC21
Topic: 4814 Message: 4814

http://www.pjstar.com/article/20140620/NEWS/140629864/1994/NEWS?rssfeed=true&utm_content=buffer14c43&utm_medium=social&utm_source=facebook.com&utm_campaign=buffer

Police scanners will soon go quiet
Test continue before switch to a multimillion-dollar public safety digital radio system emailprint 1
By Matt Buedel of the Journal Star
Posted Jun. 20, 2014 @ 10:26 pm

PEORIA ? Police scanner listeners may have heard the harbinger of a new digital radio system over the current analog network this week.
Tests conducted over conventional channels will continue into next week as the Peoria County Emergency Telephone System Board (ETSB) fine tunes a multimillion-dollar digital radio system expected to go live around Labor Day.
?This is the biggest change in public safety radio communications in 35 to 40 years,? said Peoria City/County 911 Dispatch Director David Tuttle.

The new digital system will operate at different frequencies using talk groups that shuffle communications over a spectrum of airwaves, rather than remaining on a single channel. The system allows far more flexibility for emergency responders, but also will require the latest and most expensive scanners for citizens to listen.

?I believe there?s going to be thousands of people who are going to be surprised in 90 days or so when their scanners go quiet,? Tuttle said.

While the ETSB is configuring the system to be able to communicate with the currently used channels, many will be abandoned after Peoria County emergency response agencies transition to the new network.

The ETSB will test the system for a full 30 days with Harris Corp., which built the infrastructure, before committing to it and activating agencies throughout the county.

?As long as the 30-day burn-in goes well and we accept the system, we?ll start switching people over, probably near the end of August,? Tuttle said. ?You want to find the issues now before you turn the system over to public safety operations.?

4815. STARCOM21 Talkgroup 1891

Yahoo group: StarCom21
Date: 2014-06-25 18:10:17 UTC
From: Kevin O'Rourke
Topic: 4815 Message: 4815

I heard a handful of what I believe might have been
Barrington-Countryside FPD units this past Sunday afternoon on STARCOM21
TG 1891 (possibly called "FIRE 2"???). RIDs were in the 71077 ("Engine
382") to 71088 range. This TG is on the list of "unknowns" on the
Radio Reference SC21 database page, and is just one of a handful in the
same range:

*TG 1876 - Site 115/149
*TG 1877 - Site 149 (10/2013)
*TG 1878 - Sites 108 and 115/149 RID 260660 - Streamwood PD unit?
*TG 1880 - Site 115/149; T101 10/18/13
*TG 1891 - Site 108 (10/22/13)
*TG 1894 - Site 149 (10/18/13)

Does anyone have any additional information on the identity/usage of
these talkgroups or know what group/agencies/area the 71xxx RIDs might
be assigned to?

Thanks....

I caught an Engine 3xx, I believe on Tuesday that was calling Red Center
for a radio test as well. Unsure of the radio ID, didn't watch the screen
on the scanner to observe.

4817. New P25 ISSI Features Set to Boost Demand

New P25 ISSI Features Set to Boost Demand

July 02, 2014

By Sandra Wendelken, Editor <mailto:swendelken@...>

Several jurisdictions are looking to integrate the latest version of the Project 25 (P25) Inter Subsystem Interface (ISSI) into their statewide networks. Officials said the latest versions of ISSI products include more functionality and are easier to use than original versions.

The ISSI standard, first commercially implemented in 2010 <http://www.radioresourcemag.com/onlyonline.cfm?OnlyOnlineID=189>, aims to connect disparate P25 networks, regardless of vendor. For example, an ISSI gateway could connect a standalone Motorola Solutions P25 network to a Harris P25 network.

ISSI technology has not been widely deployed for various reasons including cost, complicated manual management and roaming from one P25 system to another, and lack of a Compliance Assessment Program (CAP) for the ISSI standard.

EF Johnson executives said the demand for the ISSI is increasing because of increased competition in the market. "Customers are being educated and learning more about the functionality, and there is more competition in the marketplace," said Arindam Roy, EF Johnson director of product management for systems. "Customers are deploying systems from different vendors. As competition is growing, the need for interoperability between vendors is increasing. The vendors are working together to provide that seamless interoperability."

Roy said that although there are no CAP interoperability tests yet, vendors are working with each other to test their ISSI products. "The vendors are working together to provide that seamless interoperability. As this demand grows and we see more deployments, you'll see there is more push for CAP."

The latest Harris P25 ISSI includes a site adjacency feature that allows radios to automatically roam between Radio Frequency Subsystems (RFSSs), said Tom Burkett, Harris Public Safety and Professional Communications (PSPC) product manager. "This means that the user's radios can now receive the site adjacency information through the ISSI for sites on foreign RFSSs and its home system, which then provides them with information to spread the roaming decisions to sites beyond the home systems," Burkett said. "For example, in the event of a car chase where an officer is traveling down an interstate and leaves his home system

range, the officer would just need to focus on the incident and the radio would automatically transition to the new system without any intervention by the officer and he/she would be able to communicate the entire time with dispatch and other responding units. This feature is a large step up from the manual roaming that is available today, which requires that both systems support this feature to enable radios to roam."

Tait Communications has a new ISSI that works between different vendors and will be undertaking further development work to expand support for Phase 2 operation, said Bill Fillman, Tait vice president of market development and solution engineering. EF Johnson's Roy said the EF Johnson ISSI product has all the functionality that is part of the ISSI standard.

Both Missouri and Maryland have plans for the newest version of Motorola's ISSI product, albeit linking one Motorola system to another Motorola system. Motorola's latest product version of the technology eases management requirements, offers seamless roaming between networks and dynamically assigns unit identifications (IDs) compared to its original ISSI.1 product.

/*The state of Missouri plans to deploy Motorola's ISSI 8000 system interface later this year to connect its statewide P25 VHF/700 MHz network to the Kansas City (Missouri) Police Department 800 MHz system, which is part of the Metropolitan Area Regional Radio System (MARRS). Motorola supplied both networks, and the upgrade requires both jurisdictions to have Motorola's system 7.13 or a later version.*/

/**/

/*In July, the state of Missouri and the Kansas City Police Department are upgrading their P25 systems to 7.14 software. The ISSI packet gateway will be added to each system's master site.*/

/**/

/*"ISSI.1 was an interim solution," said Steve Devine, assistant director for the Missouri Statewide Interoperability Network (MOSWIN). "It wasn't anyone's perfect solution. It allowed baseband audio to be passed between systems, and roaming between systems required a knob change; there was no seamless transition between the systems. But it provided limited intersystem interoperability when implemented. It wasn't a tool that made intersystem connections and roaming between systems easy from a system administration perspective but it did provide interoperability. Then the goal was to come up with a better ISSI, and that's what we're seeing in ISSI 8000."*/

/**/

/*Devine said the updated ISSI is much easier to manage than the original product. A system administrator can pre-determine the parameters --- unit IDs, talk groups, talk paths and sites --- for one

network's users to have access to the other network. The update also includes an option to allow seamless roaming for users, removing the need for users to turn a knob on their radios to move to a neighboring radio system.*/

The ability for different systems using different system identifiers, regardless of the manufacturer, to be interconnected and promote interoperability is a powerful tool that can allow agencies to leverage all radio investments in their communities, not just those that were built by one agency. Using other agencies' resources for interoperability or daily communications does, however, require the cooperation and approval of the other system administrator and owner, he said.

Devine said going forward that if the jurisdictions upgrade P25 system software at different times, the ISSI technology will still work. "This is the way it's been explained to us," he said. "These are our hopes."

A Maryland First Responders Interoperable Radio System Team (Maryland FiRST) ISSI pilot is planned for mid-2015. The pilot will be with Prince George's County, which deployed a P25 Phase 2 700 MHz system in 2010 and has limited coverage from Maryland FiRST, the statewide network. "This will allow us to test roaming characteristics as radios move from one system to the other," said Ray Lehr, Maryland statewide interoperability director. "Both the county and state have recently upgraded to Motorola's operating software version 7.14, which will allow for us to take advantage of the ISSI 8000 features."

Lehr said communications officers could view the radio alias as well as a notation that a radio has roamed onto the system with Motorola's latest ISSI technology. "This will increase awareness for dispatchers and incident commanders as multiple agencies work together on emergencies," he said. "Maryland believes that this is a substantial benefit from the first-generation product that requires users to make manual changes in talk group selection."

However, Lehr said there are still limitations, including no support for over-the-air programming (OTAP), over-the-air rekeying (OAR) and other features where data-driven functionality is required. "As an example, the ISSI standard does not allow for a radio to be remotely disabled when roaming off of Maryland FiRST," Lehr said. "There are also limitations in the transmission of user location data when roaming from Maryland FiRST and onto a 'foreign' system. These are all important functions to support first responders, which are being addressed."

If the initial pilot of ISSI proves successful, the state can decrease the number of sites it will deploy in other P25 Phase 2 jurisdictions. In Carroll County, for example, state plans originally called for deployment of FiRST equipment at six sites. With ISSI connectivity, the state can reduce that number to three sites in the county and receive a substantial amount of "on street" coverage from sites in surrounding counties. State system users would then only roam onto the Carroll

County P25 system when they enter buildings in the county not receiving in-building signals from FiRST.

The state could use the ISSI to link a Motorola system with a Harris network in the future. St. Mary's County has deployed a Harris P25 Phase 2 system and will present the first opportunity to test the upgraded ISSI capabilities between two different vendor's systems.

"We currently operate Motorola APX radios in the Maryland State Police Barrack in St. Mary's County, and they have tested their Harris radios on the MD FiRST system," Lehr said. "While some small programming issues were encountered, both vendors' engineering staff worked cooperatively to resolve those issues, and users are happy with the results of true P25 compatibility for voice transmissions."

Maryland will share its results with other jurisdictions considering the ISSI, Lehr said. RCC Consultants' Director Charles Bryson is the technical lead behind Maryland's ISSI strategy.

"While ISSI is a standard, this does not mean that any given vendor currently supports all functionality, and it will take the support of both vendors to enable any given function," said Tait's Fillman. "The potential impact on traffic capacity of having Phase 1 radios roam on to a Phase 2 network needs to be understood in advance of the roaming, to avoid capacity issues."

From: Mike Curtis
Topic: 4804 Message: 4818

In the last few days I’ve heard D6 dispatch working Dist 8 and Dist 10 on their respective talkgroups so it looks like they’ve made the switch (or are in the process of making it)

From: StarCom21@yahoogroups.com [mailto:StarCom21@yahoogroups.com]
Sent: Wednesday, June 18, 2014 5:19 AM
To: CARMA List; Scan Illinois; STARCOM21-yahoogroups
Subject: [StarCom21] ISP District 8, 10 21 communications consolidating at District 6

According to the Peoria Journal-Star at

http://www.pjstar.com/article/20140615/NEWS/140619347

State Police communications for Districts 8 (Metamora/Peoria), 10 (Pesotum) and 21 (Ashkum) will relocate to Pontiac (District 6). DuQuoin (District 13) has previously merged communications with Springfield (District 9).
Illinois is moving to regional communications centers statewide, it is likely that eventually they will only have a handful of communications centers.

Yep, District 8 "Peoria" dispatch signed off at 8AM on 7/21, with dispatch switching to Pontiac. Hearing some of the same dispatchers handle District

8 at Pontiac so it appears some of them did move over there.

Yes with the mergers the dispatchers do move around. I don't know where the information keeps coming from that DuQuoin was merged with Springfield. D13 took on the dispatching and merged communications for D13, D19, D12, and D22. DuQuoin is still dispatching all those as well. Maybe at one time they were going to move DuQuoin dispatching to Springfield?

DECATUR --- In 2012, the radio communication system used by several city departments went silent for four days after damage from a lightning strike.

Because the system was more than 20 years old, parts to fix it ultimately had to be purchased from eBay, said Public Works Director Rick Marley. Foremen could use their cellphones to communicate, but otherwise, employees in the field were unable to talk to each other.

In the event of a tornado or other disaster, at a time when coordination among city staff could be vital, the absence of a reliable radio system could make such communication impossible.

The Decatur City Council hoped to prevent such a scenario from occurring ever again with a vote Monday night. Members approved a $1.4 million contract with Motorola Solutions, Inc., to replace the 25-year-old eight-channel analog system used by Public Works, Water Management and the Decatur Public Transit System.

Instead, the departments will use StarCom21, a state-wide radio system that the Decatur Police Department, Decatur Fire Department and Macon County Sheriff's Office began using in 2009.

"It's a system that has a lot of redundancy built into it," Marley said. "Right now, our radio system consists of one tower and one transmitter, so when that thing goes down, that one tower gets hit, then we're out of business."

The city will also pay a $90,000 annual user fee for the maintenance of the system. Included in that cost are upgrades to the system every two years.

The fees are locked in until 2022, and City Manager Ryan McCrady said the city could return to managing its own system if user fees become too high in the future.

The council also approved borrowing up to $1.4 million from Soy Capital Bank to finance the system's cost. The local bank offered a seven-year loan at 2.8 percent interest. The Water Management department's portion of the project will be paid out of the water capital fund, according to a city council memo.

The new system could be in use by November.

4822. IWARN License Renewal Fee

Yahoo group: StarCom21
Date: 2014-08-07 01:09:28 UTC
From: starcom21@RadioReference.com
Topic: 4822 Message: 4822

I-WARN was originally for the Illinois Weather Alert Radio Network along
with SARMA (Search and Rescue Mutual Aid)

https://fundly.com/iwarn-fcc-license-renewal-fee?noguide=1#

I need to renew my FCC license. I provide frequencies for Search and
Rescue teams, Weather Spotters and fire department training.
WQBB433 provides 152.285, 157.545 in bases/mobiles and licensed for one
repeater (that is not currently in operation).
These can be used as mobiles, statewide in any part of IL, MO and IN.
wireless2.fcc.gov/UlsApp/UlsSearch/license.jsp?licKey=2653667

I need help with funding to renew license. I paid for the initial
Frequency Coordination and FCC fees for both licenses, originally, with
help from another sponsor (Tri-State Search and Rescue, at the time)

If your not comfortable with this, or can not help - that is fine.

WQCI585, which provides 155.205 (Public Safety) throughout IL as mobiles
and temporary bases (command post)
http://wireless2.fcc.gov/UlsApp/UlsSearch/licenseFreqSum.jsp?licKey=2700990
This license will be up 3/11/15
Thanks for your concern
Terry Weatherford, WX9SAR (formerly N9MAE)

4823. Mystery SC21 Talkgroups

Yahoo group: StarCom21
Date: 2014-08-13 15:17:47 UTC
From: kevin.orourke1@...
Topic: 4823 Message: 4823

At the top of the Radio Reference SC21 database page is a list of talkgroups that have been observed in use but not identified. In an effort to get some of these identified and added to the database, I thought I'd post the list here. Please take a look and advise if you have additional information on any of these:
Unidentified Talkgroups*TG 1029 - possibly Dixon Police (traffic heard, unit assisting Dixon car at address in Dixon 12/20/13)*TG 1178 - Site 146 (2012) - McHenry County?*TG 1179 - Comms re: tank level percents (3/28/2014) - McHenry County*TG 1444 - Site 101 (6/4/14)*TG 1445 - Site 101 (6/8/14)*TG 1555 - Site 149 (10/2013)*TG 1557 - Site 126 (5/28/14)*TG 1565 - Site 149 (10/25/13)*TG 1574 - Encrypted -- RIDs - 315005, -018, -020, -030 (Possibly ISP Zone 1?) Heard Spfld (8/13)*TG 1576 - Sites 115, 126 and 149 (2012) Cook/Lake (12/13)*TG 1578 - Sites 115, 126 and 149 (2012)*TG 1579 - Site 126 (heard Lake Co/Elgin area, Encrypted) (2/14) Site 149 (5/14)*TG 1593 - Site 115/149*TG 1594 - Site 115/149*TG 1595 - Site 115/149*TG 1596 - Site 115/149*TG 1855 - Ogle Site (12/13)*TG 1876 - Site 115/149*TG 1877 - Site 149 (10/2013)*TG 1878 - Rolling Meadows FD Engine 15 calling CenCom, IDing TG? as _______ Region Fire (7/14)*TG 1880 - Site 115/149; T101 10/18/13*TG 1891 - Barrington-area Fire TG "FIRE 2" (6/14)*TG 1894 - Site 149 (10/18/13)*TG 1976 - 75xxx RIDs noted (Site 101, date?)*TG 2551 - Key-up by RID 273132 (Glen Ellyn PD) (Site 101, 8/13)*TG 2577 - Site 102 (2012)*TG 2578 - Site 102 (2012), Site 101 (7/11/14)*TG 2582 - Test counts, RID 83103 (Site 101, 9/12)*TG 2586 - Test counts, RIDs 83103, 83902 (Site 101, 9/12)*TGs 2775-2791 - NWCD Fire Admin & Mutual Aid use?*TG 2779 - Site 149 (2/1/14)*TGs 2793-2829 - NWCD Public Works use?*TG 2951 - Radio checks by RIDs 86014 ("Radio 1") - IL Department of Corrections unit?, came here from TG 4501 (Site 101, 8/13)
*TGs 3071-3086 - NWCD All Talk Groups (ATGs)?*TGs 3101-3110 - NWCD Systemwide, Statewide, Park Ranger use?*TG 3104 - Site 149 (2/1/14)*TGs 3117-3188 - NWCD Miscellaneous Public Works, Police Tactical use?*TG 3157 - Site 149 (2/5/14)*TG 3158 - NWCD Public Works use (town unknown)*TG 3209 - Site 113 (2013)*TG 3210 - Site 113 (11/19/13)*TG 3245 - Site 113 (7/31/14)*TG 3302 - Site 108 (9/23/13)*TG 3217 - Site 113 (8/1/14)*TG 3326 - Radio Shop (RID 230000) w/test counts (T101, 1/6/14)*TG 3329 - Radio Shop (RID 230000) w/test counts (T101, 1/6/14)*TG 3351 - T301? Encrypted (8/8/14)*TG 3443 - Site 149 (2013)*TG 3454 - Site 120 (7/11/14) & Site 108 (7/20/14)*TG 3455 - unknown units keying-up (T101, 9/13)*TG 3458 - Site108 (Heard testing counts 11/15/13)*TG 3461 - 2 men talking, possibly police, talking on their portables re: thier squard room (7/13)*TG 3521 - Site 120 (6/11/14) & Site 108 (7/20/14)*TG 3526 - users discussing road conditions - snow plow drivers? (2/14)*TG 3531 - Site 131 (LaSalle) - RID 108001, Lanark PD? (Carroll County) (2/14)*TG 3542 - Site 101, Radio shop testing w/1090xx RIDs (12/13) - possibly Elgin Community College Police?*TG 3543 - Site 101, Radio shop testing w/1090xx RIDs (12/13) - possibly Elgin Community College Police?*TG 3544 - Site 101, Radio shop testing w/1090xx RIDs (12/13) - possibly Elgin Community College Police?*TG 3571 - Site 101, RID 332, uniteligible traffic (12/13)*TG 3572 - Site 101/149 (12/9/13)*TG 3575 - Site 149 (12/9/13)*TG 3576 - Site 149 (12/9/13)
*TG 4051 - Present in IDPH radios but not programmed as a talkgroup*TG 4052 - Present in IDPH radios but not programmed as a talkgroup*TG 4053 - Present in IDPH radios but not programmed as a talkgroup*TG 4071 - Site 324 - Nilwood (2 units talking to each other) (10/13)*TG 4154 - Site 101?, 11/11*TG 4500 - Site 101 (4/24/14 RID 6400xx)*TG 4514 - Towers 101 & 102 Encrypted Heard on 06_04_2014*TG 4504 - RID 35085 key-ups, likely IL Department of Corrections (parole agent?) - Site 101 (12/13)*TG 4511 - Site 113 - Illinois Department

of Corrections? (10/13)*TG 5128 - RID 350014 (IDOC unit?) w/ key-ups on TG5127 (IL Atty General?) and TG5128 (Site 101, 9/13) RID 436102 T236 (1/14)*TG 5301 - Metro East task force? 443xxx RIDs (3/13)*TG 5306 - UID 443027 key-up (7/29/14)*TG 5308 - sounded like simulcast of ? RID 701691 - Madison County Jail unit? (10/13)*TG 5310 - see TG 5301 (above)*TG 5311 - see TG 5301 (above)*TG 5313 - see TG 5301 (above) - Site 102*TG 5526 - Electric utility operations? (10/12)*TG 5536 - dispatcher with unit (heard Clinton area 6/14)*TG 5611 - Site 149 (10/22/13) ENC SIte 203 (3/14) Springfield sites (4/14) Logan Co area (5/15)
*TG 7818 - Site 101 (6/11/14)*TG 30380 - unknown police activity (5/14)

Thanks in advance!

4824. Mystery STARCOM21 Talkgroups Take 2

Yahoo group: StarCom21
Date: 2014-08-15 15:03:17 UTC
From: Kevin O'Rourke
Topic: 4824 Message: 4824

The formatting in my first attempt to post the list of mystery SC21 talkgroups got all messed up - let's see if this works any better:

TG 1029 - possibly Dixon Police (traffic heard, unit assisting Dixon car at address in Dixon 12/20/13)
TG 1178 - Site 146 (2012) - McHenry County?
TG 1179 - Comms re: tank level percents (3/28/2014) - McHenry County
TG 1444 - Site 101 (6/4/14)
TG 1445 - Site 101 (6/8/14)
TG 1555 - Site 149 (10/2013)
TG 1557 - Site 126 (5/28/14)
TG 1565 - Site 149 (10/25/13)
TG 1574 - Encrypted -- RIDs - 315005, -018, -020, -030 (Possibly ISP Zone 1?) Heard Spfld (8/13)
TG 1576 - Sites 115, 126 and 149 (2012) Cook/Lake (12/13)
TG 1578 - Sites 115, 126 and 149 (2012)
TG 1579 - Site 126 (heard Lake Co/Elgin area, Encrypted) (2/14) Site 149 (5/14)
TG 1593 - Site 115/149
TG 1594 - Site 115/149
TG 1595 - Site 115/149
TG 1596 - Site 115/149
TG 1855 - Ogle Site (12/13)
TG 1876 - Site 115/149
TG 1877 - Site 149 (10/2013)
TG 1878 - Rolling Meadows FD Engine 15 calling CenCom, IDing TG? as _______ Region Fire (7/14)
TG 1880 - Site 115/149; T101 10/18/13
TG 1891 - Barrington-area Fire TG "FIRE 2" (6/14)
TG 1894 - Site 149 (10/18/13)
TG 1976 - 75xxx RIDs noted (Site 101, date?)
TG 2551 - Key-up by RID 273132 (Glen Ellyn PD) (Site 101, 8/13)
TG 2577 - Site 102 (2012)
TG 2578 - Site 102 (2012), Site 101 (7/11/14)
TG 2582 - Test counts, RID 83103 (Site 101, 9/12)
TG 2586 - Test counts, RIDs 83103, 83902 (Site 101, 9/12)
TGs 2775-2791 - NWCD Fire Admin & Mutual Aid use?
TG 2779 - Site 149 (2/1/14)
TGs 2793-2829 - NWCD Public Works use?
TG 2951 - Radio checks by RIDs 86014 ("Radio 1") - IL Department of Corrections unit?, came here from TG 4501 (Site 101, 8/13)
TGs 3071-3086 - NWCD All Talk Groups (ATGs)?
TGs 3101-3110 - NWCD Systemwide, Statewide, Park Ranger use?
TG 3104 - Site 149 (2/1/14)
TGs 3117-3188 - NWCD Miscellaneous Public Works, Police Tactical use?

TG 3157 - Site 149 (2/5/14)
TG 3158 - NWCD Public Works use (town unknown)
TG 3209 - Site 113 (2013)

Decatur reconsiders radios after lightning strike

Posted 10:03 am, August 18, 2014, by Associated Press
<http://fox2now.com/author/associated-press/>

DECATUR, IL (AP) _ The Decatur City Council will consider rescinding its approval of a $1.4 million contract for radio communications after officials say a backup system failed when lightning knocked it out.

The Decatur Herald and Review <http://bit.ly/1tcD2nj%20> reports that the council will meet on Monday.

Officials had voted to purchase a Motorola Solutions Inc. system called StarCom21. It's been used by city police and the Macon County Sheriff's Department since 2009.

But lightning knocked out StarCom21 on Aug. 5 and a backup system failed. So law enforcement agencies had to revert to the former analog radio system for 21 hours.

Officials say the system failed again for 35 minutes on Aug. 9.

A Motorola Solutions spokesman contacted Sunday by The Associated Press did not immediately return a call seeking comment.

4827. Looks Like D2 IDoT Moving to Starcom

Yahoo group: StarCom21
Date: 2014-09-02 15:55:25 UTC
From: Mike Curtis
Topic: 4827 Message: 4827

Seeing lots of new radio IDs consistent with D2 IDoT units (362xxx) affiliating with talkgroups in the 3736 - 3741 range. These would be consistent with the "local" talkgroups in other IDoT districts (D4, D5, D6 that I know of)

Last Thursday, someone reported hearing RID 350001 on TG 3742 on Site 229 (Normal). That TG is listed with the other "unknown" TGs at the top of the Radio Reference SC21 database page.

I've been out of the loop on the changing to phase 2, can anyone enlighten me what this means. Of course I know that it will require a scanner that will do phase 2.
But actually just want to know more about the phase 2 and what it will provide.

It is basically a form of TDMA. This allows 2 voice conversations on the same radio channel at the same time, effectively doubling the capacity of a site. For example, if the local site has 8 channels it can normally support 7 voice paths since one channel is used for data. With Phase 2 you can have up to 14 voice paths with 8 radio channels.

This requires that all radios on the system be capable of TDMA service.

For scannists it requires us to have one of the 3 radios capable of Phase 2/TDMA (PSR800, BCD436HP or BCD536HP).

Yeah I've logged radio IDs 650001, 002, and 003 off and on since Nov. 211 - Not sure who they are but they've affiliated with IDoT Dist. 3A (1409), IDoT Dist. 4A (4478), DPH Region 7 (4632), and even ITTF Incident 5 (30341) in addition to 3741.

4835. Help needed - Having trouble understanding HP1/Starcom programming

Yahoo group: StarCom21
Date: 2014-09-12 01:02:27 UTC
From: ray@...
Topic: 4835 Message: 4835

Hey all!

I'm certainly not a newbie to scanners. But I never really got into the trunking systems, and also know very little about the Starcom21 system. And now I have a Uniden HP1, and have been having some mixed results when trying to program the thing myself.

Without going into a whole bunch of detail here... Would someone be willing to contact me off-group and help me through the basics of what I need to know about adding these departments into my HP1?

I am in the Freeport/Stephenson County area. But also travel into the neighboring counties frequently. My programming seems to be working well for Stephenson, but not so well for Carroll, Jo Daviess, etc.

Thanks!

4836. Scanner Forum at Peoria Superfest Sept 20.

Yahoo group: StarCom21
Date: 2014-09-12 14:53:30 UTC
From: John Coker
Topic: 4836 Message: 4836

I will do my normal Scanner Forum on Saturday, September 20th at the Peoria Superfest. The scheduled time is 1 pm. Not sure yet what room we will be in, but probably in the “Forums Bldg”, the AMEREN CILCO building in front of the Youth Bldg.

Please let me know if you plan to come, and I’ll make sure we have enough room. Maybe a door prize or two.
The main topics will probably gravitate to Starcom21 and the new Peoria City-County P25 system. But all scanning subjects are open to discussion, so bring your input.

This year’s Superfest will be bigger than it’s been in many years. The east side of the Flea Market is already completely sold out, and the west side is bigger too. Both indoor buildings are going to be full for once. Ham Station has given up on hamfests, but we’ve replaced them with 2 new stores, Ham World out of Alabama, and Hub City Amateur Radio Sales out of Hattiesburg, MS. They’re both trying to bring as many Yaesu Fusion radios as they can shake up. Most of the other regular vendors will be back, although we’ve had to move some to accommodate everyone into the buildings.
The guest speaker is Gordon West, who will also do a special class for license class instructors on Friday.
Norm Schrein and Mr. Bearcat won’t be there, so no ‘scanner sales’ by a known vendor at this time. But there will undoubtedly be some used ones in the Flea Market. I’ll have some at tables in the Opera House.

4838. SC21 TGs 1676-1679

Yahoo group: StarCom21
Date: 2014-09-22 15:04:04 UTC
From: Kevin O'Rourke
Topic: 4838 Message: 4838

In the Radio Reference STARCOM21 database, talkgroups 1676-1679 are listed as being used in or by Stephenson County. As far as TGs 1677 and 1678 in particular, I've always had my doubts about that affiliation but with little or no support to back them up.

While reviewing SC21 loggings earlier this month, I heard a couple of 429xxx RIDs on TG 1678. One unit was doing radio checks from various locations and the other was giving signal level reports. One of the locations mentioned was Lake Cook and Quentin, which is in Deer Park and on the border between Lake and Cook Counties. I've logged many 429xxx RIDs into the Radio Reference SC21 RID Wiki - they all appear to be either MABAS, IL Urban Search & Rescue Task Force 1 or UCP 13 (based in Wauconda).

I strongly suspect that (at least) TGs 1677 & 1678 are used by MABAS, US&R IL-TF1 or a related group/agency. Use of encryption has been reported on these TGs in the past. I suspect that they might have been affiliated with Stephenson County due to their "proximity" to the county's 1650-series TGs.

Does anyone have other observations for TGs 1676-1679 or know for sure?

Thanks!

4840. Decatur Services to go to SC21 (...again)

Yahoo group: StarCom21
Date: 2014-10-08 22:15:34 UTC
From: SC21
Topic: 4840 Message: 4840

http://herald-review.com/business/local/05362288-2050-55d3-b5fd-8f03fc0a13b5.html

In other business, the council voted to approve a $1.4 million contract with Motorola Solutions Inc., seemingly ending the city's long, winding path toward a new radio system for its departments of Public Works and Water Management, and the Decatur Public Transit System.

Public Works director Rick Marley recalled the well-known quote from Friedrich Nietzsche: ?What does not kill me makes me stronger.? So it was with the radio systems, he said, characterizing the three-year journey toward the contract as ?a struggle.?

City officials began to examine their need for a new radio system in 2011, he said, but the point was driven home in 2012, when a lightning strike downed the 25-year-old eight-channel system that the three departments used.

All appeared resolved at the council's Aug. 4 meeting, when it approved the contract with Motorola to replace the old system with StarCom21, a statewide radio system that the police and fire departments and Macon County Sheriff's Office began using in 2009.

But hours later, a lightning strike took out the StarCom system for 21 hours, causing 24 local law enforcement agencies to turn to their backup: the outdated system that the council had just voted to replace.

?At the time that that happened ... nobody could see how this was going to turn out,? Marley said. ?I certainly couldn't tell. There was a lot of dismay, a lot of concern.?

As a result, the council rescinded its approval of the Motorola contract at its Aug. 18 meeting while representatives of the company worked with the city and police department to find out what went wrong.

On Monday, McCrady recommended approval of the original contract to the council, which voted unanimously in favor. Councilmen Larry Foster and Pat Laegeler were absent.

Motorola representatives determined that the police radios encountered a problem Aug. 5 because they could not manually switch to another radio tower when the first one went down, McCrady said. Because the tower was still broadcasting a signal, the radios did not automatically switch to a new tower, as they are designed to do in similar situations.

Motorola will reprogram the law enforcement radios free of charge so that they can be manually turned, McCrady said. The city will also conduct frequent tests to simulate outages and make sure that the system

can still function.

He said the current system needed to be replaced because of its age, which made finding replacement parts very difficult, and the StarCom system remains the best option.

?The issues that arose the night of Aug. 5 have been resolved,? McCrady said. ?If it did anything, it made our situation stronger. ? I think it's the best solution that we can move forward with.?

Marley called the long outage a ?fluke event,? as the 300-foot tower is somewhat regularly struck by lightning but usually does not cause problems with the StarCom system.

?Could it happen again? Probably. But on the other hand, it wouldn't be the exact same failure,? he said. ?Anything that human beings create can and will have some kind of failure to them at one time or another. You work and struggle to be as careful as you can, but mistakes and errors and problems occur with some regularity.?

4841. Wheaton IL Hamfest - January 2015 - Advance Tickets Now Available!

WCRA MID-WINTER HAMFEST

Sunday, January 18, 2015

The 2014 WCRA Mid-Winter Hamfest will be held at the Kane County Fairgrounds Exposition Center in St. Charles, Illinois on Sunday, January 18, 2015. This is the same location as last year!

We're planning a great hamfest that will include the usual flea market and commercial vendors but also several interesting and informative breakout sessions, on-site VE Testing, hourly prizes and more! Hamfest hours are 8am to 1pm and there will be plenty of FREE parking.

The confirmed forums are:

. The Fascinating World of High Altitude Ballooning

. Using Drones in Amateur Radio Antenna Installation

. A third forum is in the planning stage

Flea market tables may be reserved in advance for $25, $35 with electricity. After January 7th tables, if available, will be $30, $40 with electricity. Everyone at your table must have a hamfest admission ticket. Advance admission tickets are a bargain at $8 each and include four prize stubs! Day-Of tickets will be $10 and have only one prize stub. Children under 12-years of age are admitted free as are boy and girl scouts in uniform.

Advance tickets and tables can be purchased by mail. Send a self-addressed, stamped envelope plus your check or money order made out to WCRA Hamfest to:

WCRA Hamfest

PO Box QSL

Wheaton, IL 60187-1055

Your order must reach us no later than January 3, 2015 to ensure timely delivery.

General questions about the hamfest? Call us at (630) 604-0157 or via e-mail at info@.... Ticket questions should be directed to me. N9DKO@....

Date: 2014-12-10 22:37:37 UTC
From: Rich Bauer
Topic: 4841 Message: 4846

WCRA MID-WINTER HAMFEST

Sunday, January 18, 2015

The 2014 WCRA Mid-Winter Hamfest will be held at the Kane County Fairgrounds Exposition Center in St. Charles, Illinois on Sunday, January 18, 2015. This is the same location as last year!

We're planning a great hamfest that will include the usual flea market and commercial vendors but also several interesting and informative breakout sessions, on-site VE Testing, hourly prizes and more! Hamfest hours are 8am to 1pm and there will be plenty of FREE parking.

The confirmed forums are:

. The Fascinating World of High Altitude Ballooning

. Using Drones in Amateur Radio Antenna Installation

. Tower Safety

Flea market tables may be reserved in advance for $25, $35 with electricity. After January 7th tables, if available, will be $30, $40 with electricity. Everyone at your table must have a hamfest admission ticket. Advance admission tickets are a bargain at $8 each and include four prize stubs! Day-Of tickets will be $10 and have only one prize stub. Children under 12-years of age are admitted free as are boy and girl scouts in uniform.

Advance tickets and tables can be purchased by mail. Send a self-addressed, stamped envelope plus your check or money order made out to WCRA Hamfest to:

WCRA Hamfest

PO Box QSL

Wheaton, IL 60187-1055

Your order must reach us no later than January 3, 2015 to ensure timely delivery.

General questions about the hamfest? Call us at (630) 604-0157 or via e-mail at info@.... Ticket questions should be directed to me. N9DKO@....

Wheaton Community Radio Amateurs

4847. WCRA HAMFEST - IMPORTANT UPDATE INFORMATION - PLEASE READ

Yahoo group: StarCom21
Date: 2014-12-15 23:52:22 UTC
From: Rich Bauer
Topic: 4847 Message: 4847

The Wheaton Community Radio Amateurs hamfest will be held on Sunday, January 18, 2015 at the Kane County Fairgrounds located on Randall Road between Illinois Rt 38 and Illinois Route 64 in St. Charles, Illinois. Doors will open at 8am.

The City of St. Charles has tossed us a curve ball. The city is no longer permitting northbound Randall Road traffic turn turn left into the fairgrounds. As a result the gate used in previous years will not be open. All traffic, northbound and southbound, will turn west onto Oak Street from Randall Road and then follow the signs to the hall. Oak Street is located about 1/4-1/2 mile north of Illinois Route 38. There is a traffic light at Oak Street and there will be signage marking the location. The attached map shows the traffic pattern.

<https://www.dropbox.com/s/nho4is0xan7kisf/hamfest%20traffic.pdf?dl=0>
or
<http://tinyurl.com/knrq65r>

WCRA apologizes for this last minute change. We hope everyone has a great time at the hamfest!

From: skywalker.unit631@...
Topic: 4849 Message: 4849

I'm hoping that someone here can help me. I have a Radio Shack Pro-2096 and for the past few Months I have been trying to program & RX the Starcom21 System located in Marshall IL., Martinsville IL. & Paris IL. with no luck whatsoever. I have used 2 different programming softwares (ARC96 & Win96) and no matter how I programed the radio i still can't RX them sites. I don't even hear the data signals from any of the control frequencies. I'm hoping someone here is using or have used this radio on this system that can help me. I do know there is no problem with my antenna or its location, because I had a friend come over with his handheld scanner to check the antenna and he WAS able to RX them sites with no problems. The 2096 does RX the Hoosier Safe-T System (MOT) & The new Hoosier Safe-T System P25 system that is being put on air here very soon. in Terre Haute, IN. Just not Starcom. I'm at my wits ends and about to pull my hair out. Thanks!

4850. College/University Police on SC21 TG 3571

Yahoo group: StarCom21

From: Kevin O'Rourke
Topic: 4850 Message: 4850

A Radio Reference contributor recently reported hearing what sounds like college or university public safety / police operations on SC21 TG 3571. I'm hoping that he might be able to provide RID numbers and additional information (like the Site he's hearing this traffic on) that might help determine who the user is.

In the mean time, is anyone else hearing this traffic or has anyone determined who the user is?

Thanks in advance

Yes it’s NIU PD with radio IDs in the 1122xx and 1123xxx range (Dispatch is RID 112200). There are other NIU radio IDs in the 112xxx range and I’ve heard traffic on TG 3577 as well (student escorts or services maybe?) with RIDs in the 1125xx range.

Thanks to Brian and Mike for the NIU talkgroup and RID information. Up until now, TG 3571 was on the list of unidentified talkgroups and I don't believe 3577 had ever been listed.

Talkgroups 3572, 3575 and 3576 are still on the list of unidentified talkgroups. Perhaps they're used by NIU as well? Any information on these or other NIU talkgroups would be greatly appreciated!

As always, SC21 RIDs can be found/updated at http://tinyurl.com/SC21-Wiki .

3580 should be added to the list of NIU talkgroups as well … I logged an affiliation to it from an NIU PD radio on T131 this morning.

I log denials to TGs 3571 and 3577 from time to time so 3580 may be a statewide (or at least wider area) TG than the others.

4857. SC21 2300xx RIDS, Kane County

Yahoo group: StarCom21
Date: 2015-02-18 22:16:16 UTC
From: Kevin O'Rourke
Topic: 4857 Message: 4857

Earlier this afternoon, I heard SC21 comms involving 2300xx RIDs on ITTF R4B TG30320. Other units working with these guys called them "Kane County" units.

Previous notes (1/2014) for 2300xx RIDs consist mainly of radio techs testing on TGs 3326 and 3329. These comms were heard on T101, nothing noted on those TGs on T101 since then.

Does anyone have notes regarding these RIDs or TGs?

Thanks in advance...

Unless I'm mistaken, I believe that the infrastructure belongs to Motorola and would be updated on their dime. The the cost of updating subscriber units and replacing those that won't do Phase 2, however, is a different matter.

Bob,

I'm retired from the state.... and, if I remember correctly, the state has a 20-year lease/buy contract with Motorola for the StarCom21 system where they (Motorola) have to implement any/all upgrades to the system when they become available. If that is the case, then Phase II will be implemented at no "extra" cost to the state, as required by the contract.

From: Mike Curtis
Topic: 4858 Message: 4863

Who will pay to upgrade the subscriber radios? I imagine the first adopters (Plainfield? ISP? Etc) all have radios that aren’t Phase II compatible.

Subject: RE: [StarCom21] STARCOM21 Schedule for Switching to TDMA (P25 Phase II)

Bob,

I'm retired from the state.... and, if I remember correctly, the state has a 20-year lease/buy contract with Motorola for the StarCom21 system where they (Motorola) have to implement any/all upgrades to the system when they become available. If that is the case, then Phase II will be implemented at no "extra" cost to the state, as required by the contract.

I will believe it when I see it. That is a whole lot of new infastructure that will have to be upgraded and put into place. Where is our already broke state going to find money to upgrade a radio system that us still pretty new?

Just my thoughts on it,
Bob

Remember that when sites are upgraded to Phase 2 (TDMA) that older Phase 1 (FDMA) radios will still work.

I am pretty sure that Motorola will not be buying the ISP and other agencies new radios. Any new radios bought from hereon out will have to be Phase 2 capable and Moto might make a deal available to encourage upgrades to help move along the transition. They might also set a "drop dead" date to have Phase 2 capable radios in operation some time contractually acceptable to the users.

4867. April Fools Fest 2015 - Noble,IL

Yahoo group: StarCom21
Date: 2015-03-04 04:55:08 UTC
From: deuce2005@...
Topic: 4867 Message: 4867

I am a little late on the invite to all, but wanting to get the information out there. In just under 1 month the April Fools Hamfest will be occurring in Noble,IL. This is located in Richland County in South Eastern Illinois. There will be at least 1 amateur antenna/accessory vendor - Amateur Accessories, along with an electronics vendor who has in the past had laptops, computers, and other parts for sale. We will have a tail gate section, and have concessions available on site. The entry fee is low, and each person who pays admission will be entered into the hourly door prize raffles. We will also have VE testing for those who are in need of upgrading or obtaining their licenses.

For information and or questions please visit
http://whereradio.webs.com/april-fools-fest http://whereradio.webs.com/april-fools-fest

Thank you and Hope to see you there!

I currently have a Pro-197 and a Pro-106 which I program with Butel's ARC500 software. it's very ez to use. the absence of a keypad on the 668 and dependence on the SD card raises red caution flags for me, especially if it took you a week to get it setup. I was hoping there'd be a software package that could be used on the 668.

Sorry if I didn’t explain properly

When you connect the 668 to a pc…it will install the software

That’s also how you get firmware and software and database updates

But this doesn’t use scan lists like you think of. I have a PSR600 and PSR500 and a 106 and now the 668

I must be brain dead, Cris. you're saying it comes with built-in software? when I pgm my 197 or 106 I load and run ARC500 on my PC. I can then manually add conv freqs or digital systems and TGIDs to the editor or I can connect to RR and download data directly into the editor for uploading to the radio. the 668 is programmed in a similar way only with built-in, proprietary software?

Yes, builtin software on the SD card that then gets installed on your pc/laptop

And you wind up with the RR database on your laptop/PC and then it updates on your SD card

You can import import from that source.

But way channel/systems are laid out/organized…very different

I think the reception is better than the 106, voice quality is very crisp

I’ve noticed some issues on simulcast that I can’t figure out

With PRSEdit software on my 500 and 106, for multi tower systems, I set ROAM, or STAT, or OFF OFF being my preference

Can’t find a way to do that with the 668 and it’s software

I wouldn’t expect any difference between the 106 and 651…same radio with different model because one was done by GRE and now the 651 is from Whistler

But the 668 is a different radio.

Are these good scanners? I have the Pro 106 & 197 and looking for a Phase II scanner.

Thanks if anyone can let me know if worth it

Aurora, Elgin, Naperville Mayors: Don't Just Worry About Safer Rail Cars, Worry About Safer Police/Fire Communications <http://www.arlingtoncardinal.com/2015/04/aurora-elgin-naperville-mayors-dont-just-worry-about-safer-rail-cars-worry-about-safer-policefire-communications/>

Sun April 26 2015 1:42 pm http://www.arlingtoncardinal.com/?p=73906- See more at: http://www.arlingtoncardinal.com/2015/04/aurora-elgin-naperville-mayors-dont-just-worry-about-safer-rail-cars-worry-about-safer-policefire-communications/#sthash.Ac8Pt14y.dpuf

Ironically, the three communities concerned in the Chicago Tribune article all use secret police radio communications systems that interfere with getting messages out. Elgin police department communications are encrypted in the Starcom21 radio system from Motorola. Aurora and Naperville police departments use a proprietary radio system from Harris Corporation, known as OpenSky, which is far from open to the endangered public in a major disaster. Harris Corporation is also the same company that makes Stingray products which allow police to intercept IMSI cell phone information --- and with FishHawk software can eavesdrop on supposedly private cell phone conversations. Porpoise software can monitor text messages.

The majority of police departments in the United States do not use encrypted or secret police communications for their public dispatch. Even a smaller minority use secret communication in the fire department. However, both Aurora and Naperville fire departments use secret radio communications equipment from Harris Corporation.

Much of the initial vital information in a major train disaster would not be heard by neighborhood watch groups or the media, and some important communications might not even be heard within fire departments involved with Aurora and Naperville. From local niche news groups to major news media in news choppers; none of the initial vital lifesaving information and ongoing lifesaving details would be available in a disaster in Aurora and Naperville. Police communications would be restricted in Elgin. An open state mutual aid channel, known as IFERN, would call in assistance from neighboring communities, but too long after the initial vital information was transmitted. Community leaders might claim that this channel is sufficient, but the information provided over this channel is too little, too late when seconds count. Officials might claim they have reverse 9-1-1 for effective notification, but these notices lack detail, are ineffective if people don't have a phone with them, and alert people sequentially. Would you like to be the last person on the call list? All possibilities for communication are absolutely necessary in a major disaster.

Additionally in regard to public notification and awareness, none of the three fire departments from Aurora, Elgin, or Naperville refer to having their own official fire department Twitter or Facebook accounts on their official websites --- as do many fire departments in the United States (Chicago, Los Angeles, New York, Sacramento). While Aurora, Elgin and Naperville have local government Twitter or Facebook accounts, those accounts won't be very reassuring or helpful in a major disaster when disaster notices are mixed in with information about water bills, vehicle stickers, special garbage pickup days, and food festivals, etc. Since Aurora and Naperville use secret fire department communications, they especially should have a robust social media notification system via Twitter and Facebook. Twitter and Facebook are effective ways to get out messages simultaneously to the media and the public. The social media sites tend to withstand extremely high Internet traffic.

The use of encrypted radio channels has also been blamed for delays in communications internally among fire departments. In February 2015, Washington D.C. Mayor Muriel Bowser ordered the D.C. fire department to stop encrypting fire radio channels after a deadly smoke incident aboard a Metro train. Encrypted radio channels with their added complexity were under "intense scrutiny" after firefighters at the scene of the trains couldn't communicate with crews and fire supervisors above ground.

DCFD Lt. Stephen Kuhn discussed arriving to an already evacuated train station and not learning of trapped passengers until underground. He then discussed dealing with non-working radios and heavy smoke. Overall, he told WUSA9 the radio issue was one of the most crippling problems for his team.

"I think if we had known, we meaning the (fire) department, had known initially that there was a train with people trapped on the train, it would've brought a lot larger response right away because that's what you need to evacuate a train right away is a lot of manpower."

-- DCFD Lt. Stephen Kuhn

The use of digital encrypted radios can cause added technical problems that block emergency communications merely because the technical complexity causes a failure, but it can also cause operational communications problems because firefighters responding from a remote community to a massive train disaster in Aurora or Naperville might not have the channel that is being used at the scene. While responding they won't have the full awareness and may lack full preparedness for the scope of the incident.

Big Scanner News at the Dayton Hamvention!

*/AOR to demonstrate their new AR-DV1 Multi-Mode Digital Receiver
at the Scanner Master booth #402 on Friday May 15th at 2 PM/*

Hello Peter,

We are so pleased and excited to announce that Taka Nakayama of AOR-USA
will be at our booth on Friday afternoon at theDayton Hamvention
<http://hamvention.org/>this year to demonstrate the eagerly awaited,
all-new, AR-DV1 receiver.

The DV1 is the first radio that provides decoding of many of the digital
formats which no other scanner is able to receive, including:

* MotoTrbo (tm)
* DMR (tm)
* dPMR (tm)
* NXDN (tm)

as well as numerous amateur radio digital formats from Yaesu, Kenwood,
Icom and Alinco. The radio will also decode APCO-25 Phase I digital as
well as conventional analog traffic. (The receiver does not trunk).
MotoTrbo systems are now used by public safety agencies and business
around the country and the world. NXDN is used by public safety as well
as railroads around the nation.

This radio is a huge breakthrough and we hope you'll join us at Dayton
this year to see the receiver in action, live at our booth. We also will
have a small stock available for purchase at the show. Gommert Buysen of
BuTel Software will once again be at our booth as well.

Rich Carlson Joins Scanner Master

/Our scanner expert team is now better than ever/

Scanner Master is extremely proud to announce that Rich Carlson, past-president of theChicago Area Radio Monitors Association (CARMA) <http://www.carmachicago.com/>and one of the nation's leading scanner experts, is now part of our team. Rich recently retired as a Sergeant for the Winnetka, Illinois, Police Department and is now assisting Scanner Master customers in choosing the right scanner for their area, answering technical questions and helping us to develop new products and services. Rich is a highly respected member of the monitoring community who has decades of experience with all types of scanners and communications receivers, antennas, software and accessories. He has a great knowledge of the radio systems that we all monitor as he himself helped to institute and manage many in his time. We couldn't bemore excited to have Rich on board.

DV-1 really sounds like a great radio.
But what disturbs me is that it doesn't offer Phase 2 nor Trunking.
You would think that a high priced radio like that would have all the modern bells and whistles,
but it's lacking terribly in those areas.

I'll pass.

Same thought I have about that scanner, useless as it does not trunk, which in my area is needed, and No P2 option. Really think the manufacture needs to revise the scanner. Not worth the price to be able to decode, might as well purchase the actual radio.Which I can legally. Anyone can purchase the radio legally once the FCC Type Acceptance goes thru, there is nothing restricted about it.

AFAIK there is no use of P25 Phase II on conventional channels and since this radio does not do trunking there is no need for Phase II decoding.

If/when Phase II comes to non-trunked operations then I would be surprised if there isn't an update to support it. I haven't had one of these in hand (yet...) but it looks like the only way so far to listen to DMR and other modes without needing system radios and software.

4887. TG7346 Madison County / Pontoon Beach Police

I am hearing TG 7346 actively in use on T301.

RIDs 700800 (dispatch?), 700801, 700805, 700806

6xx Peacock Circle. Madison Ave; units numbers 622, 623 match 600s in
the wiki.

This TG has previously been unidentified and/or under-used/in-testing .

Police have long used 155.79, CSQ for years, only going to a DPL tone
just a few years ago. (Odd for the St Louis metro region)
159.4575 have never really appeared to have been in use.

They now join most surrounding areas that have been using Starcom21 for
a while now -
Glen Carbon, Maryville, Granite City.
Edwardsville and Collinsville (Police) are still on UHF analog as far as
I know.

Hello,
One of the main purposes of my getting back into scanning is to monitor the local PD and FD in Hanover Park. which just happens to be Trunked and Phase II.

Conventional analog frequencies I can easily scan with my ICOM IC-R7000.

The great thing about this radio is that it does decipher a varity of digital frequencies which is a nice attribute,
But lacking in what you really need for serious scanning.
Which happens to be trunking and Phase II.

This radio already is practically obsolete.

Dean

I agree that without trunking, its value is much more limited for P25 listeners. Also the spec sheet doesn't indicate that it will decode CQPSK/LSM Simulcast modulation...which all scanners on the market have difficulty doing as they aren't designed properly for that modulation. I'm guessing it only does C4FM.

Jarrod

Thank you Rich, you beat me to it. I run Pro96com on tower 101 24/7 it is definitely still phase 1. And also all of the ducomm fire channels are simulcast and dispatched on vhf conventional analog channels. No need for a new scanner to monitor DuPage County.
Bob

I stopped in Onarga today to check the 450-470, 700, 800 and 900 mhz bands for DMR/NXDN systems.
Also got information for all the Starcom21 sites that I could receive.

There was another obvious band opening. (Around 9-10 am)

I have updated some things now, some later.
More to come later, depending on time.

Thanks
Terry Weatherford

Ron,As far as I know all Star Com towers are P2 capable.It was part of a further narrow banding effort that has been put on hold because the technology is not quit there to support clear and reliable communications.The towers were suppose to be P2 a year ago but I know of no agency but NW Central PD using P2.Cook County may have some P2 but since they are encrypted who knowsBusy week.IF monitoring put the 8 TACS and V TACS in. ILEAS using a V TAC Repeater off the Coal City Water Tower as a matter of fact it is out portable repeater they are using.Chris turned on the 8 TACS in Grundy but I believe that 93 and 94 are not working properly.StarCom Region 2A, 3A, and 3B may be active as well as Incident 1,2,3 talk groups.Hope all is well with you and Barb. 73

As to StarCom moving to P2 --- I would like to understand why Motorola does not move the StarCom network to P2.... Motorola has been selling and deploying P25 Phase 2 simulcast radios systems across the country for several years. I cannot believe Motorola would take the position "the technology does not support clear and reliable communications." So does anyone know the status and timeline to move StarCom to P2

It isn't the infrastructure (that Motorola owns) that is the issue. Even once SC21's towers are all P2 capable each and every subscriber radio needs to be capable of Phase 2 before all activity is actually Phase 2. If even 1 radio is operating as Phase 1 then the entire conversation on that tower will be held in Phase 1 mode.

The subscriber radios are owned or leased by the users and agencies. They are expensive. Most agencies do not have the money to replace otherwise perfectly good radios and replace them with Phase 2 radios. Even if they are Phase 2 capable they would need to be reflashed and reprogrammed.

As was pointed out some users are not only public safety which some just
got phase 1 radios. There are also businesses such as Ameren which have
just now purchased phase 1 consoles recently. Their consoles have to be
replaced at their answering points.

4899. Canadian National Railway Police on SC21 TG3591?

Yahoo group: StarCom21
Date: 2015-07-02 21:53:05 UTC
From: kevin.orourke1@...
Topic: 4899 Message: 4899

Hearing what I believe might be Canadian National Railway (CN) Police on SC21 TG3591. Conversation making reference to the MIT (intermodal yard) in Harvey and tracks in the Riverdale area. RIDs in the 113xxx range, comms are rather casual. Hearing this on Site 102 (Cook County South).

Definitely rail police, and from the locations I'm hearing mentioned I believe that it is CN. Someone who follows railroad comms might be able to confirm this better than myself. My guess is that they might have an alternate talkgroup as well. Unknown if this would be used outside of south Cook County or not, but seeing that SC21 is a statewide system my guess is that would be the case.

I would think we would see some activity on towers 101 and 149 as well with the large CN Yard in Bensenville/Franklin Park. For what its worth I have logged that talk group on both the towers I mentioned with Pro96Com. But I am yet to hear any audio.

As a point of clarification, the major rail yard in Bensenville / Franklin Park is the Canadian Pacific, not Canadian National.

This new talk group that is being discussed is apparently the Canadian National (CN) railroad police.

The CN's rail lines radiate around Chicago moreso than any other railroad except Metra. They should be expected to be heard almost anywhere on any tower - and all the way down state to Paducah!

CP has sworn police officers. I sometimes see them hete in the Quad Cities.

They are worse than Animal in that old TV show with Ed Asner. Except that their radios are not just scanners, they can talk to ANY local, county, state, or federal officer they have need to. I've spoken to a couple of them.

4907. ISP D1, D7, D16, D17 Dispatch Consolidation

Yahoo group: StarCom21
Date: 2015-07-10 12:17:22 UTC
From: Mike Curtis
Topic: 4907 Message: 4907

It's been discussed before but it looks like it's coming soon for D1, D7, D16 and D17 - All will be dispatched out of the D1 dispatch center in Sterling "in coming months"

http://www.mywebtimes.com/news/local/state-police-moving-la-salle-radio-center/article_58b512f6-986e-5045-89bb-0ca2d35223af.html

4908. 57xx-series TGs, 461xxx-series RIDs on SC21

Yahoo group: StarCom21
Date: 2015-07-22 19:14:19 UTC
From: kevin.orourke1@...
Topic: 4908 Message: 4908

Reviewing SC21 logging from the past few weeks and have come across new TGs and RIDs:

TG 5776 - RID 461012
TG 5783 - RID 461001

Both noted on T101. Two and one transmissions respectively, so not enough traffic content to help. Anyone familiar with these TGs or RIDs?

4909. IDOT District 9 RIDs

Yahoo group: StarCom21
Date: 2015-07-22 21:27:49 UTC
From: kevin.orourke1@...
Topic: 4909 Message: 4909

Is there someone in IDOT District 9 (far Southern IL) that can confirm for me that IDOT D9 uses 769xxx RIDs on SC21? It is listed in the RR SC21 RID Wiki that 769xxx RIDs are IDOT District 8, but in other districts the third digit of the RID appears to denote the district number (mostly).

Thanks in advance...

4910. Re: 57xx-series TGs, 461xxx-series RIDs on SC21

Yahoo group: StarCom21
Date: 2015-07-23 22:50:06 UTC
From: kevin.orourke1@...
Topic: 4908 Message: 4910

Thanks to a handful of folks who responded to my original email, I've been able to put together the following information regarding my "mystery" STARCOM21 talkgroups.

LivCom (the consolidated public safety dispatch center in Livingston County) is reportedly in the process of moving dispatch for county police agencies to STARCOM21 from their legacy UHF repeaters.

TG 5776 - LivCom "P1" - Dispatch for Livingston County Sheriff and Fairbury Police Departmant

TG 5777 - LivCom "P2" - Dispatch for Pontiac and Dwight Police Departments

TG 5783 would also seem to be used in Livingston County due to the fact that the RID I observed there closely matches one I noted in use on TG 5776. It wouldn't be too wild of a stretch to believe that (at the very least) TGs 5778-5782 might also be allocated to them. Unknown which agency uses the two RIDs (461001, 461012) that I noted as active.

The above information has been added to the Radio Reference database. Any additional observations about these or nearby talkgroups and RIDs would be welcome!

4913. STARCOM21 ITECS/UCP HTs

Yahoo group: StarCom21
Date: 2015-09-03 21:41:59 UTC
From: wireless101@...
Topic: 4913 Message: 4913

Wondering if anyone on the list knows what the approximate RID ranges might be for the STARCOM21 HT caches in the ITTF ITECS trailers (and UCPs if they carry HTs). Hearing what appear to be Fox Lake (and an Antioch?) PD units on SC21 and am wondering if they might be using cache HTs. Observing individual RIDs, so not a patch. Traffic volume very light.

Won't list the TG due to the traffic being related to an ongoing investigation, but anyone listening to the statewide common TGs would be able to hear these comms.

Mark

4914. Any Idea How Big Starcom Is?

Yahoo group: StarCom21
Date: 2015-09-04 18:32:33 UTC
From: Mike Curtis
Topic: 4914 Message: 4914

I've been running Pro96Com against Starcom for over 8 years now (mainly in Northern Illinois and specifically LaSalle County) and have logged 1,403 talkgroups and 23,380 radio IDs. Are there any published numbers or does anyone "in the know" have an idea of how many talkgroups and radios are active on it?

Thanks!

I suspect the only people who know that are at ISP as they "manage" the system

But you can find a list of subscribers here

The old CARMA page as well as the basic RR database looks like it easily has over 1,000 TG's. It is a huge system for sure.

I would say being Motorola owned I bet they know exactly how many are on
the system. Plus given the added Ameren talkgroups

FOXCOM would most likely be Fox Lakes Command, as the search continues for the 3 suspects in the murder of the Police Lt from that community last week

Handing out ITTF radios would give the best interoperability for those helping out.

This is being used for interoperability between Fox Lake cars and ISP Dist 2 and Dist 15 cars that are helping with patrols in town while the murder investigation continues (and in preparation for massive funeral tomorrow).

Remember that when running Pro96Com, Unitrunker etc. you will only see affiliations that occur on the tower you are monitoring. I have tried a few times to consolidate Pro96Com files from other areas to get a better idea of TGID's but it is nearly impossible.

I did suggest that the writer of Pro96Com and certain other radio web entrepreneurs consider a networking feature (similar to those used by ATCS or ADSB) that would allow users to share data and create kind of a consolidated TGID and Radio ID database but that would require pretty extensive servers and a major rewrite of the application. He liked the idea but it is impractical at this time.

WCRA MID-WINTER HAMFEST
Sunday, January 17, 2016

The 2016 WCRA Mid-Winter Hamfest will be held at the Kane County Fairgrounds Exposition Center in St. Charles, Illinois on Sunday, January 17, 2016. This is the same location as last year!

We're planning a great hamfest that will include the usual flea market and commercial vendors, on-site VE Testing, hourly prizes and more! Hamfest hours are 8am to 1pm and there will be plenty of FREE parking.

Flea market tables may be reserved in advance for $30, $40 with electricity. After January 1st tables, if available, will be $35, $45 with electricity. Purchase two tables and receive a $5 discount per table. Everyone at your table must have a hamfest admission ticket.

Advance admission tickets are still just $8 each and include four raffle tickets. Day-Of tickets will be $10 and have only one raffle ticket. Children under 12-years of age are admitted free as are boy and girl scouts in uniform.
Advance tickets can be purchased by mail. Send a self-addressed, stamped envelope plus your check or money order made out to WCRA Hamfest to:

WCRA Hamfest
PO Box QSL
Wheaton, IL 60187-1055

Your order must reach us no later than January 8, 2015 to ensure timely delivery.

General questions about the hamfest? Call us at (630) 604-0157 or via e-mail at info@.... Ticket questions should be directed to me. N9DKO@...

They've been doing a LOT of testing on the StarCom system, but they have not switched over yet. They did use it for Sheriff Ops one night last weekend, but they went back to their TRBO radios.

West Liberty and Joy sites are up now. Conesville site will be a while. Those frequencies are listed below:

Muscatine Community College Tower - NAC of 142:
1. 854.1875
2. 854.5375
3. 854.7125
4. 857.1375 (Primary LCN)

West Liberty Tower - NAC of 141:
1. 854.2875
2. 854.6875
3. 856.1625 (Primary LCN)
4. 857.4785 (Alternate LCN) (former MPD 800 MHz Frequency)

Joy Tower - NAC still TBD:
851.8375
852.3625
852.8875 (Primary LCN)
853.4125
853.9875

Subject: [QUADCITIESSCAN] Muscatine County

Has Muscatine County/City made the final switch to STARCOM21? I have heard virtually nothing on their MOTOTRBO channels this evening. I heard one city PD exchange, but nothing else from ambulance, fire, police or sheriff. Nada. There's always plenty of ambulance dispatches on TRBO.

Nothing tonight. Anyone monitoring STARCOM21 for them? Can someone repost the Muscatine County system frequencies for STARCOM21, too? Thanks.

District 11 Collinsville

Scanner has been decoding 118.8 and sometimes 123.0 during transmissions on 155.475 (but if I program a channel with that, it only stops on it once in a while)

The last few days I have notice a double high-pitched beep every 10 seconds during the transmission.

Have not detected what is happening on the SC21 TG.

Terry

4936. Re: [StarCom21] Illinois FCC Applications / Modifications 12/24/2015 to 2/20/2016 [1 Attachment]

Yahoo group: StarCom21
Date: 2016-02-24 04:45:22 UTC
From: Jeffry Rehm
Topic: 4936 Message: 4936
Attachments: 1 described; binary payloads are missing from this source WARC

I was thumbing randomly through a few of the FCC links and found one very interesting one. I believe it was listed under (or as) Illinois State Police Alarm System. It was for the testing of "airborne repeaters" to be used in time(s) of emergencies. VERY interesting.

Topic: 4936 Message: 4937

Jeff,

I remember seeing that one which was a temporary license in like Fayette, Marion, Jefferson, those counties and was only for like a single month of operation. That was the one I had saw and it was issued to ILEAS - Illinois Law Enforcement Alarm System. Basically the mutual aid group many law enforcement agencies are part of to send additional manpower and equipment when needed.

4938. Re: [ScanMetroStLouis] Re: [ScanIllinois] ISPERN 155.475

Yahoo group: StarCom21
Date: 2016-02-24 23:46:48 UTC
From: SC21
Topic: 4933 Message: 4938

That appears to be what it is. I using a random AC adapter (with the
right specs).
It stops doing it when on battery power.

However the other thing I noticed...

* The last few days I have notice a double high-pitched beep every 10
* seconds during the transmission.
*

* Have not detected what is happening on the SC21 TG.

I heard this again today, but ISP D11 was on 155.475 and heard the
double beeps simulcasting/patching on MOSWINs ISPERN TG.

Thanks!
Terry

blockquote, div.yahoo_quoted { margin-left: 0 !important; border-left:1px #715FFA solid !important; padding-left:1ex !important; background-color:white !important; } the rythmic beeping may mean that the transmit site is running on emergency power.
'73rich, n9dko_____

Very possible, parts of Collinsville/Madison County currently have power outages.

4941. GRE Scanner Repair

Yahoo group: StarCom21
Date: 2016-02-25 23:36:47 UTC
From: starcom21@RadioReference.com
Topic: 4941 Message: 4941

I'm wondering if you are still capable of doing GRE scanner repair.
Everything I see online/forums and your website has old dates, so not
sure of the 2016 status.

I have 2 RadioShack Pro106s that need repair.
I believe both have poor receiving sensitivity.
One needs a new keypad (at least the Select/arrow areas is broken)

I have a PSR-600 that also has poor receiving sensitivity.

Thanks
Terry Weatherford WX9SAR

I read the letter to the FCC and was smiling the whole time. I have always heard about directional antennas all up and down the Mississippi river but it was always rumor. Now I fully understand why I have such a hard time hearing StarCom just a couple miles into the St Louis area. We certainly would not want radio signals to travel across international waters. (Smile)

**

**

SPRINGFIELD---*Illinois State Police (ISP)*officials today announced plans to further advance the agency's multi-phase radio communications consolidation plans designed to unify technological resources and reduce ISP radio operating costs.

Beginning April 1, 2016, District 5, (Joliet) will transfer dispatch duties to the District Chicago Communications Center to maximize available resources until the final consolidation is completed. The transfer of District 5 communications is also a fiscally responsible move which will reduce the number of telecommunication consoles requiring upgrade during the anticipated software change scheduled to take place in October 2016. Staffing at the District Chicago Communications Center is predicted to reach optimal levels following the full consolidation of District 5 and District 2, (Elgin) dispatch.

The ISP began communication consolidations in 2012 by combining radio at District 13, DuQuoin, for District 19, Carmi, District 12, Effingham, and District 22, Ullin. The ISP's final communications objective will consolidate 20 statewide communications centers into 6 centers located at Chicago, Springfield, Pontiac, Collinsville, DuQuoin and Sterling. The Collinsville, DuQuoin, Pontiac and Springfield consolidations are complete and have proven capable of handling ISP radio traffic from neighboring districts.

The ISP is committed to providing public safety to the citizens of Illinois, and the phased consolidation plan illustrates the Department's commitment to fighting crime, and keeping communities safe. ISP Communications Centers are separate from local 9-1-1 emergency centers and will not have an impact on the statewide 9-1-1 emergency consolidation. Residents are reminded that ISP District 5 Headquarters

will remain open to serve the citizens.

4947. SC21 TG 1829

Yahoo group: StarCom21
Date: 2016-05-10 20:25:52 UTC
From: kevin.orourke1@...
Topic: 4947 Message: 4947

I live in DuPage County and get snippets of traffic on SC21 TG 1829 from time to time via Site 101. My Home Patrol logged RID 29559 as one of the users on this TG, and it appears to be a dispatcher. The Radio Reference SC21 Wiki shows this RID as being used by MABAS Division 18 (Ogle County) secondary dispatch in the past. A 2014 list of MABAS primary and secondary dispatch agencies indicates that Rochelle FD is MABAS Division 18 secondary dispatch.

The Radio Reference SC21 database shows TG 1829 as Stephenson County Law Dispatch.

Can someone confirm which agency or agencies use SC21 TG 1829?

Thanks in advance.

Subject: [StarCom21] SC21 TG 1829

I live in DuPage County and get snippets of traffic on SC21 TG 1829 from time to time via Site 101. My Home Patrol logged RID 29559 as one of the users on this TG, and it appears to be a dispatcher. The Radio Reference SC21 Wiki shows this RID as being used by MABAS Division 18 (Ogle County) secondary dispatch in the past. A 2014 list of MABAS primary and secondary dispatch agencies indicates that Rochelle FD is MABAS Division 18 secondary dispatch.

The Radio Reference SC21 database shows TG 1829 as Stephenson County Law Dispatch.

Can someone confirm which agency or agencies use SC21 TG 1829?

Thanks in advance.

4950. Uniden Advances Scanning with Digital Mobile Radio (DMR)

http://info.uniden.com/twiki/bin/view/UnidenMan4/DigitalMobileRadioUpgrade

Uniden Advances Scanning with Digital Mobile Radio (DMR)

Demonstrating our commitment to continually enhance the value and relevance of your investment in Uniden products, today we announce the latest upgrades for our flagship BCD436HP and BCD536HP scanners. Soon, owners of these scanners will be able to add the ability to monitor and scan Digital Mobile Radio (DMR) systems including MotoTRBO^(TM) Connect Plus and MotoTRBO Capacity Plus systems with a single paid upgrade, making these scanners the indisputable best-in-class solution for monitoring radio systems. Until now, you've either needed to purchase a single-use radio to monitor these systems or kludge together a system using multiple radio dongles plugged into a PC.

DMR is used extensively across the world by businesses, government agencies, amateur radio operators, and individuals worldwide.RadioReference.com <http://info.uniden.com/twiki/bin/edit/PartnerWeb/radioreference.com>, the premier web site for finding radio system information, has over 600 trunked DMR systems and over 4500 DMR conventional channels documented. But, this is just the beginning of the DMR story. The vast majority of DMR systems have never been documented since, up to now, users could not easily monitor them. Based on a quick survey of FCC records, we expect that there are tens- or even hundreds-of-thousands of additional DMR channels to discover.

And discovery will be important. So, we'll include some basic tools for discovering DMR channels on your own so that you will be able to quickly supplement the information currently provided byRadioReference.com <http://info.uniden.com/twiki/bin/edit/PartnerWeb/radioreference.com>. We'll be adding details, below, as we get closer to finalizing the firmware release, so watch this space.

Using the Uniden BCDx36HP radios, upgraded with the DMR upgrade, you will now be able to seamlessly monitor unencrypted channels on the following system types:

* Conventional Analog channels
* Conventional P25 Digital channels
* Motorola Type I and Type II Trunked Radio systems with Analog and Digital (P25) Voice
* EDACS Analog trunked radio systems
* LTR Analog trunked radio systems
* APCO Project 25 Phase I and Phase II Digital Trunked Radio systems
* EDACS trunked radio systems with*ProVoice channels (paid ProVoice

upgrade required)*
* *Conventional Digital Mobile Radio (DMR) channels (paid DMR upgrade required)*
* *MotoTRBO Capacity Plus Trunked Radio systems (paid DMR upgrade required)*
* *MotoTRBO Connect Plus Trunked Radio Systems (paid DMR upgrade required)*

Uniden is the only scanner manufacturer to offer those bolded items, above. Plus, we have even more Uniden exclusive features in these models, including:

* Close Call^? RF Capture
* Dynamic Memory Architecture
* Location-Based Scanning with GPS Support
* Trunked and Conventional Discovery Modes
* WiFi connectivity with iPhone and Android Apps (BCD536HP only, Android App coming in 2016)

We are working on putting the finishing touches on the upgrade but want to give you the opportunity to pre-order the upgrade so that you are ready to monitor DMR from the moment it is released. As a special thanks to early adopters, we are offering the upgrade for only $50 for a limited time. We'll let you know when the pre-ordering site is ready but, until then, save your spare change.

/Disclaimer: The above constitutes a pre-announement, which includes details as we know them today, but which might change based on technical, legal, economic, or other unforeseeable issues that could arise. No portion of this pre-announcement should be considered as a legally binding obligation to perform on Uniden's part./

MotoTRBO is a trademark of Motorola, Inc.

*Now Hear This: Emergency Agencies Turn Off Radio Encryption *

Tue, 10/11/2016 - 8:40am 1 Comment
<https://www.ecnmag.com/news/2016/10/now-hear-emergency-agencies-turn-radio-encryption#disqus_thread>
by DAVE COLLINS, Associated Press

Some police and fire departments are bucking a trend to conceal dispatch communications from the public, acknowledging that radio encryption has the potential to backfire and put first responders in danger.

Agencies with digital radio systems have turned off the encryption to their main dispatching channels and others have decided not to turn it on. They say their officers and firefighters may not be heard during emergencies by responders at! neighboring departments with radio systems that either don't have access to their encrypted channels or aren't advanced enough to have encryption capability.

Officials also say they are addressing concerns from critics who argue encryption decreases police transparency at a time when it is needed, especially in the wake of shootings of unarmed black people by police officers.

"The overwhelming opinion of encryption is that it works great for preplanned tactical environments like SWAT teams staging a situation," said Eddie Reyes, deputy chief of Amtrak police and chairman of the International Association of Chiefs of Police communications and technology committee.

"But for day-to-day operations where officers are going across borders in emergency pursuits or foot pursuits, that's where it tends to break down," he said. "A good number of agencies are still operating on antiquated systems and would not have the ability to accept encryption."

When Reyes was working for Arlington, Virginia, police in 2006, he said, an officer who fatally shot a teenager outside a restaurant inadvertently switched over to encryption mode on his portable radio. There was temporary chaos on the radio when officers en route couldn't communicate with the officer in the shooting because their radios weren't in encryption mode, Reyes said.

A slow trend continues toward encryption, which has been around for years. It hides communications from public airwaves by modifying voice! signals with coded algorithms, preventing people from listening via radio scanners, the internet and cellphone apps. Only people with encryption "keys," the information needed to access the encrypted channels, can listen.

Open government advocates say the practice withholds crucial information about emergency situations from the public. Concerns also have been raised by news organizations, which say it cuts off journalists who monitor public safety broadcasts from being alerted to major events.

Police officials say they're worried about the safety of their officers, because criminals have been known to track officers' movements by listening to police communications. They also say they want to prevent the public broadcasting of people's personal information, including medical histories and juveniles' names.

They further cite violence against officers around the country over the past few months and the response to the Boston Marathon bombings in 2013, when people listening to police communications posted misleading and inaccurate information on social media.

Among police departments that have recently encrypted all communications are those in Anchorage, Alaska; Riverside, California; Manchester, New Hampshire; and Newtown, Connecticut.

"What happened this summer really culminated in making the decision," Newtown Police Chief James Viadero said, referring to violence against police. "I had a legitimate concern for my officers."

Other departments are taking the opposite approach. Police in New Orleans; Spokane, Washington; and other cities have vowed not to encrypt their main dispatch channels. Others that had encrypted their communications have turned it off.

Police in Mansfield, Massachusetts, turned off their encryption more than a year ago after officers expressed concern they couldn't talk with counterparts in some neighboring towns, Police Chief Ronald Sellon said. Mansfield is home to the 20,000-seat Xfinity Center outdoor amphitheather, and there were worries about communications with other

agencies if there was a mass casualty event at the theater.

Last year, Washington, D.C., officials switched off the encryption for fire communications. The move came after firefighters had problems using their radios in a subway tunnel during an emergency response. The tunnel filled with smoke because of an electrical malfunction, killing one person and sickening dozens more.

The Metro transit agency, which had a radio system in the subway that allowed below-ground communications by city firefighters, said the radio problems were the result of the fire department changing its own radio system, including adding encryption, without telling the transit agency. City officials denied encryption caused the problems.

Police in Naugatuck, Connecticut, like many departments, are keeping their main dispatch channel open to the public while maintaining encrypted channels to use during tactical operations.

Naugatuck Police Chief Christopher Edson cited the need to be able to communicate with other emergency responders, as well as the expense of encryption, which can cost several hundred dollars per radio to implement. Another issue was not wanting to block out the public, he said.

"We also want to be transparent," he said, "during this particular climate in the country."

4953. P25 8C1 Springfield

Yahoo group: StarCom21
Date: 2016-10-16 02:32:12 UTC
From: starcom21@RadioReference.com
Topic: 4953 Message: 4953

On Friday, I found a new P25 system in Springfield.

857.9875 was NAC 8C1, with sysID 8C1 BEE00 WACN site 1-001

Did not detect any activity after adding to scanner.

Was not able to monitor with software

The frequency is on a license to the city of Springfield that their 800 MHz Motorola type II system is on.
It was still on the air on Thursday, possibly Friday.

4954. STARCOM21 Mystery Talkgroups

Yahoo group: StarCom21
Date: 2016-11-15 21:49:46 UTC
From: kevin.orourke1@...
Topic: 4954 Message: 4954

I was reviewing some SC21 recordings from June and came across activity on two talkgroups (3406 and 3408) not listed on the Radio Reference SC21 database page or in the list of 'mystery talkgroups' list on the RR SC21 wiki page.

RID 77069 comes up on TG3406. He IDs himself as "3602" and the TG as "PSAP". A few minutes later, he comes up on TG3408 and works RID 77066 ("3601"). "3602" says he's in Indiana on I-94 east of I-65.

Is anyone familiar with either of these talkgroups or possibly an agency using 3600-series identifiers? The RR SC21 wiki page RID list indicates that 77xxx RIDs are used in Grundy County.

At one point "3602" mentions that he had earlier been on I-65 directly in line with (Illinois route?) "17". FWIW, Illinois Route 17 runs east/west just south of Grundy County.

Thanks in advance....

September 7, 2016

Mr. Chris Kindelspire
Region 54 Regional Conformance and Review Committee
C/o Grundy County ETSB
111 East Illinois Avenue
Morris, Illinois 60450

Dear Mr. Kindelspire:
You may recall a brief discussion we had previously regarding
interference on two channels in the Kane
County simulcast site that has essentially rendered these channels
unusable since early January 2016.
One of the channels is a state allocation channel (853.9375) from Region
54 licensed to the state under
WQDC377 and the other is a general access channel (855.2125) licensed to
the City of Elgin under
KNBX891.

The state filed an interference report today and anticipates an investigation by the cellular providers in
the area. However, we are seeking immediate relief in the form of a Special Temporary Authorization
(STA) to move two state allocation channels from our McHenry County simulcast site to the Kane County
simulcast site for a 60 day test to see if these channels will work there without interference. These two
channels, 852.4125 and 852.9125 are no longer used in McHenry County with the completion of the
merger of McHenry County with Starcom21.

I have prepared applications in CAPRAD to add these two channels to all eight sites in Kane County upon
approval of Region 54 and receipt of the required letter to accompany our STA applications with the
FCC. I would appreciate an expedited response from Region 54 if possible. Please let me know if there's
anything else Region 54 requires to move this forward quickly.
Respectfully,
Jeff Sexton

4959. Identify Macon County SC21 TGs : Reply to thread 'Mt. Zion and Maroa PD systems?'

Yahoo group: StarCom21
Date: 2017-01-15 16:13:18 UTC
From: starcom21@RadioReference.com
Topic: 4959 Message: 4959

What would be great is if someone could dedicate a week or so of listening primarily to the law (and fire) and unidentified talkgroups to try to help and understand what each of these talkgroups are actually used for.

With my old job I was in the area multiple times a month, and that's where a lot of the information listed came from. They were just converting at the time and there was a lot of testing and unknown. (2 years ago). It really hasn't been updated since.

4961. Uniden radios and patched SC21 TGs

Yahoo group: StarCom21
Date: 2017-02-28 19:41:50 UTC
From: Kevin O'Rourke
Topic: 4961 Message: 4961

Thanks to the Pro96Com software I'm running on SC21, I've noticed that some talkgroups are patched to other talkgroups from time to time. When that happens, I can only hear the traffic from the originating talkgroup on the talkgroup it's patched to, and not on the originating talkgroup. I've observed this with three different Uniden scanners (BCD996XT, BCD396T and BCD436HP). As posted on this group earlier today, Rich (using a Radio Shack PRO-106) says that he is able to hear traffic on both the originating talkgroup and the talkgroup it's being patched to.

Another example - IDOT D1 patches their yard dispatch talkgroups together at times (due to staffing shortages at the comm center, I'm told). If I want to listen to traffic on my local yard's dispatch talkgroup, I might be able to hear it there (if it isn't being patched) or I might have to consult Pro96Com, determine what talkgroup this traffic is being patched to and listen to them there (along with a bunch of other yards).

Has anyone else experienced or confirmed this? Is anyone aware of a setting in the Uniden scanners that would allow users to hear the traffic directly on the originating talkgroup?

I have read on radioreference .com that same info that Uniden scanners lack the ability to hear certain patches...There was a upgrade to the 996P2 and 325P2 for this I believe but it does not always work....I have both scanners but have not done the upgrade...I have a RS106 and when a valid patch is active the word "PTCH" appears at the top of the display...When D-CGO patches D2 and D5 on TG9013 its says "{PTCH" on top....I still don't hear the D2 mobile just the dispatcher unless I monitor TG9002 on another scanner....

I don’t think I’ve ever heard P25 patches done right on any of my Uniden scanners with the respective latest firmware :)

Topic: 4964 Message: 4964

Does anyone have definite knowledge of how STARCOM21 talkgroups 1676-1679 are used? They are listed in the Radio Reference database as being MABAS talkgroup, but I believe that's because TG 1677 has been heard being used for coverage testing by radios observed as being used by US&R IL TF-1 in the past. Encryption has been widely used on these TGs. TGs 1678 and 1679 have been observed in use by 914xx RIDs in the past http://tinyurl.com/kq86kn8 .

4965. New TG Find

From: Mark Loewe
Topic: 4965 Message: 4965

Additional find this morning for the new LITH/Huntley Starcom TG listings.
Add: 34131 (LITH Local)

And please correct the RR entry for Huntley local as it is 34130 which is what I submitted here Monday. Not 23130 as listed on the RR site. Mark Loewe
